Cod A Biography Of The Fish That Changed The World

Downloaded from db.mwpai.edu by guest

KIMBERLY MOHAMMAD

Cotton Penguin

Mark Kurlansky's first global food history since the bestselling *Cod and Salt*; the fascinating cultural, economic, and culinary story of milk and all things dairy—with recipes throughout. According to the Greek creation myth, we are so much spilt milk; a splatter of the goddess Hera's breast milk became our galaxy, the Milky Way. But while mother's milk may be the essence of nourishment, it is the milk of other mammals that humans have cultivated ever since the domestication of animals more than 10,000 years ago, originally as a source of cheese, yogurt, kefir, and all manner of edible innovations that rendered lactose digestible, and then, when genetic mutation made some of us lactose-tolerant, milk itself. Before the industrial revolution, it was common for families to keep dairy cows and produce their own milk. But during the nineteenth century mass production and urbanization made milk safety a leading issue of the day, with milk-borne illnesses a common cause of death. Pasteurization slowly became a legislative matter. And today milk is a test case in the most pressing issues in food politics, from industrial farming and animal rights to GMOs, the locavore movement, and advocates for raw milk, who controversially reject pasteurization. Profoundly intertwined with human civilization, milk has a compelling and a surprisingly global story to tell, and historian Mark Kurlansky is the perfect person to tell it. Tracing the liquid's diverse history from antiquity to the present, he details its curious and crucial role in cultural evolution, religion, nutrition, politics, and economics.

Edible Stories W. W. Norton & Company

"Before prehistoric humans began to cultivate grain, they had three main methods of acquiring food: hunting, gathering, and fishing. Hunting and gathering are no longer economically important, having been replaced by their domesticated equivalents, ranching and farming. But fishing, humanity's last major source of food from the wild, has grown into a worldwide industry on which we have never been more dependent. In this history of fishing—not as sport but as sustenance—archaeologist and writer Brian Fagan argues that fishing rivaled agriculture in its importance to civilization. [He] tours archaeological sites worldwide to show ... how fishing fed the development of cities, empires, and ultimately the modern world"—Jacket flaps.

Fosse Turtleback Books

Even before the Pilgrims landed in 1620, Cape Cod and its islands promised paradise to visitors, both native and European. In Paul Schneider's sure hands, the story of this waterland created by

glaciers and refined by storms and tides -- and of its varied inhabitants -- becomes an irresistible biography of a place. Cape Cod's Great Beach, Martha's Vineyard, and Nantucket are romantic stops on Schneider's roughly chronological human and natural history. His book is a lucid and compelling collage of seaside ecology, Indians and colonists, religion and revolution, shipwrecks and hurricanes, whalers and vengeful sperm whales, glorious clipper ships and today's beautiful but threatened beaches. Schneider's superb eye for story and detail illuminates both history and landscape. A wonderful introduction, it will also appeal to the millions of people who already have warm associations with these magical places.

Beyond Biometry: Holistic Views of Biological Structure

The Basque History of the World University of Chicago Press
 In the tradition of Mark Kurlansky's *Cod and Salt*, this endlessly revealing book reminds us that the fiber we think of as ordinary is the world's most powerful cash crop, and that it has shaped the destiny of nations. Ranging from its domestication 5,500 years ago to its influence in creating Calvin Klein's empire and the Gap, Stephen Yafa's *Cotton* gives us an intimate look at the plant that fooled Columbus into thinking he'd reached India, that helped start the Industrial Revolution as well as the American Civil War, and that made at least one bug—the boll weevil—world famous. A sweeping chronicle of ingenuity, greed, conflict, and opportunism, *Cotton* offers "a barrage of fascinating information" (Los Angeles Times).

The Big House Harper Collins

A comprehensive handbook, covering all aspects of the Atlantic cod including the biology, ecology, life histories, behaviour, commercial exploitation and conservation Not only is Atlantic cod one of the most valuable food fish in the world's oceans, it is an important component of North Atlantic ecosystems and has been subject to much research into its biology, ecology and exploitation. After hundreds of years of exploitation, overfishing in the last half of the 20th Century caused many stocks to collapse, most famously the Northern cod stock off Newfoundland and Labrador, Canada. Since then, most cod stocks have been better researched and managed, but remain in a variety of states, from fully recovered to continued decline. This book, written by world experts, describes that research and management, and the importance of cod and its fisheries on North Atlantic cultures and economies, with impacts well beyond the range of the species. *Atlantic Cod: Bio-Ecology of the Fish* offers insightful chapter coverage of cod nomenclature, taxonomy, phylogeny and morphology; physiology and ecophysiology; reproduction and spawning behavior; early life history and pre-recruitment processes; migrations, movements and stock identity; feeding,

growth and energetics; the place of cod in the ecosystem; the exploitation of cod through history and present day commercial fisheries and precautionary management for sustainable fisheries; impacts of climate change on cod biology and ecology; and the future of the species and its fisheries. Discusses the major commercial importance of Atlantic cod through history Provides a comprehensive treatment of the bio-ecology of the most researched and highly exploited fully marine species Examines how the decline (and recovery) of cod stocks is of great political and scientific interest An essential purchase for marine fisheries scientists *Atlantic Cod: Bio-Ecology of the Fish* is a vital book for all fisheries scientists, managers and fish biologists.

A Chosen Few Scholastic Inc.

All-new stories about the food we share, love, and fight over from the national bestselling author of *Cod and Salt*. In these linked stories, Mark Kurlansky reveals the bond that can hold people together, tear them apart, or make them become vegan: food. Through muffins or hot dogs, an indigenous Alaskan fish soup, a bean curd Thanksgiving turkey or potentially toxic crème brûlée, a rotating cast of characters learns how to honor the past, how to realize you're not in love with someone any more, and how to forgive. These women and men meet and eat and love, leave and drink and in the end, come together in Seattle as they are as inextricably linked with each other as they are with the food they eat and the wine they drink. Kurlansky brings a keen eye and unerring sense of humanity to these stories. And throughout, his love and knowledge of food shows just how important a role what we eat plays in our lives.

A History of the World in 6 Glasses Vintage Canada

The Cod. Wars have been fought over it, revolutions have been triggered by it, national diets have been based on it, economies and livelihoods have depended on it.

Cod Penguin

The internationally bestselling author says if we can save the salmon, we can save the world

Swordfish Haymarket Books

The classic nature memoir of Cape Cod in the early twentieth century, "written with simplicity, sympathy, and beauty" (New York Herald Tribune). When Henry Beston returned home from World War I, he sought refuge and healing at a house on the outer beach of Cape Cod. He was so taken by the natural beauty of his surroundings that his two-week stay extended into a yearlong solitary adventure. He spent his time trying to capture in words the wonders of the magical landscape he found himself in thrall to. In *The Outermost House*, Beston chronicles his experiences observing the migrations of seabirds, the rhythms of the tide, the windblown dunes, and the scatter of stars in the changing summer sky. Beston argued: "The world today is sick to its thin

blood for the lack of elemental things, for fire before the hands, for water, for air, for the dear earth itself underfoot." Nearly a century after publication, Beston's words are more true than ever.

Milk! Bloomsbury Publishing USA

For use in schools and libraries only. The story of the only rock we eat, including its origin, the other discoveries made because of it, and tales of salt and the people who have been involved with it through the ages.

Cape Cod Ballantine Books

A city of tropical heat, ramshackle beauty, and its very own cadence—a city that always surprises—Havana is brought to pulsing life by New York Times bestselling author Mark Kurlansky. Award-winning author Mark Kurlansky presents an insider's view of Havana: the elegant, tattered city he has come to know over more than thirty years. Part cultural history, part travelogue, with recipes, historic engravings, photographs, and Kurlansky's own pen-and-ink drawings throughout, Havana celebrates the city's singular music, literature, baseball, and food; its five centuries of outstanding, neglected architecture; and its extraordinary blend of cultures. Like all great cities, Havana has a rich history that informs the vibrant place it is today—from the native Taino to Columbus's landing, from Cuba's status as a U.S. protectorate to Batista's dictatorship and Castro's revolution, from Soviet presence to the welcoming of capitalist tourism. Havana is a place of extremes: a beautifully restored colonial city whose cobblestone streets pass through areas that have not been painted or repaired since long before the revolution. Kurlansky shows Havana through the eyes of Cuban writers, such as Alejo Carpentier and José Martí, and foreigners, including Graham Greene and Hemingway. He introduces us to Cuban baseball and its highly opinionated fans; the city's music scene, alive with the rhythm of son; its culinary legacy. Through Mark Kurlansky's multilayered and electrifying portrait, the long-elusive city of Havana comes stirring to life.

Choice Cuts Cosimo, Inc.

"Magisterial and glorious" (Pittsburgh Post-Gazette), the first full authoritative biography of Dorothy Day—American icon, radical pacifist, Catholic convert, and advocate for the homeless—is "a vivid account of her political and religious development" (Karen Armstrong, *The New York Times*). After growing up in a conservative middle-class Republican household and working several years as a left-wing journalist, Dorothy Day converted to Catholicism and became an anomaly in American life for the next fifty years. As an orthodox Catholic, political radical, and a rebel who courted controversy, she attracted three generations of admirers. A believer in civil disobedience, Day went to jail several times protesting the nuclear arms race. She was critical of capitalism and US foreign policy, and as skeptical of modern liberalism as political conservatism. Her protests began in 1917, leading to her arrest during the suffrage demonstration outside President Wilson's White House. In 1940 she spoke in Congress against the draft and urged young men not to register. She told audiences in 1962 that the US was as much to blame for the Cuban missile crisis as Cuba and the USSR. She refused to hear any criticism of the pope, though she sparred with American bishops and priests who lived in well-appointed rectories while tolerating racial segregation in their parishes. Dorothy Day is the exceptional biography of a dedicated modern-day pacifist, an outspoken advocate for the poor, and a lifelong anarchist. This definitive and insightful account is "a monumental exploration of the life, legacy, and spirituality of the Catholic activist" (Spirituality & Practice).

1968 Houghton Mifflin Harcourt

Wars have been fought over it, revolutions have been spurred by it, national diets have been based on it, economies have

depended on it, and the settlement of North America was driven by it. Cod, it turns out, is the reason Europeans set sail across the Atlantic, and it is the only reason they could. What did the Vikings eat in icy Greenland and on the five expeditions to America recorded in the Icelandic sagas? Cod -- frozen and dried in the frosty air, then broken into pieces and eaten like hardtack. What was the staple of the medieval diet? Cod again, sold salted by the Basques, an enigmatic people with a mysterious, unlimited supply of cod. Cod is a charming tour of history with all its economic forces laid bare and a fish story embellished with great gastronomic detail. It is also a tragic tale of environmental failure, of depleted fishing stocks where once the cod's numbers were legendary. In this deceptively whimsical biography of a fish, Mark Kurlansky brings a thousand years of human civilization into captivating focus.

I Am Troy Davis Hong Kong University Press

In 1895 Joshua Slocum set sail from Gloucester, Massachusetts, in the *Spray*, a thirty-seven-foot sloop. More than three years later, he became the first man to circumnavigate the globe solo, and his account of that voyage, *Sailing Alone Around the World*, made him internationally famous. But scandal soon followed, and a decade later, with his finances failing, he set off alone once more—never to be seen again. In this definitive portrait of an icon of adventure, Geoffrey Wolff describes, with authority and admiration, a life that would see hurricanes, shipwrecks, pirate attacks, cholera, smallpox, and no shortage of personal tragedy.

The Big Oyster Random House

A POWERFUL, DEEPLY MOVING NARRATIVE OF HOPE REBORN IN THE SHADOW OF DESPAIR Fifty years after it was bombed to rubble, Berlin is once again a city in which Jews gather for the Passover seder. Paris and Antwerp have recently emerged as important new centers of Jewish culture. Small but proud Jewish communities are revitalizing the ancient centers of Budapest, Prague, and Amsterdam. These brave, determined Jewish men and women have chosen to settle—or remain—in Europe after the devastation of the Holocaust, but they have paid a price. Among the unexpected dangers, they have had to cope with an alarming resurgence of Nazism in Europe, the spread of Arab terrorism, and the impact of the Jewish state on European life. Delving into the intimate stories of European Jews from all walks of life, Kurlansky weaves together a vivid tapestry of individuals sustaining their traditions, and flourishing, in the shadow of history. An inspiring story of a tenacious people who have rebuilt their lives in the face of incomprehensible horror, *A Chosen Few* is a testament to cultural survival and a celebration of the deep bonds that endure between Jews and European civilization. "Consistently absorbing . . . A Chosen Few investigates the relatively uncharted territory of an encouraging phenomenon." —Los Angeles Times "I can think of no book that portrays with such intelligence, historical understanding, and journalistic flair what life has been like for Jews determined to build lives in Europe." —SUSAN MIRON Forward

Salt John Wiley & Sons

From the award-winning and bestselling author of *Cod* comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured – all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago – when the mysteries of salt were revealed by modern chemistry and geology – no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the

world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed *Cod*, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.

The Outermost House Henry Holt and Company

The winner of the Glenfiddich Best Food Book Award leads is on a dazzling culinary tour around the world and through history - from the fifth century BC to the present day. Presented by subject - including 'Food and Sex', 'Bread', 'Rants' and 'Dessert' - and illustrated with Kurlansky's own pen-and-ink drawings as well as classic photographs, this wonderful collection, like the very best meal, is varied, delicious and uniquely satisfying.

The Story of Salt Simon and Schuster

From the New York Times best-selling author of *Cod* and *Salt*, a definitive history of paper and the astonishing ways it has shaped today's world. Paper is one of the simplest and most essential pieces of human technology. For the past two millennia, the ability to produce it in ever more efficient ways has supported the proliferation of literacy, media, religion, education, commerce, and art; it has formed the foundation of civilizations, promoting revolutions and restoring stability. By tracing paper's evolution from antiquity to the present, with an emphasis on the contributions made in Asia and the Middle East, Mark Kurlansky challenges common assumptions about technology's influence, affirming that paper is here to stay. Paper will be the commodity history that guides us forward in the twenty-first century and illuminates our times.

Salmon Vintage

AN INSTANT NEW YORK TIMES BESTSELLER The "lively" (*The New Yorker*), "convincing" (*Forbes*), and "riveting pick-me-up we all need right now" (*People*) that proves humanity thrives in a crisis and that our innate kindness and cooperation have been the greatest factors in our long-term success as a species. If there is one belief that has united the left and the right, psychologists and philosophers, ancient thinkers and modern ones, it is the tacit assumption that humans are bad. It's a notion that drives newspaper headlines and guides the laws that shape our lives. From Machiavelli to Hobbes, Freud to Pinker, the roots of this belief have sunk deep into Western thought. Human beings, we're taught, are by nature selfish and governed primarily by self-interest. But what if it isn't true? International bestseller Rutger Bregman provides new perspective on the past 200,000 years of human history, setting out to prove that we are hardwired for kindness, geared toward cooperation rather than competition, and more inclined to trust rather than distrust one another. In fact this instinct has a firm evolutionary basis going back to the beginning of *Homo sapiens*. From the real-life Lord of the Flies to the solidarity in the aftermath of the Blitz, the hidden flaws in the Stanford prison experiment to the true story of twin brothers on opposite sides who helped Mandela end apartheid, Bregman shows us that believing in human generosity and collaboration isn't merely optimistic—it's realistic. Moreover, it has huge implications for how society functions. When we think the worst of people, it brings out the worst in our politics and economics. But if we believe in the reality of humanity's kindness and altruism, it will form the foundation for achieving true change in society, a case that Bregman makes convincingly with his signature wit, refreshing frankness, and memorable storytelling. "The Sapiens of 2020." —*The Guardian* "Humankind made me see humanity from a fresh perspective." —Yuval Noah Harari, author of the #1 bestseller *Sapiens* Longlisted for the 2021 Andrew Carnegie Medal for Excellence in Nonfiction One of the Washington Post's 50 Notable Nonfiction Works in 2020
