Organizational Behavior SAGE Publications, Incorporated
Managing Public and Nonprofit Organizations approaches public management learning in a unique way, examining more than 100 high-profile and little-known administrative failure and success stories to explore how failures happen, how they can be prevented, and how to replicate successes in other jurisdictions. Organized to complement a standard public management or organizational behavior textbook structure, and to satisfy NASPAA accreditation requirements, this book explores both traditional public administration functions (performance management, financial management, human-resource management, procurement management, policymaking, capital management, and information-technology management) and organizational concepts (organizational structure and organizational culture). Unlike a traditional casebook, the accompanying stories do not stop in the middle to ask the readers what they would do; instead readers are asked to consider how the events illuminate what public management means and how to make it most effective. The stories ground and give meaning to the book's review of principles and best practices. Stories include both well-known and highly reported stories of success and failure including Wikileaks, the Boston Marathon bombing, bankruptcy of Detroit, British Petroleum oil spill, 9/11 World Trade Center attack, decision to invade Iraq, Affordable Care Act website rollout, "Bridgewater" scandal, and the Brooklyn Navy Yard killings. The stories do not pass judgment on governments and nonprofits as institutions, but rather teach students and practitioners best management practices by example. Discussion questions are included at the end of each chapter to prompt classroom discussion.

Within the field of Evaluation, performance measurement is fast becoming a prevalent framework or set of tools to use in implementation analysis, formative and summative evaluations, and even needs assessments. Many of the measurement techniques that evaluators employ overlap with those of performance management, so evaluators are able to learn and use this framework quite readily. Recent approaches have acknowledged limitations in the implemented measurement systems and developed new practice-based strategies for

effective ongoing measurement of program activities and use in guiding management. Significantly, these new strategies are being developed both in the United States and internationally and need to be brought together for collaborative learning and dissemination to practitioners and scholars. Julnes's text will serve as a vehicle for the dissemination of these new performance measurement strategies. The book will have a combination of conceptual and practical applications with an emphasis on cutting-edge practices in the US and abroad. The text boasts two unique features: first, though most of the chapters deal with performance measurement in the US., the text represents the most notable examples of performance measurement in Canada, Latin America, Europe and Eastern Europe; second, the book will be unique in the way that its structure will support the integration of theory and practice, with linked chapters that introduce the literature on key topics, present case studies with "lessons learned," and then provide clear guidance for practical "how-to/skill building."
