WHO Laboratory Manual for the Examination of Human Semen and Sperm-Cervical Mucus Interaction W B Saunders Company

Ovarian Cycle, Volume 107, the latest in the Vitamins and Hormones series first published in 1943, and the longest-running serial published by Academic Press, covers the latest updates on hormone action, vitamin action, X-ray crystal structure, physiology and enzyme mechanisms. This latest release includes an overview of the ovarian cycle, a section on ovarian hyperstimulation syndrome, information on androgens and ovarian follicular maturation, information on peptide inhibitors of human thymidylate synthase to inhibit ovarian cancer cell growth, sections on nodal and luteolysis, neurokinins, dynorphin and pulsatile Lh secretion, Lh receptor expression by Mir12, and gonadotrophin-surge attenuating factor, melatonin and Bmp-6 regulation, amongst other topics. Focuses on the newest aspects of hormone action in connection with diseases Lays the groundwork for the focus of new chemotherapeutic targets Reviews emerging areas in hormone action, cellular regulators and signaling pathways

Navigate 2 Advantage Access unlocks a complete Audiobook, Study Center, homework and Assessment Center, and a dashboard that reports actionable data. Experience Navigate 2 today at www.jblnavigate.com/2. In the early 1970s, Dr. Nancy Caroline developed the first paramedic textbook and transformed paramedic education. Today, the Paramedic Association of Canada is proud to continue this legacy, delivering world-class education to future paramedics in Canada and around the globe. The Eighth Edition offers cutting-edge, evidence-based content that aligns with current guidelines, standards, and literature from medical authorities across the spectrum of emergency medicine--from cardiac care, to stroke, to wilderness medicine, to trauma. Current, State-of-the-Art Medical Content Based on the National Occupational Competency Profiles and the latest CPR/ECC Guidelines, the Eighth Edition offers complete coverage of every competency statement with clarity and precision in a concise format that ensures comprehension and encourages critical thinking. Detailed explanations of current practice and treatment provide an unparalleled clinical foundation for a successful career as a paramedic and beyond. Relevant medical concepts are presented to ensure students and instructors have accurate, insightful interpretation of medical science as it applies to prehospital medicine today. Application to Real-World EMS Through evolving patient case studies in each chapter, the Eighth Edition gives students real-world scenarios to apply the knowledge gained in the chapter, clarifying how the information is used to care for patients in the field, and pushing students to engage in critical thinking and discussion. Essential skill content is portrayed in detailed steps that are the ideal complement to the National Occupational Competency Profiles. A Foundation for Life The Eighth Edition provides a comprehensive understanding of anatomy, physiology, pathophysiology, medical terminology, and

patient assessment. Clinical chapters discuss application of these key concepts to specific illnesses or injuries, using context to refine and solidify the foundational knowledge. Dynamic Technology Solutions Navigate 2 unlocks engaging tools that enable students and instructors to chart a swift path to success. The online learning resources include student practice activities and assessments and learning analytics dashboards. The online offering also includes the following for every chapter: Ready for Review chapter summaries Vital Vocabulary chapter definitions Assessment in Action scenarios with multiple-choice questions Points to Ponder scenarios to consolidate information and promote critical thinking

Research Grants Index World Bank Publications

This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

Medical Catalog of Selected Audiovisual Materials Produced by the United States Government McGraw Hill Professional

The 15th title in Firefly Books' bestselling and renowned Subject Bible series covering all aspects of human life. Praise for the series: Don't let the format fool you; the concepts are quite sophisticated, so many entries are brief but dense. Good for answering news-related ready reference questions and, despite its small size, suitable for circulating collections. --Booklist Like the previous titles in this series, The Anatomy Bible delivers a concise and entertaining package of authoritative information on a fundamental aspect of human existence; in this case, the bones and muscles and organs that make up human anatomy, the one common element of all human life. The 13 illustrated chapters cover: The Fundamentals -- The discovery and application of knowledge of human anatomy; the language of anatomy Bit by Bit -- Organization of your body from cellular to chromosomal, to tissues and organs The Ultimate Packaging Material -- The 3 layers of skin that protect us; fat, hair, glands and nails Move Your Body -- The musculoskeletal system, bone; tendons, ligaments and muscles; cartilage and bone growth; aging A Blood Red Superhighway -- The heart, arteries, capillaries, veins, oxygen The Security Force -- Immunity and wound repair; lymphocytes; hypersensitivity A Paramount Exchange -- Respiration and lungs The Hub -- The nervous system; neurons, axons, the brain parts, cortices, the senses Just A Messenger -- Chemicals and glands GIT --

Upper and lower gastrointestinal tract and its parts, from mouth to throat to stomach to lower intestines; liver and gallbladder Your Waterway Networks -- The urinary system; kidneys, bladder, ureter and urethra; blood filtering; blood pressure Making Babies -- Structure and function of the male and female reproductive systems; genetics and inherited characteristics Looking Ahead -- 21st-century anatomy. The other titles in this wide-ranging series specialize in topics of interest for everyone and others that are more specialized, but we all have a body and, for the most part, they all work the same way. The Anatomy Bible is a wonderful reference to its secrets and an ideal selection for all readers.

Concepts of Biology Public Health Foundation

Since 1971, Emergency Care and Transportation of the Sick and Injured has advanced how EMS education is delivered to help train exceptional EMS professionals around the globe.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools,

and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

The Incredible Biology of You Disha Publications

The Public Health Foundation (PHF) in partnership with the Centers for Disease Control and Prevention (CDC) is pleased to announce the availability of Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition or "The Pink Book" E-Book. This resource provides the most current, comprehensive, and credible information on vaccine-preventable diseases, and contains updated content on immunization and vaccine information for public health practitioners, healthcare providers, health educators, pharmacists, nurses, and others involved in administering vaccines. "The Pink Book E-Book" allows you, your staff, and others to have quick access to features such as keyword search and chapter links. Online schedules and sources can also be accessed directly through e-readers with internet access. Current, credible, and comprehensive, "The Pink Book E-Book" contains information on each vaccine-preventable disease and delivers immunization providers with the latest information on: Principles of vaccination General recommendations on immunization Vaccine safety Child/adult immunization schedules International vaccines/Foreign language terms Vaccination data and statistics The E-Book format contains all of the information and updates that are in the print version, including: · New vaccine administration chapter · New recommendations regarding selection of storage units and temperature monitoring tools · New recommendations for vaccine transport · Updated information on available influenza vaccine products · Use of Tdap in pregnancy · Use of Tdap in persons 65 years of age or older · Use of PCV13 and PPSV23 in adults with immunocompromising conditions · New licensure information for varicella-zoster immune globulin Contact bookstore@phf.org for more information. For more news and specials on immunization and vaccines visit the Pink Book's Facebook fan page

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child

development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

A Laboratory Guide DIANE Publishing

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

10 in One Study Package for CBSE Science Class 10 with 3 Sample Papers & 16 Chapter Tests ebook Lexington Books

This text for nursing students features physical examination, history taking and health status assessment. Formulated into vertically set three portrait columns, its distinguishing emphasis on analysis of collected data and coverage of practical applications is clearly presented and user-friendly.

The laboratory guide directs readers through a series of dissection activities for use in the lab accompanied by new, full color photos and figures. The guide can be used as a stand-alone dissection guide or in conjunction with any Anatomy and Physiology Laboratory Manual.

Terminology in Context Jones & Bartlett Learning

"Get to know yourself: A training package for health promoters, health educators, community health workers and peer educators promoting sexual health among young people promoting sexual health among young people" consists of two part, Part one is a book entitled "Get to know yourself: A sexual health guide for young people" and Part Two a handbook entitled "Get to know yourself: A handbook for health promoters and peer educators facilitating sexual health programmes among young people". The package was developed to assist under resourced communities and countries in accessing sexual health information that will have a positive impact on the lives of young people. This training package can also be used by health professionals and other professionals to facilitate sexual health workshops in schools, youth organisations or clubs, puberty rites or initiations, and religious organisations.

Clinical Pocket Guide for Health and Physical Assessment in Nursing National Academies Press

"HPV and Cancer" is a concise read that covers all aspects of the Human Papilloma Virus as it relates to human cancers. While written by professionals, it design to be understandable by those that are not in the field, yet it has the technical details that professionals want to stay abreast of this

changing field. The book starts out the history of HPV and progresses into the molecular biology of the virus and our current understand of the structure and functions of the proteins and genes it encodes. We then look at the dynamic trends of this infectious agent in the human population, how

it interacts with human cells, and the role it plays with other organisms to produce both benign and malignant tumors. Lastly, there is a discussion about a new vaccine for HPV and the hopes that are held by many to change the trends with this virus and the associated cancers it produces.
