Introduced in 1961, the Gibson SG is Gibson's biggest-selling guitar of all time, and is synonymous with Angus Young (AC/DC lead guitarist), Tony Iommi (Black Sabbath) and Robby Krieger (The Doors). The SG was originally produced as a more easily manufactured 'mass-production' version of the Les Paul, sales of which were diminishing at the time, but the solid-bodied SG ('Solid Guitar') soon became a revered instrument in its own right. Superbly illustrated and designed, this manual includes case studies of key models - everything from a vintage SG 'Les Paul' to a 2011 SG 50th Anniversary model - but also gives appropriate attention to today's affordable Epiphone versions, Specials, Juniors and Melody Makers.

Excerpt: The Gibson Les Paul is a solid body electric guitar that was first sold in 1952. The Les Paul was designed by Ted McCarty in collaboration with popular guitarist Les Paul, whom Gibson enlisted to endorse the new model. It is one of the most well-known electric guitar types in the world, along with the Fender Stratocaster and Telecaster. The Gibson Les Paul was the result of a design collaboration between Gibson Guitar Corporation and the late jazz guitarist and electronics inventor Les Paul. In 1950, with the introduction of the Fender Telecaster to the musical market, electric guitars became a public craze. In reaction, Gibson Guitar president Ted McCarty brought guitarist Les Paul into the...

The original sunburst Gibson Les Paul - known as the 'Burst' - is the most celebrated electric guitar of all time. Manufactured at the end of the 50s, it was the instrument of choice for players such as Eric Clapton, Jimmy Page, and

Jeff Beck (left). Now, examples of the guitar are changing hands for high six-figure sums. Million Dollar Les Paul tells the story of these legendary instruments and explores why they have become so desirable. It seems only a matter of time before a Burst sells for a million dollars. By the time you read this book, in fact, it may already have happened. This book, by renowned guitar historian Tony Bacon, combines meticulous research with a series of new interviews with players, technicians, and collectors, including Billy Gibbons of ZZ Top and Mr. Les Paul himself. It takes readers on a fascinating journey from a factory in Kalamazoo, Michigan, through the British blues scene of the 60s, to the salerooms and concert stages of the present day.

A collectively authored work, although Carter, one of the contributors, is inexplicably given full credit for authorship on the title page and in the jacket copy and CIP (perhaps he's the editor). The history of Gibson guitars and the famous people who have played them is documented with abundant photos accompanied by explanatory text and captions. A splashy, flashy-looking book for the guitar and rock music enthusiast; over-exuberant page design makes for poor readability in some sections (e.g. text on top of not-quite-faded- enough maps). Published by General Publishing Group, 3100 Airport Ave., Santa Monica, CA 90403.

*50 Years of the Gibson Les Paul* Hal Leonard

"A hot-rod joy ride through mid-20th-century American history" (The New York Times Book Review), this one-of-a-kind narrative masterfully recreates the rivalry between the two men who innovated the electric guitar's amplified sound—Leo Fender and Les Paul—and their intense competition to convince rock stars like the Beatles, Jimi Hendrix, and Eric Clapton to play the instruments they built. In the years after World War II, music was evolving from big-band jazz into rock 'n' roll—and these louder styles demanded revolutionary instruments. When Leo Fender's tiny firm marketed the first solid-body electric guitar, the Esquire, musicians immediately saw its appeal. Not to be out-manuevered, Gibson, the largest guitar manufacturer, raced to build a competitive product. The company designed an "axe" that would make Fender's Esquire look cheap and convinced Les Paul—whose endorsement Leo Fender had sought—to put his name on it. Thus was born the guitar world's most heated rivalry: Gibson versus Fender, Les versus Leo. While Fender was a quiet, half-blind, self-taught radio repairman, Paul was a brilliant but headstrong pop star and guitarist who spent years toying with new musical technologies. Their contest turned into an arms race as the most inventive musicians of the 1950s and 1960s—including bluesman Muddy Waters, rocker Buddy Holly, the Beatles, Bob Dylan, and Eric Clapton—adopted

one maker's guitar or another. By 1969 it was clear that these new electric instruments had launched music into a radical new age, empowering artists with a vibrancy and volume never before attainable. In "an excellent dual portrait" (The Wall Street Journal), Ian S. Port tells the full story in *The Birth of Loud*, offering "spot-on human characterizations, and erotic paeans to the bodies of guitars" (The Atlantic). "The story of these instruments is the story of America in the postwar era: loud, cocky, brash, aggressively new" (The Washington Post).

**Commemorative Edition** Voyageur Press

(Book). The creation that would become Gibson's Les Paul guitar hit retail stores in 1952. This was Gibson's introduction to the solid body world of electric guitars. In the early 1950s, demand for electric guitars was reaching a new customer base. Rock 'n' roll was just around the corner and ready to explode. The timing

was right and Gibson took off with this idea and introduced other guitars to the Les Paul lineup. However, the new single cutaway Goldtop Les Paul Model spawned many changes in its six years of production. The wrap around and tune-o-matic bridge along with the humbucking pickup were Gibson firsts in the 1950s and still used to this day on their guitars. Early performers such as Les Paul, Freddie King, Carl Perkins and BB King can be seen in this book as early pioneers playing this model. Later years would bring a new barrage of guitarists such as David Gilmour, Paul McCartney, Les Dudek, Jeff Lynne, Danny Kirwan, Steve Hackett, Clem Clempson, Dickey Betts and more to the Les Paul Goldtop.
