ATKINSON BRENDEN

Resolving the Dilemmas
of Ethical Living American
Bar Association

Argues that human
freedom is threatened by
systems of intelligent
persuasion developed by
tech giants who compete
for our time and attention.
This title is also available
as Open Access.

Closing of the American Mind

Nursesbooks.org
A Best Book of 2021 by
Bloomberg BusinessWeek,
Time, and The
Washington Post The
bestselling author of
Leonardo da Vinci and
Steve Jobs returns with a
“compelling” (The
Washington Post) account
of how Nobel Prize winner
Jennifer Doudna and her
colleagues launched a
revolution that will allow
us to cure diseases, fend
off viruses, and have
healthier babies. When
Jennifer Doudna was in
sixth grade, she came
home one day to find that
her dad had left a
paperback titled *The
Double Helix* on her bed.
She put it aside, thinking

it was one of those
detective tales she loved.
When she read it on a
rainy Saturday, she
discovered she was right,
in a way. As she sped
through the pages, she
became enthralled by the
intense drama behind the
competition to discover
the code of life. Even
though her high school
counselor told her girls
didn’t become scientists,
she decided she would.
Driven by a passion to
understand how nature
works and to turn
discoveries into
inventions, she would
help to make what the
book’s author, James
Watson, told her was the
most important biological
advance since his
codiscovery of the
structure of DNA. She and
her collaborators turned a
curiosity of nature into an
invention that will
transform the human
race: an easy-to-use tool
that can edit DNA. Known
as CRISPR, it opened a
brave new world of
medical miracles and
moral questions. The
development of CRISPR
and the race to create
vaccines for coronavirus
will hasten our transition
to the next great
innovation revolution. The
past half-century has

been a digital age, based
on the microchip,
computer, and internet.
Now we are entering a
life-science revolution.

Children who study digital
coding will be joined by
those who study genetic
code. Should we use our
new evolution-hacking
powers to make us less
susceptible to viruses?
What a wonderful boon
that would be! And what
about preventing
depression?

Hmmm...Should we allow
parents, if they can afford
it, to enhance the height
or muscles or IQ of their
kids? After helping to
discover CRISPR, Doudna
became a leader in
wrestling with these moral
issues and, with her
collaborator Emmanuelle
Charpentier, won the
Nobel Prize in 2020. Her
story is an “enthraling
detective story” (Oprah
Daily) that involves the
most profound wonders of
nature, from the origins of
life to the future of our
species.

*Fundamental Readings in
Ethics and Contemporary
Moral Problems* USCCB
Publishing

What does pleasure have
to do with morality? What
role, if any, should
intuition have in the
formation of moral

theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the

International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

An Introduction Crown
"A compact yet thorough collection of readings in ethical theory and contemporary moral problems - at the best price"--

Would You Kill the Fat Man? Routledge
#1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't

resist-books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. "The kind of book that can be life-changing." —The New York Times "Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank." —USA Today DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF. *The Fundamentals of Ethics* Georgetown University Press Presents a groundbreaking investigation into the origins of morality at the core of religion and politics, offering scholarly insight into the motivations behind cultural clashes that are polarizing America. [A Mother, a Son, and a Journey of Transformation](#) Oxford University Press on Demand Living Ethics: An Introduction with Readings is an ideal all-in-

one resource for courses in introduction to ethics and contemporary moral problems. In this hybrid textbook/reader, Russ Shafer-Landau brings moral theory and contemporary moral issues to life with a comprehensive and balanced set of readings, uniquely engaging explanations, and clear analysis of arguments. The book balances coverage of moral reasoning (in Part 1) with highly relevant contemporary moral problems (in Part 2). *Ethics* Courier Corporation "A compact yet thorough collection of readings in ethical theory and contemporary moral problems - at the best price"--*Ethics for A-Level* Open Book Publishers Should we pay children to read books or to get good grades? Should we allow corporations to pay for the right to pollute the atmosphere? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars? Auctioning admission to elite universities? Selling citizenship to immigrants willing to pay? In *What Money Can't Buy*, Michael J. Sandel takes on one of

the biggest ethical questions of our time: Is there something wrong with a world in which everything is for sale? If so, how can we prevent market values from reaching into spheres of life where they don't belong? What are the moral limits of markets? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life—medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. Is this where we want to be? In his New York Times bestseller *Justice*, Sandel showed himself to be a master at illuminating, with clarity and verve, the hard moral questions we confront in our everyday lives. Now, in *What Money Can't Buy*, he provokes an essential discussion that we, in our market-driven age, need to have: What is the proper role of markets in a democratic society—and how can we protect the moral and civic goods that markets don't honor and that money can't buy? *Pathways to Health Equity* OUP Oxford

This collection of primary source materials covering the major themes of moral philosophy features forty-two classical and contemporary readings divided into four parts-- The Good Life, Normative Ethics, Metaethics, and Moral Problems.

Comprehensive yet concise, it introduces students to ethical theory and a wide range of moral issues.

Freedom and Resistance in the Attention Economy

Farrar, Straus and Giroux Pope John Paul II proclaims a sense of urgency in challenging moral darkness with the light of truth.

The Moral Limits of Markets Franciscan Media

In the twenty-first century the basic questions of ethics are no longer the abstract terms of ethical theory, but the concrete and burning issues related to the influence of life sciences, the impact of a globalized economy, and the consequences of present decisions for the future of humankind. *Ethics: The Fundamental Questions of Our Lives* analyzes twenty ethical issues that address education and culture, labor and economy, the environment and

sustainability, democracy and cosmopolitanism, peace and war, and life and death. Each chapter describes a concrete example showing the relevance of the fundamental ethical question, then provides an explanation of how one can think through possible responses and reactions. Huber emphasizes the connections between personal, professional, and institutional ethics and demonstrates how human relationships lie at the center of our ethical lives. His aim is to articulate a theology of what he calls "responsible freedom" that transcends individualistic self-realization and includes communal obligations.

The Righteous Mind
Simon and Schuster
Firmly established as the standard text for undergraduate courses in ethics, James Rachels and Stuart Rachels' *The Elements of Moral Philosophy* introduces readers to major moral concepts and theories through eloquent explanations and compelling, thought-provoking discussions.

What Money Can't Buy
National Academies Press
A runaway train is racing toward five men who are tied to the track. Unless

the train is stopped, it will inevitably kill all five men. You are standing on a footbridge looking down on the unfolding disaster. However, a fat man, a stranger, is standing next to you: if you push him off the bridge, he will topple onto the line and, although he will die, his chunky body will stop the train, saving five lives. Would you kill the fat man? The question may seem bizarre. But it's one variation of a puzzle that has baffled moral philosophers for almost half a century and that more recently has come to preoccupy neuroscientists, psychologists, and other thinkers as well. In this book, David Edmonds, coauthor of the best-selling Wittgenstein's *Poker*, tells the riveting story of why and how philosophers have struggled with this ethical dilemma, sometimes called the trolley problem. In the process, he provides an entertaining and informative tour through the history of moral philosophy. Most people feel it's wrong to kill the fat man. But why? After all, in taking one life you could save five. As Edmonds shows, answering the question is far more complex--and

important--than it first appears. In fact, how we answer it tells us a great deal about right and wrong.

An Introduction with Readings Oxford University Press on Demand
For Love of Animals is an honest and thoughtful look at our responsibility as Christians with respect to animals. Many Christians misunderstand both history and their own tradition in thinking about animals. They are joined by prominent secular thinkers who blame Christianity for the Western world's failure to seriously consider the moral status of nonhuman animals. This book explains how traditional Christian ideas and principles—like nonviolence, concern for the vulnerable, respect for life, stewardship of God's creation, and rejection of consumerism—require us to treat animals morally. Though this point of view is often thought of as liberal, the book cites several conservatives who are also concerned about animals. Camosy's Christian argument transcends secular politics. The book's starting point for a Christian position on animals—from the

creation story in Genesis to Jesus's eating habits in the Gospels—rests in Scripture. It then moves to explore the views of the Church Fathers, the teachings of the Catholic Church, and current discussions in both Catholic and Protestant theology. Ultimately, however, the book is concerned not with abstract ideas, but with how we should live our everyday lives. Should Christians eat meat? Is cooperation with factory farming evil? What sort of medical research on animals is justified? Camosy also asks difficult questions about hunting and pet ownership. This is an ideal resource for those who are interested in thinking about animals from the perspective of Christian ethics and the consistent ethic of life. Discussion questions at the end of each chapter and suggestions for further reading round out the usefulness of this important work.

Anthem McGraw-Hill Education

Enduringly profound treatise, whose lasting effect on Western philosophy continues to resonate. Aristotle identifies the goal of life as happiness and discusses its attainment

through the contemplation of philosophic truth. *Code of Ethics for Nurses with Interpretive Statements* The Ethical Life Fundamental Readings in Ethics and Contemporary Moral Problems

Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the

profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human

consequences.

Why Good People are Divided by Politics and Religion Oxford

University Press, USA
Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Communities in Action
Oxford University Press, USA

Contemporary Moral Issues is an anthology that provides a selection of readings on contemporary social issues revolving around three general themes: Matters of Life and Death, Matters of Equality and Diversity, and Expanding the Circle, which includes duties beyond borders, living together with

animals, and environmental ethics. The text contains a number of distinctive, high-profile readings and powerful narratives, including Jonathan Foer's "Eating Animals," Eva Feder Kittay's "On the Ethics of Selective Abortion for Disability," and Susan M. Wolf's "Confronting Assisted Suicide and Euthanasia: My Father's Death." Each set of readings is accompanied by an extensive introduction, a bibliographical essay, pre-reading questions, and discussion questions.

A Feminist Analysis of Social Life and Practice
Routledge

Presents a controversial history of violence which argues that today's world is the most peaceful time in human existence, drawing on psychological insights into intrinsic values that are causing people to condemn violence as an acceptable measure.
