skills Dressing should not be seen as a chore. Try to keep it fun by playing dressing up games and dressing toys. When dressing dolls, try using a doll which your child can relate to as being of a similar age. This will give your child a clearer idea of how to organise dressing. Explaining Dressing skills When people live with a serious health problem or disability, or as they get older, it can become difficult for them to get around in their homes, and to independently and safely complete everyday... Regaining your independence | Support to live at home ... Current Occupational Performance Functional performance on the ward (document level of assistance and any aides used on ward for these occupations) - Toileting / continence - Showering / washing - Dressing - Meal time abilities - Functional mobility (in the context of ADL performance) and level of assistance and aides used - Activity tolerance An example of an OT Initial Assessment notes entry This type of assessment is typically used for personal care tasks like showering, dressing, toileting, brushing teeth, grooming

etc. The great thing about assessing through occupation is that you can also take into account habituation and the role of long term memory, motor memory, problem solving and insight into abilities. Personal Activities of Daily Living (PADL) Assessment For the first two weeks following your operation we advise that you have a strip wash and avoid having a bath or shower as you will need to keep the wound and dressing on your hip dry. After this time you can use a walk-in shower as normal but will not be able to step in / out of the bath or sit in the bottom of the bath for the first two months. Discharge information for patients after a total hip ... Washing - including using small items such as toothbrushes and razors, squeezing tubes and bottles or turning on taps and showers Dressing and undressing - involving zips, buttons and fastenings, or putting on socks or tights Arthritis - The OT Practice People with more complex needs may benefit from an assessment from the Occupational Therapy service. The service helps adults of all ages to modify activities they need or want to do.

Occupation...Occupational Therapy and equipment: helping you stay at homeLife skills. Daily living skills include cooking, eating and drinking, washing and dressing. Sometimes you may find it hard to carry out these skills and may need physical assistance, guidance or equipment to make it easier. The occupational therapy team can help support you with your daily living skills.
