*Histories of Nationalism beyond Europe* Springer Nature

The author, Um'Khone Patrick Habamenshi, was appointed Minister of Agriculture in Rwanda in October 2003, two days after his thirty-fifth birthday. It started as a dream but rapidly became a nightmare marked by constant threats, insults, and unfounded accusations. He resigned in May 2005 and sought refuge in the Canadian Embassy in Kigali. The following year was a slow downward spiral to the same hell that decimated Rwanda in 1994, a hell of injustice and senseless persecution. The experience left him broken beyond words. He was left with the demons and ghosts of his broken country and with tortured experiences that would surely destroy him if he succumbed to them. Rwanda, Where Souls Turn to Dust is the remarkable story of his healing path to rebuilding his mind, body and spirit. He had to move away from the negative things that had been dominating his life, the loss of his loved ones, and the loss of his previous dreams. He rebuilt his life from the ashes of his old life in Rwanda, a life free of hatred, free of prejudice, and free of fears.

A history of the Oromo peoples of Ethiopia; their culture, religion and political institutions.

*Black Athena* "O'Reilly Media, Inc."

In this bold study of modern ethno-regional nationalism, the author examines the divergent paths taken by the nationalist insurgencies in Tigray and Eritrea. The author argues that Tigrayans, south of the Mereb River, and Kebessa (highlands) Eritreans, north of the Mereb, are ethnically one people, tied by common history, political economy, myth, language and religion. Both fought against a common enemy, an oppressive Amhara ethnic state, for a period of seventeen and thirty years, respectively. In the process of the armed struggle, however, each evolved separate political identities and, after jointly marching to military victory in 1991, they followed separate political paths - Eritreans created the newest state in Africa and Tigrayans

remained within the Ethiopian body politic.

The Malaga Symposia Series provides an international forum for scientific debate on the progress made in research into karst environments. The 2010 meeting of the 4th International ISKA presents 80 papers in four key areas: karst hydrogeology and investigations, karst landscape and ecosystems, human interaction with karst environments, and engineering geology in karst areas. This book will be a useful edition to the libraries of consultants, scientists, lecturers, and policy makers concerned with the special issues of karst terrains.

This extended treatment of insurgent fragmentation provides an innovative new theory tested through analysis of the Horn of Africa's civil wars.

Livelihood and Landscape Change in Africa: Future Trajectories for Improved Well-Being under a Changing Climate James Currey

The Anthropology of Parliaments offers a fresh, comparative approach to analysing parliaments and democratic politics, drawing together rare ethnographic work by anthropologists and politics scholars from around the world. Crewe's insights deepen our understanding of the complexity of political institutions. She reveals how elected politicians navigate relationships by forging alliances and thwarting opponents; how parliamentary buildings are constructed as sites of work, debate and the nation in miniature; and how politicians and officials engage with hierarchies, continuity and change. This book also proposes how to study parliaments through an anthropological lens while in conversation with other disciplines. The dive into ethnographies from across Africa, the Americas, Asia, Europe, the Middle East and the Pacific Region demolishes hackneyed geo-political categories and culminates in a new comparative theory about the contradictions in everyday political work. This important book will be of interest to anyone studying parliaments but especially those in the disciplines of anthropology and sociology; politics, legal and development studies; and international relations.

How old is Ethiopian cuisine and the unique way of eating it?

Ethiopians proudly say their cuisine goes back 3,000 to 5,000 years. Archaeologists and historians now believe it emerged in the first millennium A.D. in Aksum, an ancient kingdom that occupied what's now the northern region of Ethiopia and the southern region of neighboring Eritrea. But regardless of when Ethiopians began to eat spicy wots atop the spongy flatbread injera, or when they first drank the intoxicating honey wine called tej, their cuisine remains unique in the world. Mesob Across America: Ethiopian Food in the U.S.A. brings together what respected scholars and passionate Ethiopians know and believe about this delectable cuisine. From the ingredients of the Ethiopian kitchen the foods, the spices, and the ways of combining them to a close-up look at the cuisines history and culture, Mesob Across America is both comprehensive and anecdotal. Explore the history of how restaurant communities emerged in the U.S., and visit them as they exist today. Learn how to prepare a five-course Ethiopian meal, including homemade tej. And solve the mystery of when Ethiopian food made its debut in America which was not when most Ethiopians think it did.

The 1991 government change in Ethiopia ushered in a centralised system of governance, aimed to bring about harmony and cooperation between different groups and to promote local self-rule. It has proceeded in two phases: 1991-2001 centred on creating and powering National/Regional Governments, termed mid-level decentralisation. Further powers were devolved in 2001 through the District Level Decentralization Program and Urban Management Program. This volume brings together studies by the Forum for Social Studies and others, with the aim of identifying knowledge gaps for further research and to generate debate on the issues in Ethiopia. The study is in two parts: a literature review seeking to document existing studies and highlight research gaps; and field work which involved a rapid assessment of eight weredas and two kifle ketemas in Addis Ababa. The other three studies are synopses of master theses submitted to the Institute of Regional and Local Development Studies of Addis

Ababa University.

*Cultivating Dynamic Educators: Case Studies in Teacher Behavior Change in Africa and Asia* responds to growing recognition by international education professionals, policy makers, and funding partners of the need for qualified teachers and interest in the subject of teacher professional development (also referred to as "teacher behavior change"). The book responds to important questions that are fundamental to improving teaching quality by influencing teaching practice. These questions include: How do we provide high-quality training at scale? How do we ensure that training transfers to change in practice? What methods are most cost-effective? How do we know what works? The book includes case studies describing different approaches to teacher behavior change and illustrates how specific implementation choices were made for each context. Individual chapters document lessons learned as well as methodologies used for discerning lessons. The key conclusion is that no single effort is enough on its own; teacher behavior change requires a system-wide view and concerted, coordinated inputs from a range of stakeholders.

From 1974 to its overthrow in 1991, a state socialist government ruled Ethiopia. This interdisciplinary collection of 15 papers examines a range of issues from during that period and during the aftermath of the government's overthrow. The main purpose of the collection seems to be an effort to begin the process of understanding Ethiopia's social, political, and economic realities through field-based studies, as such studies were near impossible during the regime's rule and in the immediate after math of its overthrow. Issues of memory and identity, control of space through garrison towns, political visibility, religious and ethnic relations, and gender politics are discussed. College Korean offers a comprehensive introduction to the Korean language designed for American students. Rogers, You, and

Richards have used their many years of teaching to devise and test an approach that balances reading and writing with the spoken language. The result is a well-rounded textbook suited to a yearlong course in which students learn to conduct conversations about their own lives and interests, read texts written in hangul, and write simple compositions. The book systematically introduces basic Korean grammar, a contextualized vocabulary, and styles of speech that are sociolinguistically appropriate for college students. Each of its 26 lessons contains a dialogue or a reading, practice patterns, relevant grammar notes, and exercises. Approximately 150 Sino-Korean characters are also introduced, and complete glossaries and grammar indexes are provided.

A groundbreaking book about the history and principles of Ethiopic (Ge'ez), an African writing system designed as a meaningful and graphic representation of a wide range of knowledge.

**Cultivating Dynamic Educators** The Red Sea Press  
 Focusing on the issue of the Oromo national struggle for liberation, statehood, and democracy, this book critically examines the dialectical relationship between Ethiopian colonialism and Oromo culture, epistemology, politics, and ideology in the context of the accumulated collective grievances of the Oromo nation. Specifically, the book identifies chains of sociological and historical factors that facilitated the development of Oromummaa (Oromo nationalism) and the Oromo national movement. It demonstrates how the Oromo national movement has been challenging and transforming Ethiopian imperial politics, tracks the different forms and phases of the movement, and maps out its future direction. Currently, the Oromo are the largest ethno-national group and political minority in the Ethiopian Empire. They were colonized and incorporated into Ethiopia as colonial subjects in the last decades of the 19th century through the alliance of Abyssinian/Ethiopian colonialism and European imperialism. Since their colonization, the Oromo people have been treated as second-class citizens and have been economically exploited and culturally and politically suppressed. Despite the fact that Oromo resistance to Ethiopian colonialism existed during the process of their colonization and subjugation, it

was only in the 1960s and 1970s that Oromo nationalists initiated organized efforts to liberate their people. Presently, Oromo nationalism plays a central role in Ethiopian politics.

This edited collection explores varying shapes of nationalism in different regional and historical settings in order to analyse the important role that nationalism has played in shaping the contemporary world. Taking a global approach, the collection includes case studies from the Middle East, Africa, Asia and North America. Unique not only in its wide range of geographically diverse case studies, this book is also innovative due to its comparative approach that combines different perspectives on how nations have been understood and how they came into being, highlighting the transnational connections between various countries. The authors examine what is meant by the concepts of 'nation' and 'national identity,' discussing themes such as citizenship, ethnicity, historical symbols and the role of elites. By exploring these entangled categories of nationalism, the authors argue that throughout history, elites have created 'artificial' versions of nationalism through symbolism and mythology, which has led to nationalism being understood through social constructivist or primordialist lenses. This diverse collection will appeal to researchers studying nationalism, including historians, political scientists and anthropologists.

The ongoing Egyptian-Ethiopian dispute over the Nile waters is potentially one of the most difficult issues on the current international agenda, central to the very life of the two countries. Analyzing the context of the dispute across a span of more than a thousand years, *The Cross and the River* delves into the heart of both countries' identities and cultures. Erlich deftly weaves together three themes: the political relationship between successive Ethiopian and Egyptian regimes; the complex connection between the Christian churches in the two countries; and the influence of the Nile river system on Ethiopian and Egyptian definitions of national identity and mutual perceptions of the Other. Drawing on a vast range of sources, his study is key to an understanding of a bond built on both interdependence and

conflict.

From apple pie to baklava, cannoli to gulab jamun, sweet treats have universal appeal in countries around the world. This encyclopedia provides a comprehensive look at global dessert culture. Few things represent a culture as well as food. Because sweets are universal foods, they are the perfect basis for a comparative study of the intersection of history, geography, social class, religion, politics, and other key aspects of life. With that in mind, this encyclopedia surveys nearly 100 countries, examining their characteristic sweet treats from an anthropological perspective. It offers historical context on what sweets are popular where and why and emphasizes the cross-cultural insights those sweets present. The reference opens with an overview of general trends in desserts and sweet treats. Entries organized by country and region describe cultural attributes of local desserts, how and when sweets are enjoyed, and any ingredients that are iconic. Several popular desserts are discussed within each entry including information on their history, their importance, and regional/cultural variations on preparation.

An appendix of recipes provides instructions on how to make many of the dishes, whether for school projects or general entertaining.

Refugees have rarely been studied by economists. Despite some pioneering research on the economic lives of refugees, there remains a lack of theory and empirical data through which to understand, and build upon, refugees' own engagement with markets. Yet, understanding these economic systems may hold the key to rethinking our entire approach to refugee assistance. If we can improve our knowledge of the resource allocation systems that shape refugees' lives and opportunities, then we may be able to understand the mechanisms through which these market-based systems can be made to work better and turn humanitarian challenges into sustainable opportunities. This book adopts an inter-disciplinary approach, based on original qualitative and quantitative data on the economic life of refugees, in order to begin to build theory on the economic lives of refugees. It focuses on the case of Uganda because it represents a relatively positive case. Unlike other governments in the region, it has taken the

positive step to allow refugees the right to work and a significant degree of freedom of movement through its so-called 'Self-Reliance Strategy'. This allows a unique opportunity to explore what is possible when refugees have basic economic freedoms. The book shows that refugees have complex and varied economic lives, often being highly entrepreneurial and connected to the global economy. The implications are simple but profound: far from being an inevitable burden, refugees have the capacity to help themselves and contribute to their host societies - if we let them
