The Monocle Book of Entrepreneurs CRC Press

This practical book presents fundamental concepts and issues in computer modeling and simulation (M&S) in a simple and practical way for engineers, scientists, and managers who wish to apply simulation successfully to their real-world problems. It offers a concise approach to the coverage of generic (tool-independent) M&S concepts and enables engineering practitioners to easily learn, evaluate, and apply various available simulation concepts. Worked out examples are included to illustrate the concepts and an example modeling application is continued throughout the chapters to demonstrate the techniques. The book discusses modeling purposes, scoping a model, levels of modeling abstraction, the benefits and cost of including randomness, types of simulation, and statistical techniques. It also includes a chapter on modeling and simulation projects and how to conduct them for customer and engineer benefit and covers the stages of a modeling and simulation study, including process and system investigation, data collection, modeling scoping and production, model verification and validation, experimentation, and analysis of results.

The Business Guide to Sustainability Earthscan

#1 New Book for Entrepreneurs as seen on Forbes.com, Inc.com & Mashable.com You have the Big Idea, the drive and ambition. You see the market, and you've identified the customers. You want to be wildly successful. You wonder, how certain entrepreneurs have achieved success without a fancy education or unlimited access to capital. Enter Bill Green, a serial entrepreneur. Using his own impressive business achievements (and his few fiascos), Green provides the reader with the practical tools needed to launch their Big Idea or improve their existing business. In a unique, humorous, and impassioned style, Bill

shares 101 key insights he has gleaned over a 40-year business career that began with a single flea market table. He shares the lessons he learned that allowed him to leverage his flea market business table into one of the largest industrial distribution companies in the country and how he subsequently successfully invested in or founded numerous companies across multiple end markets. His message is universal and is the ideal road map for anyone who might wonder how the Bill Greens of the business world do what they do so well.

You have plenty of ideas you want to put into a book, but you're stalled. Maybe you start, but can't find the time to continue. Or you're frustrated with the writing process. And when you seek

advice, people tell you, "It's all about discipline," or they talk about what writing software to use. But that doesn't help you actually write your book. So you never finish your book, the world never gets the benefit of your wisdom, and you never get the benefits of being an author. Isn't there an easier way? Now there is. In "The Book In A Box Method," Tucker Max and Zach Obront show you the exact steps you can follow to go from idea to finished manuscript, in an easy, quick way -- even if you're not a writer. Using the same methods, processes, and templates that they use for their authors at their company, Tucker and Zach show you exactly how to: Crystallize your book idea Create your book outline Create all the content for your book Edit that content into a great manuscript With "The Book In A Box Method," you'll be able to write a better book - in less time - than you ever thought possible.

This book provides rich new empirical evidence on green business as it examines its variation between industries and nations, and over time. It demonstrates the deep historical origins of endeavors to create for-profit businesses that were more responsible and sustainable, but also how these strategies have faced constraints, trade-offs and challenges of legitimacy. Based on extensive interviews and archives from around the world, the book asks why green business succeeds more in some contexts than others, and draws lessons from failure as well as success.

The Sustainable MBA provides the knowledge and tools to help you "green" your job and organization, to turn sustainability talk into action for the benefit of your bottom line and society as a whole. Based on more than 100 interviews with experts in business, international organizations, NGOs and universities from around the world, this first of its kind guide brings together all the pieces of the business and sustainability puzzle including: The basics on what sustainability is, why you should be interested, how to get started, and what a sustainable organization looks like. A wide range of tools, guidelines, techniques and concepts that you can use to implement sustainability practices. Tools and tips on how to "green" your job, including how to sell these ideas to your team, how to make green choices as a consumer and how to organize green meetings. A survey of the exciting trends in sustainable business happening around the world. A wealth of

links to interesting resources for more information. The Sustainable MBA is organized like a business school course - allowing you easy access to the relevant information you need about sustainability and Accounting, Economics, Entrepreneurship, Ethics, Finance, Marketing, Organizational Behaviour, Operations and Strategy. Giselle Weybrecht's commitment to sustainable development goes back to before her university years. Since then she has expanded her reach to local and national government, business, social entrepreneurs, and the international community. She worked for the United Nations World Water Assessment Programme, is a fellow of the UC Berkeley-based Beahrs Environmental Leadership Programme, and holds an MBA from London Business School. She is currently developing new approaches to raise awareness among managers of how they can incorporate sustainability into their businesses and everyday professional lives.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

What Every Engineer Should Know About the Internet of Things Routledge

Strategic Sustainability examines how organizations can implement environmental sustainability science, theories, and ways of thinking to become more competitive. Including examples

and ideas implemented in various countries, it is based on known scientific principles about the natural world and organizational principles focusing on the work domain. The intersection of these two realms of research creates a powerful and new approach to comprehensive, seemingly contradictory issues. Daniel S. Fogel draws from disparate fields and creates a story about organizations, their future and how people are part of the problem and, more importantly, part of the solution. Readers will find ways to take action to improve organizations and avoid denigrating our natural environment, learning to be mindful of the urgency we should feel to improve our impact on the world. The focus on the natural environment provides a powerful focus for creating value in organizations and addressing the major challenges we all face. Advanced sustainability students, working professionals and board members, managers and legislators responsible for governing organizations or implementing public policy will find this book useful. A companion website features an instructor's manual with test questions, as well as 38, 10-minute videos for classroom use.

Concentrated Advice from 25 Industry Leaders CRC Press

Following the 2008 global financial crisis, entrepreneurship has never been more vital. As jobs were lost from large organizations, most new jobs came from innovative startups. The lure of hi-tech has attracted many people who see themselves as future entrepreneurs, but who lack the perspective of the total experience. To meet this demand, community colleges and universities across the world have set up entrepreneurship courses. The Global Entrepreneur is a life-changing book. To leave the comfort of a steady job and enter the tumultuous world of the entrepreneur is a major and often fearful step. For those who are contemplating this change, or who have already embarked upon this exciting venture, reassurance based on the experience of both successful and even not so successful entrepreneurs can be invaluable. The book provides an overview of the entrepreneurial experience broken down into all of its essential elements. Today, startups are global in nature and the book helps a budding entrepreneur understand the effect of different cultures both on the company and his/herself. This book differs from the existing literature in that its focus is on the individual and his or her reaction to the international nature of the entrepreneurial

experience backed by both the lived experience of actual entrepreneurs and case studies of entrepreneurship across the world. Business success is measured by financial return. The book will be a vital tool in this endeavour. This book will appeal to students of business or management and individuals who are considering a career change, to create or join a startup, and need more knowledge to make their decision.
