Plunkett Research, Ltd.

Infrastructure Investment in Indonesia: A Focus on Ports presents an important and original collation of current material investigating the efficient facilitation of major infrastructure projects in Indonesia and Australia, with an emphasis on infrastructure investment and a focus on port planning and development. This interdisciplinary collection—spanning the disciplines of engineering, law and planning—draws helpfully on a range of practical and theoretical perspectives. It is the collaborative effort of leading experts in the fields of infrastructure project initiation and financing, and is based on international research conducted by the University of Melbourne, Universitas Indonesia and Universitas Gadjah Mada. The volume opens with a macroscopic perspective, outlining the broader economic situations confronting Indonesia and Australia, before adopting a more microscopic perspective to closely examine the issues surrounding major infrastructure investment in both countries. Detailed case studies are provided, key challenges are identified, and evidence-based solutions are offered. These solutions respond to such topical issues as how to overcome

delays in infrastructure project initiation; how to enhance project decision-making for the selection and evaluation of projects; how to improve overall efficiency in the arrangement of project finance and governance; and how to increase the return provided by investment in infrastructure. Special focus is given to proposed improvements to the port cities of Indonesia in the areas of major infrastructure project governance, policies, engagement, operation and processes. By rigorously investigating the economic, transport, finance and policy aspects of infrastructure investment, this book will be a valuable resource for policy makers and government officials in Indonesia and Australia, infrastructure investment organisations, and companies involved in exporting services between Indonesia and Australia. This book will also be of interest to researchers and students of infrastructure planning and financing, setting a solid foundation for subsequent investigations of financing options for large-scale infrastructure developments.

Asian Development Bank
The energy industry is boiling over with changes. Deregulation, new opportunities in foreign fields and markets and environmental challenges are rushing together head-on to shape the energy and utilities business of the future. Extremely deep offshore wells in the Gulf of Mexico and offshore of West Africa are being drilled at immense cost. Meanwhile China has become a major energy importer and Russia has become a major exporter. In the U.S., Europe and Japan, renewable and alternative energy sources are developing quickly, including big breakthroughs in wind power and fuel cells. This exciting new reference

book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil field services and engineering. Petroleum topics include upstream and downstream. Additional topics include coal, natural gas and LNG. More than a dozen statistical tables cover everything from energy consumption, production and reserves to imports, exports and prices. Next, our unique profiles of the Energy 500 Firms are also included, with such vital details as executive contacts by title, revenues, profits, types of business, web sites, competitive advantage, growth plans and more. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

Owen's Worldtrade Taylor & Francis
The past four decades have seen unprecedented social and economic changes that have demanded a transformation in existing employee

relation practices. Shifts in demographics, gender diversity, and an increased mobility of the workforce across the board has changed the landscape in which organizations operate. Against this backdrop, attitudes towards work and careers have changed, leading to different expectations of the workplace. These and other contextual changes mean that existing strategies of employee relation may no longer be effective. *Critical Issues on Changing Dynamics in Employee Relations and Workforce Diversity* is a collection of pioneering research that addresses the challenges and issues pertaining to the changing dynamics of employee relations and provides additional support to better deal with critical issues related to people management. While highlighting topics including employee engagement, workplace culture, and diversified workforce, this book is ideally designed for human resource managers, managers, executives, researchers, business professionals, academicians, and students seeking current studies on critical matters in employee relation techniques and practices.

Ship management is a worldwide activity. Modern ships are sophisticated designed structures equipped with several automatic devices. It is estimated that 90 per cent of commodities transported worldwide are carried by ships. Therefore there is great interest from many private and public organizations that those ships are operating, manned, designed and maintained within international acceptable standards. The obligation of stakeholders to comply with maritime

regulations is included in most statutory and commercial agreements and therefore inadequate implementation of maritime regulations exposes stakeholders to commercial risks. This book explores how the application of mathematical decision-making tools could be used to manage maritime regulations. Performance management tools are proposed which would allow stakeholders to monitor the regulatory performance of their organization in order to reduce or eliminate those commercial risks. The process of introducing an implementation process for maritime regulations worldwide is described within this text. An emphasis is put on the role of main stakeholders in the regulatory process and reasons that increase the willingness of stakeholders to participate in the implementation of regulations. This book will be of interest to scholars and students interested in the management of the shipping industry as well as ship owners and managers who are charged with implementing maritime regulations.

International Production Beyond the Pandemic

Cch Incorporated Indonesia is Southeast Asia's largest economy and freest democracy yet vested interests and local politics serve as formidable obstacles to infrastructure reform. In this critical analysis of the politics inhibiting infrastructure investment, Jamie S. Davidson utilizes evidence from his research, press reports and rarely used consultancy studies to challenge mainstream explanations for low investment rates and the sluggish adoption of liberalizing reforms. He argues that obstacles have less to do with weak formal institutions and low fiscal capacities of the state than with entrenched, rent-seeking interests, misaligned central-local

government relations, and state-society struggles over land. Using a political-sociological approach, Davidson demonstrates that 'getting the politics right' matters as much as getting the prices right or putting the proper institutional safeguards in place for infrastructure development. This innovative account and its conclusions will be of interest to students and scholars of Southeast Asia and policymakers of infrastructure investment and economic growth.

A History of Modern Indonesia

Plunkett Research, Ltd.

This publication provides a snapshot of the overall public-private partnership (PPP) landscape in Indonesia. It includes more than 500 qualitative and quantitative indicators to profile the national PPP environment, the sector-specific PPP landscape (for eight identified infrastructure sectors), and the PPP landscape for local government projects. This downloadable guide also captures the critical macroeconomic and infrastructure sector indicators (including the Ease of Doing Business scores) from globally accepted sources. Through Presidential Regulation 38/2015, the cornerstone of the country's robust PPP enabling framework, Indonesia expects PPPs to continue playing a pivotal role to achieve its infrastructure investment target of \$429 billion for 2020-2024 and mobilize 59% of this value from the private sector.

Critical Issues on Changing Dynamics in Employee Relations and Workforce Diversity

Cambridge University Press

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global

crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

Major Players in the Muslim Business World is a comprehensive guide for businessmen, researchers, and students

who aim to learn more about the contemporary Muslim business world. Included are facts about the leading countries, companies and business persons in this world, as well as a brief introduction of Islamic principles related to business. Current information about opportunities and leaders in relatively new industries, such as Islamic Finance, Halal and Takaful sectors is also presented. Instead of the partial overview usually provided in competing guides, *Major Players in the Muslim Business World* offers a complete analysis of the most important topics, including the largest Muslim economies today, Muslim countries with the highest GDP per capita, Muslim companies on the Forbes Global 2000 list and Fortune's Global 500 Companies list, and the Muslim world in contemporary geopolitics.

Astrad Universal-Publishers

A just culture is a culture of trust, learning and accountability. It is particularly important when an incident has occurred; when something has gone wrong. How do you respond to the people involved? What do you do to minimize the negative impact, and maximize learning? This third edition of Sidney Dekker's extremely successful *Just Culture* offers new material on restorative justice and ideas about why your people may be breaking rules. Supported by extensive case material, you will learn about safety reporting and honest disclosure, about retributive just culture and about the criminalization of human error. Some suspect a just culture means letting people off the hook. Yet they believe they need to remain able to hold people accountable for undesirable performance. In this new edition, Dekker asks you to look at 'accountability' in different ways. One is

by asking which rule was broken, who did it, whether that behavior crossed some line, and what the appropriate consequences should be. In this retributive sense, an 'account' is something you get people to pay, or settle. But who will draw that line? And is the process fair? Another way to approach accountability after an incident is to ask who was hurt. To ask what their needs are. And to explore whose obligation it is to meet those needs. People involved in causing the incident may well want to participate in meeting those needs. In this restorative sense, an 'account' is something you get people to tell, and others to listen to. Learn to look at accountability in different ways and your impact on restoring trust, learning and a sense of humanity in your organization could be enormous.

State-owned enterprises (SOEs) play significant roles in developing economies in Asia and SOE performance remains crucial for economy-wide productivity and growth. This book looks at SOEs in Azerbaijan, Indonesia, Kazakhstan, the People's Republic of China, and Viet

Nam, which together present a panoramic view of SOEs in the region. It also presents insights from the Republic of Korea on the evolving role of the public sector in various stages of development. It explores corporate

governance challenges and how governments could reform SOEs to make them efficient drivers of the long-term productivity-induced growth essential to Asia's transition to high-income status.
