<p>SG-298/U.Timer/Generator Circuits Manual This manual contains operation and service instructions for the Vehicle Function Generator (VFG) Consoles. The consoles are used to verify the correct operation of checkout equipment or launch control equipment for the Agena vehicle. Manual Jeffrey Frank

Timer/Generator
Circuits Manual is an
11-chapter text that
deals mainly with
waveform generator
techniques and
circuits. Each chapter
starts with an
explanation of the
basic principles of its
subject followed by a
wide range of practical
circuit designs. This
work presents a total
of over 300 practical
circuits, diagrams, and
tables. Chapter 1
outlines the basic
principles and the
different types of
generator. Chapters 2
to 9 deal with a specific
type of waveform
generator, including
sine, square,
triangular, sawtooth,
and special waveform
generators pulse.
These chapters also

include pulse generator, time IC generator, and waveform synthesizer circuits. Chapter 10 examines the characteristics of phase-locked loop circuits, while Chapter 11 looks into the miscellaneous applications of the ubiquitous "555" timer type of integrated circuit. The appendix presents a number of useful waveform generator design charts, as an aid to those readers who wish to design or modify generator circuits to their own specifications. This book will prove useful to practical design engineers, technicians, experimenters, and electronics students.

Operator's, Organizational, Direct Support, and General

Support Maintenance Manual for Signal Generator SG-1144/U (NSN 6625-01-075-8478).

This textbook for this laboratory manual takes an unusual approach to teaching the fundamentals of electronics, showing in detail the waveforms obtained at various points in an electronic circuit. The book develops a more thorough understanding of the individual components and the circuit as a whole.

Test Set TS-140/PCM : Signal Generator SG-15/PCM and SG-15A/PCM, and Decibel Meter ME-22/PCM and ME-22A/PCM.

This manual contains operation and service instructions for the vehicle RF function

generator console. The function generator is designed for use during checkout of all ground equipment concerned with space vehicle telemetry. The function generator simulates radio frequency (rf) telemetry data normally transmitted from a space vehicle.
