Defenders in bridge base their strategy on declarer's bidding. Yet declarers often fail to return the compliment: they play without a thought of what the defenders have done. The problems in this book all contain situations where an astute declarer can listen to the bidding.

Declarer Play at Bridge: a Quizbook, by the same author team, was named the 2013 Book of the Year by the American Bridge Teachers' Association. Building on the success of that title, this book gives the improving player a chance to practice the principles on which sound bidding is based, from the opening bid onward. Is this book packed with all the best bidding conventions and instruction on how to apply them? Not at all! Instead, it explains the sound natural bidding methods that will allow you to play in the right suit (or notrump) at the correct level. Each of the fourteen

chapters begins with three or four pages of instruction, followed by several pages of multiple-choice bidding problems, illustrating everyday situations you will face countless times at the table. Book jacket.

In bridge, there are thousands of rules, guidelines, and understandings - but which are golden? Many players enjoy their game without knowing some of the most significant underlying facts about the game, making mistakes which ruin their scores. With some gentle and entertaining reading, all players can improve their game hugely, just by knowing the Golden Rules of Bridge. From thirty years of teaching and playing, Paul Mendelson presents a book containing what he considers are the

golden rules of bridge: the techniques and tips which occur most frequently and which provide the biggest edge against your opponents, and offer the biggest scoring advantages. He explains the thinking and logical reasoning behind each element - bidding, declarer play, defence - to ensure that readers remember and understand why they do what they do. These tips and techniques will transform your results and enjoyment of the game, whether you play social rubber bridge or Chicago, club teams events or duplicate pairs. If you play an Acol-based system or any of the many natural bidding systems available, knowing the Golden Rules will improve your score and frustrate your opponents, leaving you in the best spots and them with the tough decisions.

*Bridge* Sterling Publishing Company, Inc. Victor Mollo was justly famous for his satirical accounts of the antics of the Hideous Hog and the Rueful Rabbit, but he did produce a number of instructional books. This classic blend of instruction and entertainment is a combination of a textbook and a quizbook and its reissue is long overdue. Mollo presents 160 play problems of varying degrees of difficulty, from elementary technical plays in the first 50 problems to complicated endplays and scissors coups in the ten examples at the end of the book. Readers of all abilities will find the material challenging and certain to improve their game.

*Beginning Bridge* Master Point Press  
This e-book present some of the most important bridge bidding systems used

used in duplicate bridge tournaments, detailing the most known bridge bidding system, Standard American Yellow Card, by using a logical sequential order for openings, answers, competitive bids and defensive play in order to help the players during the games. Much of the complexity in bridge arises from the difficulty of arriving at a good final contract in the auction. A bidding system in contract bridge is the set of agreements and understandings assigned to calls and sequences of calls used by a partnership, and includes a full description of the meaning of each treatment and convention. Standard American Yellow Card is a specific set of partnership agreements and conventions, using Standard American as a base. Standard American Yellow

Card is a very specific collection of agreements, which can, of course, be modified and augmented by partnership agreement. In practical use, the term is often mis-used to refer to Standard American in general, or it could refer to a system that used SAYC as a base and made additional augmentations or changes to the base agreements.

Seagram and Bird's Planning the Play of a Bridge Hand was named Book of the Year in 2010 by the American Bridge

Teachers' Association. It introduced the basic principles of how to go about making a plan as declarer for beginning and improving players, and is a popular text for bridge teachers. This sequel extends the concept to more complex situations, and covers ideas such as safety plays, avoidance play, trump control, dummy reversal, and endplays. It will appeal to players who have a good grasp of the basics of declarer play, and are looking to improve from there. Book jacket.

Planning the Play ACBL Bridge Highly anticipated follow-up to the winner of the 2019 ABTA (American Bridge Teachers Association) Book of the Year Award! The latest installment of the Insights on Bridge series contains hundreds more carefully crafted mini-lessons designed to turn aspiring players into good players. The material in this book is devoted to situations and problems you will see at the table but are hard to find in books. Note From Mike Lawrence: AFTER WRITING OVER 25 books on bridge that discuss certain aspects of play, defense, system, or general bidding, I've begun a series of books aimed at turning aspiring players into good players. Note I don't say

expert players. That will be the next step. Bridge isn't a game where you can immerse yourself for six months and become a good player. There's just too much to learn. You have to start somewhere and then move in the right direction. Typically, when you start playing in a club, you feel lost. After you get your feet on the ground, you still recognize that you aren't moving very fast. Going forward requires that you get good guidance. Many players at your club will offer advice. Much of that advice, unfortunately, isn't very good. This series of books includes hundreds of mini-lessons, complete with insights and advice you can count on. The material is devoted to situations and problems you will see at the table but not in other books. This book (#2 in a

series) won't make you an expert. But these books will start you on the path to being a good player and a good partner. Enjoy the trip. Mike Lawrence
