comes the first book in the Wildwood Chronicles, the New York Times bestselling fantasy adventure series by Colin Meloy, lead singer of the Decemberists, and Carson Ellis, acclaimed illustrator of The Mysterious Benedict Society. In Wildwood, Prue and her friend Curtis uncover a secret world in the midst of violent upheaval—a world full of warring creatures,

peaceable mystics, and powerful figures with the darkest intentions. And what begins as a rescue mission becomes something much greater as the two friends find themselves entwined in a struggle for the very freedom of this wilderness. A wilderness the locals call Wildwood. Wildwood captivates readers with the wonder and thrill of a secret world within the

landscape of a modern city. It feels at once firmly steeped in the classics of children's literature and completely fresh at the same time. The story is told from multiple points of view, and the book features more than eighty illustrations, including six full-color plates, making this an absolutely gorgeous object. Supports the Common Core State Standards [The Art of Kubo and the Two Strings](#)

<p>Ranch Dog Entertainment, LLC Hunting Laika Breeds of Russia By: Vladimir Beregovoy All hunting Laika breeds originated out of primitive aboriginal dogs of the peoples of northeastern Europe and Siberia. Vladimir Beregovoy proposes a concept of primitive aboriginal dogs (www.laikabreeds.com). In modern times, any aboriginal dog of the Old World, once adopted by a</p>	<p>kennel club, becomes subject to change by “tender loving care,” restricted freedom, and breeding in isolation to standards invented by experts from dog shows. General trends Beregovoy notices are reduction of natural variation, enhancing “trademarks” of the breed, and exaggeration of certain features perceived as beautiful. Behavior and traits needed</p>	<p>in hunting, such as agility, stamina, and physiology, are never seen by dog judges. Maria G. Dmitrieva-Sulima, the first expert in Russian Laikas, lived and worked during the dawn of dog shows in Russia (late nineteenth to the early twentieth century). She was very skeptical on the value of showing without testing at hunting. Now, over 100 years later, Beregovoy’s</p>
--	---	---

opinion on this matter is the same.

The Art of The Boxtrols

Candlewick Press
Animals have been an influential part of science, technology, and travel throughout time. Laika: The 1st Dog in Space introduces readers to the historical climate of the 1920s through 1950s, background on Laika, a chronology of Laika's trip into space, and how that mission influenced

history.
Colorful graphic art, diagrams of rockets, history on the Space Race, fast facts, and a glossary will bring the historic mission to a younger audience. A great supplement to your history graphic novel collection.
First Hero in Outer Space
BoD - Books on Demand
Set in the Cold War, *Losing Laika* is the story of Petr  Konradtovych Kravets, who arrives on the scene of a downed

American U-2 spy plane on May Day 1960 to retrieve its camera. An experienced optics technician, Petr 's work for the Ministry of Military Aeronautics carries on his father's legacy of defending the Motherland, his father having been killed in World War II. Covering a half century, *Losing Laika* lets readers follow--through the eyes of a Soviet Everyman--the lives of Petr ,

his family, and others across the backdrop of the Cold War with its international space race, Cuban missile crisis, commonplace air raids, and much more. *Pigs Might Fly* Space Doc Media Llc Laika was the abandoned puppy destined to become Earth's first space traveler. This is her journey. Nick Abadzis masterfully blends fiction and fact in the intertwined stories of three compelling

lives. Along with Laika, there is Korolev, once a political prisoner, now a driven engineer at the top of the Soviet space program, and Yelena, the lab technician responsible for Laika's health and life. This intense triangle is rendered with the pitch-perfect emotionality of classics like *Winn Dixie*, *Shiloh*, and *Old Yeller*. Abadzis gives life to a pivotal moment in modern

history, casting light on the hidden moments of deep humanity behind history. Laika's story will speak straight to your heart. Laika is the winner of the 2008 Eisner Award for Best Publication for Teens and an Eisner Award nominee for Best Reality-Based Work. [Laika the Astronaut](#) Laika In the magical time between night and day, when both the sun and the moon are in the sky, a

child is born in a little blue house on a hill. And Miu Lan is not just any child, but one who can change into any shape they can imagine. The only problem is they can't decide what to be: A boy or a girl? A bird or a fish? A flower or a shooting star? At school, though, they must endure inquisitive looks and difficult questions from the other children, and they have trouble finding friends who will accept

them for who they are. But they find comfort in the loving arms of their mother, who always offers them the same loving refrain: "whatever you dream of / i believe you can be / from the stars in the sky to the fish in the sea." In this captivating, beautifully imagined picture book about gender, identity, and the acceptance of the differences between us, Miu Lan faces many questions

about who they are and who they may be. But one thing's for sure: no matter what this child becomes, their mother will love them just the same. Kai Cheng Thom is a writer, performance artist, and psychotherapist in Toronto. Her first poetry book, a Place Called No Homeland, was published in 2017. Kai Yun Ching is a community-based organizer, educator, and illustrator in Montreal. Wai-

Yant Li is a ceramics artist and illustrator in Montreal. *For Laika* Harper Collins In a quaint New England town with a history of witches and pilgrims, misunderstood eleven-year-old Norman Babcock can see and talk to ghosts. No one believes him, of course- everyone just thinks he's weird (including his parents). But when a folktale of a witch who cursed her accusers turns out to be true,

it's up to Norman to save the town from pilgrim zombies! He'll also have to take on a very angry witch, an annoying sidekick, his boy-crazy teenage sister, and dozens of moronic grown-ups who get in his way. This young ghoul whisperer finds his paranormal talents pushed to their otherworldly limits in this hilarious and spooky adventure! Featuring gorgeous black-and-

white interior illustrations and a story beyond what you'll see in the film, this novel is sure to delight! *First Hero in Outer Space* arsenal pulp press Laika began her life as a stray dog on the streets of Moscow and died in 1957 aboard the Soviet satellite Sputnik II. Initially the USSR reported that Laika, the first animal to orbit the earth, had survived in space for seven days, providing valuable data

that would make future manned space flight possible. People believed that Laika died a painless death as her oxygen ran out. Only in recent decades has the real story become public: Laika died after only a few hours in orbit when her capsule overheated. Laika's Window positions Laika as a long overdue hero for leading the way to human space exploration. Kurt Caswell examines Laika's life

and death and the speculation surrounding both. Profiling the scientists behind Sputnik II, he studies the political climate driven by the Cold War and the Space Race that expedited the satellite's development. Through this intimate portrait of Laika, we begin to understand what the dog experienced in the days and hours before the launch, what she likely experienced during her last

moments, and what her flight means to history and to humanity. While a few of the other space dog flights rival Laika's in endurance and technological advancements, Caswell argues that Laika's flight serves as a tipping point in space exploration "beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has

never recovered.” Examining the depth of human empathy—wh at we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos, and how politics and marketing can influence it—Laika’s Windowis also about our search to overcome loneliness and the role animals play in our drive to look far beyond the earth for answers.

Laika Chronicle Books The 1950s were a turbulent time in history as the United States and the Soviet Union were in a frenetic race to reconnoiter the frontier of space. By 1957 the Soviets had jettisoned Sputnik II, carrying the first-ever living being to go to space-- Laika. Laika, the genesis of space exploration, symbolized not only the zenith of pertinacity but the

engenderment of curiosity into actualization.S o many children today still turn their heads towards the stars and beyond, and their inquisitive nature is pivotal in their ebullient curiosity. Their questions need to be answered, so that one day they will answer questions we never thought to ask. And who better for them to ask than the dog who went to space in the first place?

The creative design of the book introduces Laika to the audience through jocular dialogue embellished by furtive delineations of spaceships, spacesuits, Laika herself, and much more. The children in the storyline ask insightful questions about gravity, the atmosphere, lunar craters, and why we can't breathe in space. Laika answers them through detailed explanations

sure to provoke more questions. Ultimately, the book reminds the kids to keep looking towards the stars, and that they will change the world. Moreover, it reminds those of us living in today's world that there is meaning to be found not only in our lives but beyond. **Laika** ABDO Publishing Company A Vermont family doctor, aerospace medical research scientist, USAF flight surgeon, and former

NASA scientist-astronaut (NASA Group 4--1965) Graveline looks back on his extraordinary life and achievements. [A Soviet Historical Novel](#) Macmillan By two of the co-authors of the acclaimed children's book *From the Stars in the Sky to the Fish in the Sea*: the moving beautifully told story of Laika, the dog who learned the names of the stars. Laika is an orphaned

stray dog who lives in the streets of Moscow in the then Soviet Union. Although she is loved by her pack, Laika longs one day to learn the names of the stars, since she knows that all dogs become stars when they die—including her parents. One day, a Russian scientist named Vlad offers Laika the chance to travel to the stars by helping him with an important experiment, an event that

will change the entire world. Part fable, part dog story, part history lesson, young and older readers alike will find themselves captivated by Laika's brave and loving heart, and by her story, which holds important lessons about world peace, science, and the deep bonds between humans and every other creature with whom we share the planet. Ages 3 to 8. The First Space

Explorer
Capstone Classroom Grandpa and his grandson Matthew share their worries and overcome their grief together when Grandpa's dog becomes sick and dies.

Dorrance Publishing From LAIKA, the Academy Award®-nominated studio behind Coraline, ParaNorman, and The Boxtrolls, comes a new adventure set in a mythical ancient Japan. In Kubo and the Two Strings, scruffy, kind-hearted Kubo cares devotedly for his mother while eking out a humble living in their sleepy shoreside

village. But when a spirit from the past appears, Kubo suddenly finds himself entwined in a violent struggle against gods and monsters. This fully illustrated book offers a behind-the-scenes view of the amazingly detailed artwork and unique stop-motion animation style involved in the film's creation.

Alien Ambush

BoD - Books on Demand For everything there is a season... Captain Liz

<p>Laika and crew have a new assignment: escorting the Mother Love's Traveling Intergalactic Troupe on their galactic tour. The final stop is where Liz started her career, Epsilon Violet, a lush, forested</p>	<p>planet with multiple research stations, and the scrappy captain looks forward to reconnecting with her old boss. But when the first troupe performance ends with a prop phaser</p>	<p>that is actually quite deadly, all plans go off the rails. Now Liz is investigating an accident that may not be that accidental. Can she keep her crew and friends safe when even more goes wrong?</p>
