Teaching Narrative Theory Taylor & Francis  
 The purpose of this book is to provide a clear and systematic account of the complexities of fictional narration which result from the shifting relationship in all storytelling between the story itself and the way it is told.

**Narrative Theory** Cambridge University Press  
 This anthology brings together essential essays on major facets of narrative dynamics, that is, the means by which "narratives traverse their often unlikely routes from beginning to end." It includes the most widely cited and discussed essays on narrative beginnings, temporality, plot and emplotment, sequence and progression, closure, and frames. The text is designed as a basic reader for graduate courses in narrative and critical theory across disciplines including literature, drama and theatre, and film.

Narrative Dynamics includes such classic exponents as E. M. Forster on story and plot; Vladimir Propp on the structure of the folktale; R. S. Crane on plot; Boris Tomashevsky on story, plot, and, motif; M. M. Bakhtin on the chronotope; and Gerard Genette on narrative time. Richardson highlights essential feminist essays by Nancy K. Miller on plot and plausibility, Rachel Blau Duplessis on closure, and Susan Winnett on narrative and desire. These are complimented by newer pieces by Susan Stanford Friedman on spatialization and Robyn Warhol on serial fiction. Other major contributions include Edward Said on beginnings, Hayden White on historical narrative, Peter Brooks on plot, Paul Ricoeur on time, D. A. Miller on closure, James Phelan on progression, and Jacques Derrida on the frame. Recent essays from the perspective of cultural studies, postmodernism, and artificial intelligence bring this collection right up to the present.

unnatural narrative.

*Engagements with Narrative* Open Book Publishers

Narrative theory is essential to everything from history to lyric poetry, from novels to the latest Hollywood blockbuster. Narrative theory explores how stories work and how we make them work. This Companion is both an introduction and a contribution to the field. It presents narrative theory as an approach to understanding all kinds of cultural production: from literary texts to historiography, from film and videogames to philosophical discourse. It takes the long historical view, outlines essential concepts, and reflects on the way narrative forms connect with and rework social forms. The volume analyzes central premises, identifies narrative theory's feminist foundations, and elaborates its significance to queer theory and issues of race. The specially commissioned essays are exciting to read, uniting accessibility and rigor, traditional concerns with a renovated sense of the field as a whole, and analytical clarity with stylistic dash. Topical and substantial, *The Cambridge Companion to Narrative Theory* is an engaging resource on a key contemporary concept.

*Somebody Telling Somebody Else* John Benjamins Publishing

Argues that digital media allows us to see unresolved tensions, ambiguities, and gaps in core narrative concepts, revealing complexity and unexplored potential.

**The Cambridge Companion to Narrative Theory** Routledge  
Balancing key foundational topics with new developments and trends, *Engagements with Narrative* offers an accessible introduction to narratology. As new narrative forms and media emerge, the study of narrative and the ways people communicate through imagination, empathy, and storytelling is especially relevant for students of literature today. Janine Utell presents the foundational texts, key concepts, and big ideas that form narrative theory and practical criticism, engaging readers in the study of stories by telling the story of a field and its development. Distinct features designed to initiate dialogue and debate include: Coverage of philosophical and historical contexts surrounding the study of narrative An introduction to essential thinkers along with the tools to both use and interrogate their work A survey of the most up-to-date currents, including mind theory and postmodern ethics, to stimulate conversations about how we read fiction, life writing, film, and digital media from a variety of perspectives. A selection of narrative texts, chosen to demonstrate critical practice and spark further reading and research "Engagement" sections to encourage students to engage with narrative theory and practice through interviews with scholars This guide teaches the key concepts of narrative—time, space, character, perspective, setting—while facilitating conversations among different approaches and media, and opening paths to new inquiry. *Engagements with Narrative* is ideal for readers needing an introduction to the field, as well as for those seeking insight into both its historical developments and new directions.

**Narrative in Culture** Theory Interpretation Narrativ

The last two decades have seen a burst of renewed interest in narrative theory across many academic disciplines as scholars analyze the power of storytelling in print and other media. *Teaching Narrative Theory* provides a comprehensive resource for instructors who aim to help students identify and understand the distinctive features of narrativity in a text or discourse and make use of the terms and concepts of the field. This volume in the *Options for Teaching* series is organized to assist teachers at different levels of instruction and in different disciplinary settings. In twenty-one essays, the contributors discuss narrative theory's various teaching contexts (e.g., classes on literature, creative writing, and folklore and ethnography); key concepts and terms (e.g., story and plot, time and space, voice, perspective);

applications beyond printed texts (e.g., film and digital media); and impact on other areas of theory (e.g., gender and ethnic studies). A glossary provides a guide to the challenging technical terminology characteristic of the field, and the volume as a whole emphasizes the importance of understanding and implementing technical terms in learning narrative theory.

*Narrative Beginnings* Theory Interpretation Narrativ

Offering an interdisciplinary approach to narrative, this book investigates storyworlds and minds in narratives across media, from literature to digital games and reality TV, from online sadomasochism to oral history databases, and from horror to hallucinations. It addresses two core questions of contemporary narrative theory, inspired by recent cognitive-scientific developments: what kind of a construction is a storyworld, and what kind of mental functioning can be embedded in it? Minds and worlds become essential facets of making sense and interpreting narratives as the book asks how story-internal minds relate to the mind external to the storyworld, that is, the mind processing the story. With essays from social scientists, literary scholars, linguists, and scholars from interactive media studies answering these topical questions, the collection brings diverse disciplines into dialogue, providing new openings for genuinely transdisciplinary narrative theory. The wide-ranging selection of materials analyzed in the book promotes knowledge on the latest forms of cultural and social meaning-making through narrative, necessary for navigating the contemporary, mediatized cultural landscape. The combination of theoretical reflection and empirical analysis makes this book an invaluable resource for scholars and advanced students in fields including literary studies, social sciences, art, media, and communication.

*Basic Elements of Narrative* Routledge

*Narrative Theory* offers an introduction to the field's critical and philosophical approaches towards narrative throughout history.

*Disputable Core* Cambridge University Press

This concise and highly accessible textbook outlines the principles and techniques of storytelling. It is intended as a high-school and college-level introduction to the central concepts of narrative theory - concepts that will aid students in developing their competence not only in analysing and interpreting short stories and novels, but also in writing them. This textbook prioritises clarity over intricacy of theory, equipping its readers with the necessary tools to embark on further study of literature, literary theory and creative writing. Building on a 'semiotic model of narrative,' it is structured around the key elements of narratological theory, with chapters on plot, setting, characterisation, and narration, as well as on language and theme - elements which are underrepresented in existing textbooks on narrative theory. The chapter on language constitutes essential reading for those students unfamiliar with rhetoric, while the chapter on theme draws together significant perspectives from contemporary critical theory (including feminism and postcolonialism). This textbook is engaging and easily navigable, with key concepts highlighted and clearly explained, both in the text and in a full glossary located at the end of the book. Throughout the textbook the reader is aided by diagrams, images, quotes from prominent theorists, and instructive examples from classical and popular short stories and novels (such as Jane Austen's *Pride and Prejudice*, Franz Kafka's 'The Metamorphosis,' J. K. Rowling's *Harry Potter*, or Dostoyevsky's *The Brothers Karamazov*, amongst many others). *Prose Fiction: An Introduction to the Semiotics of Narrative* can either be incorporated as the main textbook into a wider syllabus on narrative theory and creative writing, or it can be used as a supplementary reference book for readers interested in narrative fiction. The textbook is a must-read for beginning students of

narratology, especially those with no or limited prior experience in this area. It is of especial relevance to English and Humanities major students in Asia, for whom it was conceived and written.

*Developing Narrative Theory* U of Nebraska Press

Narrative is one of the ways we organise and understand the world. It is found everywhere: not only in films and books, but also in everyday conversations and in the nonfictional discourses of journalists, historians, educators, psychologists, attorneys and many others. Edward Branigan presents a telling exploration of the basic concepts of narrative theory and its relation to film - and literary - analysis, bringing together theories from linguistics and cognitive science, and applying them to the screen.

Individual analyses of classical narratives form the basis of a complex study of every aspect of filmic fiction exploring, for example, subjectivity in *Lady in the Lake*, multiplicity in *Letter from an Unknown Woman*, post-modernism and documentary in *Sans Soleil*.

*The Cambridge Companion to Narrative Theory* U of Nebraska Press

This title looks at the contemporary need to study life narratives, considers the emergence and salience of life narratives in contemporary culture, and discusses different forms of narrativity.

*A Poetics of Unnatural Narrative* Routledge

George Eliot wrote that "man cannot do without the make-believe of a beginning." Beginnings, it turns out, can be quite unusual, complex, and deceptive. The first major volume to focus on this critical but neglected topic, this collection brings together theoretical studies and critical analyses of beginnings in a wide range of narrative works spanning several centuries and genres. The international and interdisciplinary scope of these essays, representing every major theoretical perspective--including feminist, cognitive, postcolonial, postmodern, rhetorical, ethnic, narratological, and hypertext.

*Narrative Theory* Taylor & Francis

The collection showcases new research in the field of cultural and historical narratology. Starting from the premise of the 'semantisation of narrative forms' (A. Nünning), it explores the cultural situatedness and historical transformations of narrative, with contributors developing new perspectives on key concepts of cultural and historical narratology, such as unreliable narration and multiperspectivity. The volume introduces original approaches to the study of narrative in culture, highlighting its pivotal role for attention, memory, and resilience studies, and for the imagination of crises, the Anthropocene, and the Post-Apocalypse. Addressing both fictional and non-fictional narratives, individual essays analyze the narrative-making and unmaking of Europe, Brexit, and the Postcolonial. Finally, the collection features new research on narrative in media culture, looking at the narrative logic of graphic novels, picture books, and newsmidia.

*Teaching Narrative Theory* Routledge

The present volume is a contribution to the theory of narrative by scholars from various disciplines, mainly scholars from Comparative Literature but also contributors from Philosophy, Psychology and the languages. The essays focus on central terms and concepts in narrative theory over the last forty years. Established narratological concepts, such as narrative, narrator, story, fiction, character, narrative (un)reliability and point of view, but also relational concepts motivated by the expansion of narratology, such as narrative and non-verbal media, narrative and personal identity and narrative and literary genre, are themes dealt with. In addition to presenting a critical examination of the core concepts of narrative theory, the volume is a demonstration of the vigour of contemporary Nordic narrative theory. The authors work at universities in Denmark, Estonia, Finland, Norway and Sweden, and they all belong to the Nordic Network of Narrative Studies.

*Narrative as Rhetoric* Cornell University Press

*Somebody Telling Somebody Else* proposes a paradigm shift for

narrative theory, contending that a view of narrative as a rhetorical action offers greater explanatory power than the standard view of narrative as a synthesis of story and discourse. James Phelan explores the consequences of this proposal for the interpretation of a wide range of narratives, from Jane Austen's *Pride and Prejudice* to Ian McEwan's *Enduring Love*.

Prose Fiction Routledge

*Narrative Theory: Core Concepts and Critical Debates* addresses two frequently asked questions about narrative studies: "what is narrative theory?" and "how do different approaches to narrative relate to each other?" The co-authors explore the scope and aims of narrative from four distinct perspectives: rhetorical, feminist, mind-oriented, and unnatural. As they discuss the relation of the approaches to each other, they highlight significant current debates and map out key developments in the field.

Prose Fiction: An Introduction to the Semiotics of Narrative Ohio State University Press

This book introduces Root Narrative Theory, a new approach for narrative analysis, decoding moral politics, and for building respect and understanding in conditions of radical disagreement.

This theory of moral politics bridges emotion and reason, and, rather than relying on what people say, it helps both the analyst and the practitioner to focus on what people mean in a language that parties to the conflict understand. Based on a simple idea—the legacy effects of abuses of power—the book argues that conflicts only endure and escalate where there is a clash of interpretations about the history of institutional power. Providing theoretically complex but easy-to-use tools, this book offers a completely new way to think about storytelling, the effects of abusive power on interpretation, the relationship between power and conceptions of justice, and the origins and substance of ultimate values. By locating the source of radical disagreement in story structures and political history rather than in biological or cognitive systems, Root Narrative Theory bridges the divides between reason and emotion, realism and idealism, without losing sight of the inescapable human element at work in the world's most devastating conflicts. This book will be of much interest to students of conflict resolution, peace studies and International Relations, as well as to practitioners of conflict resolution.
