Thoroughly updated to cover world affairs through 2012, this survey text explores relations among states and the influence of transnational actors and events. Applying a broad range of theoretical perspectives to show readers how to analyze current events, *International Relations* offers the best tools for understanding what is happening in the world today.

Disease Control Priorities, Third Edition (Volume 6) SUNY Press

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

A comprehensive history of the relationship between Africa and the United States Toyin Falola and Raphael Njoku reexamine the history of the relationship between Africa and the United States from the dawn of the trans-Atlantic slave trade to the present. Their broad, interdisciplinary book follows the relationship's evolution, tracking African American emancipation, the rise of African diasporas in the Americas, the Back-to-Africa movement, the founding of Sierra Leone and Liberia, the presence of American missionaries in Africa, the development of blues and jazz music, the presidency of Barack Obama, and more.

[International Relations Theory and the End of the Cold War](#) Routledge

This dynamic and comprehensive text from nationally renowned scholars continues to demonstrate the profound influence African Americans have had -- and continue to have -- on American politics. Through the use of two interrelated themes -- the idea of universal freedom and the concept of minority-majority coalitions -- the text demonstrates how the presence of Africans in the United States affected the founding of the Republic and its political institutions and processes. The authors show that through the quest for their own freedom in the United States, African Americans have universalized and expanded the freedoms of all Americans. New to the Eighth Edition A new co-author, Sherri L. Wallace, is renowned for her teaching, scholarship, and participation in APSA's American government textbook assessment for coverage of race, ethnicity, and gender. She is the perfect addition following an election year that included female presidential candidates as well as candidates of color and issues focusing on racial tension and inequality. Offers a new Media Integration Guide for the first time. Provides the first overall assessment of the Obama administration in relation to domestic and foreign policy and racial politics in particular. Updated through the 2016 elections, connecting the Obama years with the new administration. Looks at candidates Hillary Clinton and Ben Carson in particular in relation to the themes of the book. Adds a new section on State Politics and Elections. Includes new sections on intersectionality dealing with issues of race, gender and sexuality; LGBT issues as another manifestation of the struggle for universal freedom; a discussion of the "Black Lives Matter" movement; and a new section focusing on the changing character of black ethnicity as result of increased immigration from Africa and the Caribbean. Discusses the way in which race contributed to the polarization of American politics; the connections to the Tea Party; and the Obama Presidency and the 2016 presidential campaign as the most polarized since the advent of polling. Previews the impact of the Trump Administration on matters of race and ethnicity.

Non-State Actors in Conflicts: Conspiracies, Myths, and Practices explores some of the most pressing topics in political science and media studies. The contributions gathered here provide alternative perspectives on various non-state actors and their functions in global politics, in addition to providing case studies and theoretical approaches towards non-state actors, such as armed non-state actors and international non-governmental organizations. The volume also covers the topic of conspiracy theories and conspiracies formed in relation to the functions and existence of these actors.

[War and Gender](#) Addison-Wesley Longman

This clear and concise text introduces the theoretical frameworks that form the foundation of international relations. Using levels of analysis as the primary unifying force, Kaufman also assesses what traditional approaches can't explain about the contemporary international system.

Gender roles are nowhere more prominent than in war. Yet contentious debates, and the scattering of scholarship across academic disciplines, have obscured understanding of how gender affects war and vice versa. In this authoritative and lively review of our state of knowledge, Joshua Goldstein assesses the possible explanations for the near-total exclusion of women from combat forces, through history and across cultures. Topics covered include the history of women who did fight and fought well, the complex role of testosterone in men's social behaviours, and the construction of masculinity and femininity in the shadow of war. Goldstein concludes that killing in war does not come naturally for either gender, and that gender norms often shape men, women, and children to the needs of the war system. Illustrated with photographs, drawings, and graphics, and drawing from scholarship spanning six academic disciplines, this book provides a unique study of a fascinating issue.

Life is full of tough calls and daunting decisions. The question isn't if you'll face a big decision in the future, but how you'll face the tough call that's guaranteed to come your way. Think about it. There are wedding proposals to ponder, college applications to submit, career moves to make, homes to sell, and confrontations to consider. And, knowing how poorly things could go, we sometimes find ourselves facing these decisions with a deep fear of future regret. The pressure is on. Or is it? Short and straightforward, yet full of practical insight and spiritual truths, *Tough Call*, will help you see that the Christian faith offers a mindset to confidently and joyfully make your next big decision. More importantly you'll see that you can face life with your fears recognized, your peace maximized, and your hope anchored in something greater than your ability to "get it right." Readers familiar with authors like Acuff, Chan, and Tchividjian will resonate with Matt Popovits's witty, practical, and gospel-centered take on complicated topics. *Tough Call* is an enjoyable and essential read for any and all facing a major decision.

This book is an unparalleled resource on neurologic emergencies. Most books on neurologic emergencies focus on treatment of a disease after it is diagnosed (such as stroke, subarachnoid hemorrhage, or meningitis). There are but a few books that focus on how to evaluate the patient with a neurologic symptom, before the diagnosis is made. This is the area that frontline providers, including emergency physicians, family physicians, primary care physicians, hospitalists, urgent care physicians, and midlevel providers struggle with. This book is written by clinicians with a clear

understanding of the needs of non-neurologists in the front lines of medicine. The editors are board-certified emergency physicians with fellowship training and expertise in neurologic emergencies. Neurologic Emergencies includes these point-of-care-friendly features: Extensive number of

algorithms for distinct presenting symptoms Classic neuroimaging findings A concise bullet on what information needs to be conveyed to consultants Reference to relevant national guidelines where applicable Common chapter format to facilitate quick look-up
