1994 was an expansion of earlier, highly successful symposia. The objective of the symposium was to promote a scientific approach of the phenomenon of catalyst deactivation which will contribute to the development of catalysts which are less subject to structural transformations and more resistant to poisons and coke formation. These aspects are dealt with in 12 plenary lectures, 48 oral presentations and 35 poster papers, which were critically selected from an

impressive response from some 30 countries. Both fundamental and applied aspects were covered. The deactivation of catalysts in important industrial processes like fluid bed catalytic cracking hydrotreatment, hydrodesulfurization, catalytic reforming, hydrodenitrogenation, steam reforming, hydrodemetallization, hydrocracking, Fischer-Tropsch synthesis, propane dehydrogenation, phthalic anhydride synthesis received considerable attention. Mechanisms of poisoning, sintering and coking were further investigated and modelled and new experimental techniques for the characterization and the quantification of deactivation were also introduced.

To create and sustain diversity in medical education, biomedical research, and the physician workforce, medical schools must build on their critical admissions work and transform their learning environments to maximize the benefits of diversity and inclusion for teaching, learning, and optimal patient care. *Roadmap to Diversity and Educational Excellence* is designed to help medical schools establish and implement institution-specific, diversity-related policies that will advance their core educational goals with minimal legal risk. This second edition includes new guidance

associated with the June 2013 decision by the U.S. Supreme Court in *Fisher v. University of Texas*. More than just a legal update, this publication provides additional insights into relevant facets of law, policy, and research, to reflect the current challenges that medical schools face. A new chapter focuses on ensuring whether race-conscious policies are necessary, and a new appendix focuses on operational questions to consider when pursuing race-neutral strategies. Achieving the educational and health care-related benefits that come from a diverse student body requires concerted, school wide efforts. You are encouraged to use this publication as a tool to guide collaboration and discussions among your institution's leadership, faculty, admissions, diversity affairs, financial aid, and recruitment officers, legal counsel, students, and others engaged in and affected by diversity-related issues.
