General Relativity Hobson Solutions  
In physics, spacetime is any mathematical model which fuses the three dimensions of space and the one dimension of time into a single four-dimensional manifold.

Spacetime diagrams can be used to visualize relativistic effects, such as why different observers perceive where and when events occur differently.. Until the 20th century, it was assumed that the

three-dimensional geometry of the ...Spacetime - Wikipedia  
 In physics, the twin paradox is a thought experiment in special relativity involving identical twins, one of whom makes a journey into space in a high-speed rocket and returns home to find that the twin who remained on Earth has aged more. This result appears puzzling because each twin sees the other twin as moving, and so, according to an incorrect and naive application of time dilation and ...Twin paradox - Wikipedia
