Provocations for 21st Century Game Makers Anthem Press

Until recently, higher education in the UK has largely failed to recognise gender-based violence (GBV) on campus, but following the UK government task force set up in 2015, universities are becoming more aware of the issue. And recent cases in the media about the sexualised abuse of power in institutions such as universities, Parliament and Hollywood highlight the prevalence and damaging impact of GBV. In this book, academics and practitioners provide the first in-depth overview of research and practice in GBV in universities. They set out the international context of ideologies, politics and institutional structures that underlie responses to GBV in elsewhere in Europe, in the US, and in Australia, and consider the implications of implementing related policy and practice. Presenting examples of innovative British approaches to engagement with the issue, the book also considers UK, EU and UN legislation to give an international perspective, making it of direct use to discussions of 'what works' in preventing GBV.

Parametric variation in linguistic theory refers to the systematic grammatical variation permitted by the human language faculty. This book is a defence of the parametric approach to linguistic variation, set within the framework of the Minimalist Program.

This book takes a critical, grounded and ethnographic approach to elicit a deeper understanding of university volunteering. Anthropological theories of reciprocal gift exchange are used to revisit some of the value-laden and at times conflicting ways of understanding

volunteering as freely undertaken or coerced, altruistic or self-interested. It also explores how some of the changing uses and expectations of volunteering are related to the exercise of power and to the effect of social norms or structural constraints on agency. The book contains a detailed case study of a UK university, focusing on its relationships with local communities and voluntary organisations to illustrate the complex and culturally situated nature of volunteering and the gift. Joanna Puckering also draws on examples from countries such as the United States and Australia to address wider questions of why people do what they do, and why volunteering motives and outcomes attract differing interpretations. This volume will be relevant to scholars from anthropology, sociology and geography as well as those involved in the higher education and voluntary, corporate and social enterprise sectors.

Beastly Questions Rowman & Littlefield
 There are 18 contributions in the book; all of whom are very highly regarded in the fields of entrepreneurship and international management. . . the book is well researched and edited. The book provides an excellent discussion on the importance of SMEs in the global economy. Through a number of different case study examples and discussion of various elements of the internationalization process, this book provides an outstanding resource for the study of SMEs that operate in the international market. Vanessa Ratten, *Journal of International Entrepreneurship*
 This book is most timely. It arrives at a time when globalisation and new technologies present major opportunities and challenges to the role of the independent small and medium sized business in economies. . . The book s

strength in dealing with many of the emerging issues is underpinned by a truly international range of contributors with a strong mix of practical as well as academic experience. From the preface by Allan Gibb, Professor Emeritus, Durham University, UK Lester Lloyd-Reason and Leigh Sear bring together leading researchers and thinkers in this critical guide to the ongoing, worldwide research shaping the role played by SMEs within today s global economy. The expert contributors contend that the past twenty years have seen an explosion in research into international SMEs, resulting in a considerable body of academic literature and thinking. This research, they argue, may merely serve to increase our lack of understanding in this area, and often results in myths and misconceptions upon which SME policies and support programmes have been developed and introduced. They go on to suggest that academic models are often poorly suited to the problems faced by SMEs within the international trading environment. In many instances, the contributors find SMEs at the vanguard of the challenge to accepted business practices: it is these challenges that underpin the text. Illustrating that today s SMEs are faced with the critical issue of how to create and maintain a sustainable competitive advantage in light of the increased complexity of international trade and global business linkages, this Handbook will prove invaluable to both academics and practitioners involved in business and management and entrepreneurship.

In the decade since the idea of adapting the evidence-based paradigm for software engineering was first proposed, it has become a major tool of empirical

software engineering. Evidence-Based Software Engineering and Systematic Reviews provides a clear introduction to the use of an evidence-based model for software engineering research and practice.

The topic of Enterprise Information Systems (EIS) is having an increasingly relevant strategic impact on global business and the world economy, and organizations are undergoing hard investments in search of the rewarding benefits of efficiency and effectiveness that these ranges of solutions promise. Organizational Integration of Enterprise Systems and Resources: Advancements and Applications show that EIS are at the same time responsible for tremendous gains in some companies and tremendous losses in others. Therefore, their adoption should be carefully planned and managed. This title highlights new ways to identify opportunities and overtake trends and challenges of EIS selection, adoption, and exploitation as it is filled with

models, solutions, tools, and case studies. The book provides researchers, scholars, and professionals with some of the most advanced research, solutions, and discussions of Enterprise Information Systems design, implementation, and management.

From cinema's silent beginnings, fashion and interior design have been vital to character development and narrative structure. Despite spectacular technological advancements on screen, stunning silhouettes and striking spaces still have the ability to dazzle to dramatic effect. This book is the first to consider the significant interplay between fashion and interiors and their combined contribution to cinematic style from early film to the digital age. With examples from Frank Lloyd Wright inspired architecture in Hitchcock's *North by Northwest*, to Coco Chanel's costumes for Gloria Swanson and a *Great Gatsby* film-set turned Ralph Lauren flagship, *Cinematic Style* describes the reciprocal relationship between these cultural forms. Exposing the bleeding lines between fashion and interiors in cinematic and real-life contexts, Berry presents case studies of cinematic styles adopted as brand identities and design movements promoted through filmic fantasy. Shedding light on consumer culture, social history and gender politics as well as on fashion, film and interior design theory, *Cinematic Style* considers the leading roles domestic spaces, quaint cafes, little black dresses and sharp suits have played in 20th and 21st-century film.

While studying caregiving and chronic

illness in families living in situations of economic and social insecurity in Baltimore, anthropologist Todd Meyers met a woman named Beverly. In *All That Was Not Her* Meyers presents an intimate ethnographic portrait of Beverly, stitching together small moments they shared scattered over months and years and, following her death, into the present. He meditates on the possibilities of writing about someone who is gone—what should be represented, what experiences resist rendering, what ethical challenges exist when studying the lives of others. Meyers considers how chronic illness is bound up in the racialized and socioeconomic conditions of Beverly's life and explores the stakes of the anthropologist's engagement with one subject. Even as Meyers struggles to give Beverly the final word, he finds himself unmade alongside her. *All That Was Not Her* captures the complexity of personal relationships in the field and the difficulty of their ending.

International student migration makes a significant contribution to higher education in the United Kingdom, with Southern Africa, and Nigeria in particular, positioned joint sixth in the top ten of sending countries. Many of these student-migrants, in supplementing their finances to fund their studies in the United Kingdom, undertake employment. Temporary and/or part-time employment is integral to the student-migrant experience, despite the express purpose of their admission into the United Kingdom designated for study purposes and not work. This explicit object is reflected in restrictions affixed to international students' employment rights whilst

studying; they are generally restricted to a maximum of 20 hours of work per week during term time and proscribed from working full time or as independent contractors. Given the scant regard this topic has received in the existing literature, this study offers an examination of students' lived employment experiences under these rules. The study aims to offer a contribution, first in respect of the employment experiences of student-migrants through the analytical framework of 'precarity' by examining the various manifestations of insecurity in the students' lived realities, nuanced by structures of migration control and labour market temporalities. Secondly, by adopting the socio-legal schema of legal consciousness, the study considers the student-migrants' relationship with the law by way of the legal restrictions on their employment and examines their agency as evidenced through efforts to derogate from these rules.

While there have been many attempts in the literature to account for the semantics and syntax of individual German(ic) prefixes, this is the first time that the prefixes have been analysed in a unified way and a framework established that is capable of relating the prefixes to each other and to other areas of the grammar. The templates provide the means whereby a State/Change of State feature interacts with Figure and Ground arguments to generate prefixed verbs, noun- and adjective-incorporating verbs, and oblique case marking on the complements of simplex verbs and adjectives. This book presents a new and potentially powerful theory of lexical morphology that will be of interest not

only to morphologists and those working on the grammar of German, but also syntacticians working on the Locative and Dative Alternations, and linguists whose prime concern is the organization of the lexicon, and the realization of the semantics of change of state predicates.

Recent Advances in Science and Technology of Zeolites and Related Materials is a collection of oral and poster communications, presented during the 14th International Zeolite Conference (IZC). The conference was hosted by the Catalysis Society of South Africa. In the tradition of the IZC series, this Conference provides a forum for the presentation of new knowledge in the science and technology of zeolites and related materials. Papers presented cover a wide range of topics that include

synthesis, structure determination, characterisation, modelling, and catalysis. This highly visual book is a must for readers looking to stay up-to-date on zeolite science. * This three-part volume provides valuable information on zeolites and related materials * Includes papers that cover topics such as structure determination, modelling and separation processes * Contains new and exciting developments in the field

Presenting recent studies of non-profit organizations involved in poverty relief services in New York City in comparison with programmes in existence across the US, Street Practice provides a front-line, ground-level perspective on innovative research practices designed to solve community problems. It explores the manner in which organizations bridge the gap between research and policy advocacy, with an account of the ways in which research contributes to alleviating or solving a community problem, as well as details on successes and failures of advocacy work, problems and limitations of their research, funding constraints and political resistance. As such, this book not only offers compelling examples of social change in action, but also serves to introduce models for research and policy advocacy that can be applied similarly in other urban areas. Adopting a case-based learning approach that enables readers to better understand the dynamic process of research and policy advocacy, this innovative book will appeal to those with interests in poverty, homelessness, policy advocacy, social work and social change.

Creating Economic Space for Social Innovation Edward Elgar Publishing

Communication Rights is a key issue in

contemporary societies, especially in a country like India, which faces major communication deficits. *Negotiating Communication Rights* explores some of the most important aspects of communication rights movements in India. Beginning with the theoretical aspects of communication rights, the book deals with five case studies related to significant movements of our times, namely, the Right to Information, Free and Open Source Software, Women and Media, Community Radio, and Citizen Journalism. It also analyses the complexity of specific rights issues in India, such as women's rights, citizen activism and the role of media. The book explores the processes through which ordinary citizens have developed spaces for self-expression—a concept synonymous with media democratisation. The author argues for the need for streamlining of communication rights movements in India and for an India-specific framework for communication rights.

Fashion, Architecture and Interior Design on Film Trading Places--SMEs in the Global Economy A Critical Research Handbook

In this book Jo Maybin draws on rare access to the inner-workings of England's Department of Health to explore what kinds of knowledge civil servants use when developing policy, how they use it and why. Combining ethnographic data with insights from psychology, socio-linguistics, sociology and philosophy, she demonstrates how civil servants engage in a wide range of knowledge practices in the course of their daily work. These include sharing personal anecdotes, thrashing-out ideas in meetings and creating simplified representations of phenomena, as well as conducting cost-benefit analyses and

commissioning academic research. Maybin analyzes the different functions that these various practices serve, from developing personal understandings of issues, to making complex social problems 'thinkable', and meeting the ever-present need to make policies 'happen'. In doing so, she develops an original theory of policy-making as the work of building connections between a policy in development and powerful ideas, people, and instruments, and reveals the 'policy know-how' required by civil servants to be effective in their jobs.

The British National Party (BNP) is the most successful far right party in British political history. Based on unprecedented access to the party and its members, this book examines the rise of the BNP and explains what drives some citizens to support far right politics. It is essential reading for all those with an interest in British politics, extremism, voting, race relations and community cohesion. The book helps us understand: how wider trends in society have created a favourable climate for the far right; how the far right has presented a 'modernised' ideology and image; how the movement is organized, and has evolved over time; who votes for the far right and why; why people join, become and remain actively involved in far right parties.
