GRIFFITH BRYNN

Computer Fundamentals & Programming in C Weidenfeld & Nicolson

Computer Fundamentals and Programming in C is designed to serve as a textbook for the undergraduate students of engineering, computer science, computer applications, and information technology. The book seeks to provide a thorough overview of all the fundamental concepts related to computer science and programming. It lays down the foundation for all the

advanced courses that a student is expected to learn in the following semesters.

The Art Forger's Handbook OUP India

The English artist Eric Hebborn (1934-1996) explains the secrets of his forging techniques in this illustrated work compiled shortly before his death. Drawings previously attributed to artists such as Picasso and Corot were in fact the work of Hebborn and this work provides an insight through explanations of his work. Inks, papers, pigments, monograms and signatures are all explained as well as Hebborn's own often outrageous speculations about the nature of art and value.
