"This new edition of Interplay reflects communication as it operates in today's world. At the same time, it emphasizes enduring principles and skills that are as important now as ever. It builds on the approach that has continually evolved to best serve students and professors over four decades. The accessible writing style presents even complicated ideas in a straightforward way. A variety of thought-

provoking images, sidebars, and interactive features help make the subject more compelling and relevant. Interplay cites more than 1,500 sources, nearly a third of which are new to this edition. These citations have a strong communication focus, as we continue to spotlight scholarship from our field.

Research and theory aren't presented for their own sake, but rather to explain how the process of interpersonal communication operates in everyday life"--

Interpersonal Communication, Fourth Edition, by Sarah Trenholm and Arthur Jensen interweaves current research and theory with the skills needed to communicate effectively in today's complex and diverse "global village." This

bestseller explains the principles and theoretical underpinnings of interpersonal communication while enriching readers' everyday interactions with new interpersonal skills. The authors' five-point model of communication competence focuses on the keys to becoming a better communicator. Introduced in the first chapter and employed throughout the book, this useful model emphasizes how communication constructs relationships and how relationships in turn encourage or constrain communication practices. Every chapter contains fascinating applications of communication practices. Drawn from anthropology,

ethnology, history, psychology, and popular culture, these applications illustrate how the information and skills needed for effective interpersonal communication can enrich people's enjoyment of most of life's activities.

This volume brings together leading investigators who integrate two distinct research domains in social psychology-- people's internal worlds and their close relationships. Contributors present compelling findings on the bidirectional interplay between internal processes, such as self-esteem and self-regulation, and relationship processes, such as how positively partners view each other, whether they are dependent on each other, and the level of excitement in the relationship.

Methodological challenges inherent in studying these complex issues are described in depth, as

are implications for understanding broader aspects of psychological functioning and well-being.
