Historical Perspectives ABC-CLIO

An instant New York Times bestseller!

Disney's The Owl House meets

Nevermoor, in a brilliant new adventure from Claribel A. Ortega! Every year, in the magical town of Ravenskill,

Witchlings who participate in the Black Moon Ceremony are placed into covens and come into their powers as full-

fledged witches. And twelve-year-old Seven Salazar can't wait to be placed in the most powerful coven with her best friend! But on the night of the ceremony,

in front of the entire town, Seven isn't placed in one of the five covens. She's a Spare! Spare covens have fewer witches, are less powerful, and are looked down on by everyone. Even worse, when Seven and the other two Spares perform the magic circle to seal their coven and cement themselves as sisters, it doesn't work! They're stuck as Witchlings—and will lose their magic. Seven invokes her only option: the impossible task. The three Spares will be assigned an impossible task: If they work together and succeed at it, their coven will be sealed and they'll gain their full powers. If they fail... Well, the last coven to make the attempt ended up being turned into toads. Forever. But maybe friendship can be the most powerful magic of all... With action-packed adventure, a coven of quirky witchlings, Claribel A. Ortega's signature humor, and girl-power vibes, you won't be able to put down this

middle grade Latine witch story, perfect for fans of Amari and the Night Brothers or Harry Potter.

And so, armed with some spells and a lot of camping equipment Miranda, along with her daughters Kai and Viva, embark on an adventure. The only question is will they manage to find the giant waterfall where Richard's cheeky grandson lives and return with a cuddly pet for Kai?

Examines the realities of unexplained natural phenomenon and provides explanations that push the boundaries of science. • Looks at animal telepathy and the ability of pigeons to home. • Proves the point that "big questions don't need big science". • Noted scientist Rupert Sheldrake is a former research fellow of the Royal Society. • New Edition with an Update on Results. How does your pet "know" when you are coming home? How do pigeons "home"? Can people really feel a "phantom" amputated arm? These questions and more form the basis of Sheldrake's look at the world of contemporary science as he puts some of the most cherished assumptions of established science to the test. What Sheldrake discovers is that certain scientific beliefs are so widely taken for granted that they are no longer regarded as theories but are seen as scientific common sense. In the true spirit of science, Sheldrake examines seven of these beliefs. Refusing to let intellectual dogmatism influence his search for the truth, Sheldrake presents simple experiments that allow the curious and the skeptical to join in his journey of discovery. His experiments look at how scientific research is often biased against unexpected patterns that emerge and how a researcher's expectations can influence the results. He also examines the taboo of taking pets seriously and explores the question of human extrasensory perception.

Perhaps most important, he questions the notion that science must be expensive in order to achieve important results, showing that inexpensive methods can indeed shake the very foundations of science as we know it. In this compelling and intelligent book, Sheldrake offers no preconceived wisdom or easy answers--just an open invitation to explore the unknown, create new science, and perhaps, even change the world.

Glamorous Madame Olympia performs the terrifying *Symphony of Death* and conjures up a thousand plague-bearing rats. The magic of gentle Belladonna, the white witch, goes hopelessly wrong. How to Improve Your Animal's Quality of Life Рипол Классик

From bestselling author of *She's Not There*, New York Times opinion columnist, and human rights activist Jennifer Finney Boylan, *Good Boy: My Life in Seven Dogs*, a memoir of the transformative power of loving dogs. This is a book about dogs: the love we have for them, and the way that love helps us understand the people we have been. It's in the love of dogs, and my

love for them, that I can best now take the measure of the child I once was, and the bottomless, unfathomable desires that once haunted me. There are times when it is hard for me to fully remember that love, which was once so fragile, and so fierce. Sometimes it seems to fade before me, like breath on a mirror. But I remember the dogs. In her New York Times opinion column, Jennifer Finney Boylan wrote about her relationship with her beloved dog Indigo, and her wise, funny, heartbreaking piece went viral. In *Good Boy*, Boylan explores what should be the simplest topic in the world, but never is: finding and giving love. *Good Boy* is a universal account of a remarkable story: showing how a young boy became a middle-aged woman—accompanied at seven crucial moments of growth and transformation by seven memorable dogs. “Everything I know about love,” she writes, “I learned from dogs.” Their love enables us to pull off what seem like impossible feats: to find our way home when we are lost, to live our lives with humor and courage, and above all, to best become our true selves.

The year is 10,515 AD. The Hyades Armada, traveling at near lightspeed, will reach Earth in just four centuries to assess humanity's value as slaves. For the last 8,000 years, two opposing factions have labored to meet the alien threat in very different ways. One of them is Ximen del Azarchel, immortal leader of the mutineers from the starship Hermetic and self-appointed Master of the World, who has allowed his followers to tamper continuously with the evolutionary destiny of Man, creating one bizarre race after another in an apparent search for a species the Hyades will find worthy of conquest. The other is Menelaus Montrose, the posthuman Judge of Ages, whose cryonic Tombs beneath the surface of Earth have preserved survivors from each epoch created by the Hermeticists. Montrose intends to thwart the alien invaders any way he can, and to remain alive long enough to be reunited with his bride Rania, who is on a seventy-millennia journey to confront the Hyades' masters, tens of thousands of light-years away. Now, with the countdown to the Hyades' arrival nearing its end, del Azarchel and Montrose square off for what is to be their final showdown for the fate of Earth, a battle of gunfire and cliometric calculus; powered armor and posthuman intelligence. Judge of Ages is the wildly inventive third volume in a series exploring future history and human evolution from John C. Wright. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Some pairings are just meant to be: peanut butter and chocolate, yin and yang, Fred Astaire and Ginger Rogers. So it was only a matter of time before the stars in the universe lined up and suggested the collaboration between New York Times best selling author Bradley Trevor Greive and award-winning photographer Rachael Hale. Teaming up on their first collaborative effort, Greive and Hale explain once and for all Why Dogs Are Better Than Cats. Now, before all you cat lovers find your fur standing on end, Greive is quick to stress that he is simply "prodog, not anticat. The purpose of this book is not to criticize cats or their owners, but to champion the many exceptional virtues unique to dogs." What are these unique attributes that make canine companions superior to their feline fiends? (Oops, we meant friends.) Consider the following: Put simply: * Dogs are social. Cats are sociopaths. * Dogs match up to people. People must match up to cats. * Dogs teach us patience. Cats test our patience. * Dogs give and give. Cats are the gift that keeps on grifting. The bottom line is this: Dogs want love. Cats want fish. Although Greive admits that there is something to be said for "soft, warm, and sleepy" (a.k.a. cats) as captured in Hale's cuddly feline photographs, he concludes that dogs would be the only ones with character enough to admit this fact, thereby once again positioning themselves as the

superior pet, confidant, admirer, and friend.

Which Witch? AMK

Between 1645-7, John Stearne led the most significant outbreak of witch-hunting in England. As accusations of witchcraft spread across East Anglia, Stearne and Matthew Hopkins were enlisted by villagers to identify and eradicate witches. After the trials finally subsided in 1648, Stearne wrote his only publication, A confirmation and discovery of witchcraft, but it had a limited readership. Consequently, Stearne and his work fell into obscurity until the 1800s, and were greatly overshadowed by Hopkins and his text. This book is the first study which analyses Stearne's publication and contextualises his ideas within early modern intellectual cultures of religion,

demonology, gender, science, and print in order to better understand the witch-finder's beliefs and motives. The book argues that Stearne was a key player in the trials, that he was not a mainstream 'puritan', and that his witch-finding availed from contemporary science. It traces A confirmation's reception history from 1648 to modern day and argues

that the lack of research focusing on Stearne has resulted in misrepresentations of the witch-finder in the historiography of witchcraft. This book redresses the imbalance and seeks to provide an alternative reading of the East Anglian witch-hunt and of England's premier witch-hunter, John Stearne.
