 The procedures in this manual distill six years of learning about the most efficient acquisition and construction methods in this country for high volume production of housing affordable to low-income people. The people in the Rehab Work Group at The Enterprise Foundation have gathered this information first-hand and conveyed it in training workshops on production management throughout the country. Over 2000 participants in the workshops have included rehab specialists from city housing departments, construction managers of single and multifamily rehab projects, program managers from both nonprofit housing development organizations and city rehab departments, as well as students in colleges and universities. They are becoming the backbone of a new cadre of effective producers of affordable housing. In the 30 cities and several rural areas where we have both learned and applied these production management techniques, they have resulted in savings of 5, 10, even 25 percent of the cost of housing development. The Enterprise Foundation is a national, nonprofit organization that my wife Patty and I launched in 1982. The Foundation's mission is to see that all very low-income Americans have the opportunity for fit and affordable housing within a generation, and work their way up and out of poverty into the main stream of American life.

Survival in the Construction Business McGraw Hill Professional

Any project which involves an EPC contract is also likely to involve a number of other complicated contracts. The challenge of the parties to an EPC contract is not to try to eliminate risk but rather put into place a narrative structure that enables the parties to predict the contractual result that would obtain if a risk materializes. If the EPC contract does not allow the parties to determine the consequences of an unanticipated situation, they will have to look to an expert, mediator, tribunal, or court to impart guidance or pass judgment. The sample forms of contract contained in Volume 2 of Understanding and Negotiating EPC Contracts are intended to serve as a guide to demonstrate how risks and responsibilities can be allocated among project sponsors, EPC contractors and the various other parties that may be involved in a project. Collectively the sample forms in this volume offer an extraordinary resource that provides the benefit of lessons learned and priceless insight into any project being undertaken which can help assure the resilience of any EPC project.
