Ethics of the Great Religions Springer

Conscience in World Religions is a unique collection of papers which allows the reader to compare and contrast the origins and development of the concept of conscience within different Christian traditions, Judaism, Islam, and Buddhism. The first part of the book, based upon extensive research of the Christian debate of conscience, explores the dynamic relation between authority, revelation, and education for both the individual and the community. It provides the reader with an insight into approaches to and interpretations of sources found within Roman Catholicism, Protestantism, and Orthodoxy. The second part of the text provides an enthralling and scholarly study of the previously relatively unexplored Jewish, Islamic, and Buddhist viewpoints on the concept of conscience. This book is a thought-provoking collection for all those interested in exploring the many facets of this most fascinating of subjects.

Unlike other texts, Gudorf's work focuses on common, everyday issues including food and diet, work, sex and marriage, proper dress, anger and violence, charity, family, and infirmity and the elderly while drawing out ethical implications of each and demonstrating how different religious traditions prescribe rules for action. An introductory chapter reviews standard ethical theory and core elements of comparative religious analysis. Each chapter opens with a riveting real-life case and shows how religious ethics can shed light on how to handle the larger issues, without determining for the reader what a proper ethical response might be.

The Golden Rule John Wiley & Sons

Inspired by the 1993 Parliament of the World's Religions, this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue. The contributors draw from both communities of discourse in addressing questions of method and theory and global moral issues such as human rights, distributive justice, politics of war, international business, the environment, and genocide in a cross-cultural context. }Inspired by the 1993 Parliament of the World's Religions, this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue. Its design is premised on two important insights. First, interreligious dialogue offers to comparative religious ethics a new, more persuasive rationale, agenda of issues, and practical orientation. Second, comparative religious ethics offers to interreligious dialogue an arsenal of critical tools and methods which will enhance the sophistication of its practical work. In this way, both theory (a dominant concern and strength of comparative religious ethics) and praxis (a dominant concern and strength of interreligious moral dialogue) are joined together in mutual effort, each contributing to the benefit of the other. The volume contributors share this vision of collaboration, drawing explicitly from both communities of discourse in a manner that crosses disciplinary and professional boundaries to deal creatively and constructively with important methodological and global moral issues. Although theory and practice cannot easily be separated in such a collaborative project, for the purpose of clarity, the volume is divided into two main parts. The first specifically engages questions of method, theory, and the social role of the public intellectual; the second, on substantive moral themes and issues, many of which were raised at the 1993 Parliament. Taken together, the volume's essays articulate and illustrate new ways of approaching contemporary moral concerns cross-culturally yet with a rigor appropriate to our complex and pluralistic world.

Multi-Religious Perspectives on a Global Ethic Gracewing Publishing

Around the world religion is an increasingly vital and pervasive force in both personal and public life. Though this trend has been widely noted, its long-term implications are as yet only dimly perceived. Will this be a force for healing or for violence? To express the question to its most dramatic, yet urgent form: can the world's major religious traditions respond constructively to contemporary challenges in the public sphere that are now, by definition, global? **Religion and Ethics in a Globalizing World** seeks to address this question, and to contribute to a greater understanding of the role of religion in the paradoxical context of a world that is increasingly unified, but which remains fundamentally plural.

The Golden Rule: treat others as you would like to be treated. This ethical dictum is a part of most of the world's religions and has been considered by numerous religious figures and philosophers over the centuries. This new collection contains specially commissioned essays which take a fresh look at this guiding principle from a comparative perspective. Participants examine the formulation and significance of the Golden Rule in the world's major religions by applying four questions to the tradition they consider: What does it say? What does it mean? How does it work? How does it matter? Freshly examining the Golden Rule in broad comparative context provides a fascinating account of its uses and meaning, and allows us to assess if, how and why it matters in human cultures and societies.

Religious Foundations for Global Ethics is an overview of morality in a "nation of immigrants," starting with the basic question of what morality is, and culminating in an examination of morality as a source of potential conflict, and how those conflicts can be resolved peacefully. The author strives to discuss ethical concerns from a variety of religious, philosophical and psychological perspectives, so that students are able to consider issues outside of their own cultural point of view.

How to Live Well John Wiley & Sons

In the belief that all the great religions have similarities that confirm and differences that enrich peoples' spiritual outlook on the world, the editors inaugurated a series which they hoped would bring out the essential tenets of religion in what they perceived to be an age of doubt. The series was originally published in the 1950s and consisted of three kinds of books: translations of imaginative, devotional and philosophic works, with an introduction or commentary; reproductions of masterpieces of religious art; and background books showing the environment in which this literature and art arose and developed. The books overlap each other: Both Eastern and Western religious art often illustrates a religious text and many of the books seek the common ground in their cultural view of religion or philosophy.

World Religion: Cross-Cultural Case Studies Edinburgh University Press

The Ethics of World Religions takes a much needed look at the ethical statements located in a number of religions, especially in Judaism and Christianity. Rabbi Plotkin is a well known authority on both the World Religions and ecumenical relations in America and Europe. His passionate writing reflects years of ecumenical encounters with an eye to understanding what unites religious expressions and creates mutual understanding and respect. In a time when moral values are touted, Rabbi Plotkin is able to bring to the discussion the many moral values found in a number of religions populating the world today. Their importance helps us to understand why reducing morality to a few issues leaves much unsaid and undone.

Ethics and world Religions Legare Street Press

Ethics and World Religions presents eighteen original cases that discuss ethical issues of diverse peoples and religions situated around the world. Each case is followed by two commentaries that explore the relevant issues from the perspective of two different religious traditions. Commentaries highlight the religious values, principles, and laws that are relevant, and they also suggest the range of options for resolution that exist within the perspective of that religion.
