Clearly organized and logically presented, this text provides the opportunity for outstanding discussions of critical issues. Harris and Sherblom effectively integrate real-world examples, hypothetical situations, social-science theories, and scholarly research into a unified discussion of small group and team communication. Extensive examples, case studies, and exercises engage students and help them move on from theoretical discussions into the application and experience of the concepts presented.

From the Publisher: With a focus on the individual group member, The Fundamentals of Small Group Communication encourages readers to reflect on how their communication behaviors and practices contribute to their current small group experiences. In this easy to read text, authors Scott A. Myers and Carolyn M. Anderson introduce students to the fundamental issues faced by all small groups, such as socialization, development, ethics, and diversity, and the procedures utilized by effective small groups. The book is organized around three overarching themes-characteristics of small group communication and the individual group member, the group task, and group member relationships. Each chapter opens with a case study and includes an "Ethically Speaking" box that allows readers to reflect on how ethics is central to the small group communication process. It is intended for undergraduate courses that introduce students to the basic fundamentals of small group communication.

#### **The Fundamentals of Small Group**

**Communication** Pearson Higher Ed  
The study of group communication has never been more critical, as recent national and international events point to the fragility of group life. An emerging perspective, the bona fide group perspective, offers hope for improving group communication, for it recognizes that any group--a family, community group, expedition team, social support group, organizational work group, interorganizational collaboration, or international team--must be studied and understood within the multiple contexts in which it is embedded and that significantly affects who is considered to be part of a group, what occurs within that group, and how that group interacts with other groups. In the second edition of his award-winning volume, editor Lawrence R. Frey showcases original research studies conducted on and about communication in bona fide groups, demonstrating the conceptual promise of the bona fide group perspective as realized in research practice. Divided into six sections, the chapters cover a wide range of new or relatively understudied groups--including youth community groups, Internet support

groups, climbing expedition groups, families, neighborhoods, and school boards--and demonstrate the wealth of methodological approaches that can be used to study bona fide group communication--including survey methods, interviews, textual analysis, content analysis, participant observation, and discourse analysis. *Group Communication in Context: Studies of Bona Fide Groups, Second Edition* shows that the bona fide group perspective has the power to transform our thinking about groups and group communication and, in time, the practices in which groups and group members engage. The volume is intended for use in group communication courses, as well as a reference for group scholars. It is also appropriate for classes in psychology, social work, counseling, sociology, anthropology, and related disciplines. *Small Group Communication* Pearson Previous editions ('Social Skills in Interpersonal Communication') have established this work as the standard textbook on communication. Directly relevant to a multiplicity of research areas and professions, this thoroughly revised

and updated edition has been expanded to include the latest research as well as a new chapter on negotiating. Key examples and summaries have been augmented to help contextualise the theory of skilled interpersonal communication in terms of its practical applications. Combining both clarity and a deep understanding of the subject matter, the authors have succeeded in creating a new edition which will be essential to anyone studying or working in the field of interpersonal communication.

"I enjoyed the book, learned a LOT, and LOVE her creativity in discussing different

examples that help group constructs some to life. It represents the breadth of the new Group Communication Division in NCA better than any book I have seen." —David Seibold, University of California, Santa Barbara "I can unequivocally state that the proposed text is LONG overdue! Over the years I have reviewed several text proposals. SunWolf's proposal ranks in the 99th percentile. . . . This is one of the most innovative, heuristic, pragmatic, and engaging proposals I have ever perused." —Jim L. Query, Jr., University of Houston "Peer Groups is different from the run-of-the-mill group text book. I can see that my students will learn so much more from Dr. SunWolf's orientation than they have from the other books I've used. The benefits are that the topics related to [students'] practical world and that there is so much to foster in-class discussion. Although many students are familiar with the 'work world,' they are not yet there. Dr. SunWolf provides them with what is relevant in their lives now!" —Audrey E. Kali, Framingham State College Clans, cliques, clubs, or classmates: Students of group communication should be encouraged to think critically about concepts to the

groups that matter to them most—peers. Peer Groups is the first textbook to explore group communication dynamics with this vital group. Drawing on a combination of traditional and new theories, Dr. SunWolf uses an inviting writing style, shares the words and provocative thinking of real world group members, and draws on research from social psychology, communication, and group dynamics. This innovative book offers suggestions for critical thinking and new behaviors in students' own peer groups and will inspire further exploration of small group dynamics. Features and Benefits Introduces students and researchers to cutting-edge cross-disciplinary thinking with new theories that explain group dynamics and member behaviors: Symbolic-Interpretive Perspective, Group Dialectics, Decisional Regret Theory, Social Comparison Theory, and the Bona Fide Group Perspective Examines the dynamics of real world peer groups: children's play groups, adolescence cliques, street gangs, elite hot task groups, and decision-making juries Generates readers' interest in studying group behaviors by drawing upon

students' personal experiences with groups Brings marginalized groups and ethnicities to the stage, from African American cowboys to multi-ethnic street gangs, including the painful issue of those left out of peer groups Offers a student-friendly reference guide with an extensive and easy-to-read table that summarizes group concepts and theories Guides classroom discussion, triggers critical thinking, and suggests useful written assignments and tools for break-out discussions with end-of-chapter sections Intended Audience This accessible and innovative text is designed for undergraduate students of Communication, Social Psychology, and Sociology. It is designed to supplement and partner with any current group textbook, as well as act as a stand-alone text. Dr. SunWolf is a scholar of unusual breadth and depth. She is a cross-disciplinary scholar in the fields of legal communication, persuasion, multicultural storytelling, social exclusion, and group decision making. Her national award-winning productivity in the past five years has been astonishing: the publication of five books, 22 journal articles or book

chapters, a published educational DVD, and serving on the editorial board of five journals. Dr. SunWolf broke new ground by publishing in a top journal a new theory of communication (Decisional Regret Theory), expanding the field of small group communication to include the study of childhood group processes, gathering data from 680 adolescents in the Bay Area, as well as being the first author in trial advocacy to devote sustained attention to jurors' religious beliefs and the role of empathy and compassion in jury deliberations.
