With all of the recent emphasis on "big data," analytics and visualization, and emerging technology architectures such as smartphone networks, social media, and cloud computing, the way we do business is undergoing rapid change. The right business model can create overnight sensations—think of Groupon, the iPad, or Facebook. At the same time, alternative models for organizing resources such as

home schooling, Linux, or Kenya's Ushihidi tool transcend conventional business designs. Timely and visionary, *Information, Technology, and the Future of Commerce* looks at how the latest technology trends and their impact on human behavior are impacting business practices from recruitment through marketing, supply chains, and customer service. Discusses information economics, human behavior, technology platforms, and other facts of contemporary life. Examines how humans organize resources and do work in the changing landscape. Provides case studies profiling how competitive advantage can be a direct result of innovative business models that exploit these trends. Revealing why traditional strategy formulation is challenged by the realities of the connected world, *Information, Technology, and the Future of Commerce* ties

technology to business and social environments in an approachable, informed manner with innovative, big-picture analysis of what's taking place now in information strategy and technology. *IT Consultant Diploma - City of London College of Economics - 12 months - 100% online / self-paced* Pearson Higher Education AU

On a warm September night in 2002, former acquaintances Alexis Maybank and Alexandra Wilkis reconnected at a mixer for new students at Harvard Business School. Alexis had just ended a four-year run at eBay during the dotcom boom and bust. Alexandra had just spent three years as an investment banker at Merrill Lynch. Now they were entering the country's top training ground for future titans of Wall Street and the Fortune 500. Little did either suspect that five years later, they'd become famous not in finance or consulting or corporate management, but at the bleeding-edge intersection of fashion and technology. Gilt Groupe - launched by Alexis, Alexandra, and three colleagues in 2007 - is one of the most fascinating startups of recent years, with a valuation of more than \$1 billion. And it all began with one bold idea: to bring sample sales online and change the way millions

shop. As Alexis and Alexandra write about the day Gilt.com went live: "We had created a website that could potentially change the rules of retail, for both shoppers and brands. If shopping was traditionally a slow, leisurely activity that might consume an entire day, it would now be competitive, addictive, urgent, thrilling—a rush delivered at the same time each day. Shopping would become not just easier, but so much fun." But turning that vision into reality wasn't easy. Designers had long controlled their own sample sales by staging them in anonymous, makeshift locations and strictly limiting invitations. Those lucky enough to hear about a Marc Jacobs or Hermès sample sale would drop everything and run for dramatic, fleeting bargains. Why should elite brands support a new startup trying to replicate the experience online? And even if brands like Valentino, Christian Louboutin, and Zac Posen got on board, would shoppers embrace such a website? Would the kind of people who love high-end fashion really visit a new online sale each day? Was "accessible luxury" a breakthrough idea or an absurd oxymoron? Alexis and Alexandra share their perspective in this dramatic story of Gilt's birth, rise, and evolution. They show how they juggled the conflicting needs of their suppliers, engineers, marketers, and potential investors. They explain how they blended their individual strengths and weaknesses and managed their rapidly growing team. They cover the growing pains of expanding into new categories like housewares, travel, and menswear. And they take us through the darkest moments of the recession when Gilt might easily have died. As you'll learn from the true story of Gilt, anything is possible for those with the creativity to recognize a new opportunity and the perseverance to make it real.

Management John Wiley & Sons Almost half of everything sold in America is listed at some kind of promotional price. People don't only want a deep discount, they expect it - and won't settle for anything less. In this playful, deeply researched book, journalist Mark Ellwood takes a trip into this new landscape. From the floor of upscale department store Serگرد Goodmān to the bustling aisles of a Turkish bazaar, from the outlet Disneyworld of rural Pennsylvania to a town in Florida that can claim to be couponing's spiritual capital, Ellwood shows how some people are, quite literally, born to be bargain junkies thanks to a quirk of their DNA. He also uncovers the dark side of discounting: the sales-driven sleights of hand that sellers employ to hoodwink unsuspecting buyers. Bargain Fever is a manual for thriving in this new era, when deal hunting has gone from being a sign of indigence to one of intelligence. There's never been a better time to be a buyer - at least if you know how the game works. 'This book is a bargain hunter's bible.' Michael Tonello, author of Bringing Home the Birkin 'Bargain Fever is just as fierce, funny, tenacious, and tantalizing as its author. I love this book.' Kelly Cutrone, founder, People's Revolution, and author of Normal Gets You Nowhere 'A book after my own heart. Bargain Fever lifts the veils off the sales, ensuring even more that you'll never pay retail again.' Carmen Wong Ulrich, financial contributor, CBS This Morning, and author of Generation Debt 'Highly informative and entertaining.' Booklist *Bargain Fever* Harriman House Limited This bulletin is a special edition prepared by the language Services Division of the IMF's Corporate Services and Facilities Department.
