The Moon and Sixpence St. Martin's Essentials
 From #1 New York Times bestselling author Kathryn Purdie comes a high-stakes fantasy duology flush with doomed romance and macabre magic, perfect for fans of Stephanie Garber and Roshani Chokshi. Bone Criers are the last descendants of an ancient famille charged with using the magic they draw from animal bones to shepherd the dead into the afterlife—lest they drain the light from the living. Aillesse has been prepared since birth to become their matriarch, but first she must complete her rite of passage: to kill the boy she's destined to love. Bastien's father was slain by a Bone Crier and he's been seeking revenge ever since. Now his vengeance must wait, as Aillesse's ritual has begun and their fates are entwined—in life and in death.

The Moon in Modern Astronomy Little, Brown
 Have you ever wondered why the moon shines in the night-time sky? As the moon waxes and wanes above, the world below is full of busy night-time creatures; from turtles laying their eggs on white sandy beaches, to migrating birds using the moon to navigate their way to sunnier climes. Turn the peek-through pages to see the moon change shape as it goes through the lunar cycle.

Wishing Moon Anchor

When the evil princess throws a lamp at her head, Aminah, a penniless orphan living on the streets of Al-Kal'as, is stunned when a jinni appears, allowing her to make three wishes after each full moon, but her happiness is short-lived when the princess comes after the lamp.

Mansions of the Moon: A Lunar Zodiac for Astrology and Magic HarperCollins

After making careful plans, three ingenious and courageous men fly through space towards the moon

A History for the Future Schwartz & Wade Books

Learn why NASA astronaut Mike Collins calls this extraordinary space race story "the best book on Apollo": this inspiring and intimate ode to ingenuity celebrates one of the most daring feats in human history. When the alarm went off forty thousand feet above the moon's surface, both astronauts looked down at the computer to see 1202 flashing on the readout. Neither of them knew what it meant, and time was running out . . . On July 20, 1969, Neil Armstrong and Buzz Aldrin became the first humans to walk on the moon. One of the world's greatest technological achievements -- and a triumph of the American spirit -- the Apollo 11 mission was a mammoth undertaking involving more than 410,000 men and women dedicated to winning the space race

against the Soviets. Set amid the tensions and upheaval of the sixties and the Cold War, *Shoot for the Moon* is a gripping account of the dangers, the challenges, and the sheer determination that defined not only Apollo 11, but also the Mercury and Gemini missions that came before it. From the shock of Sputnik and the heart-stopping final minutes of John Glenn's Mercury flight to the deadly whirligig of Gemini 8, the doomed Apollo 1 mission, and that perilous landing on the Sea of Tranquility -- when the entire world held its breath while Armstrong and Aldrin battled computer alarms, low fuel, and other problems -- James Donovan tells the whole story. Both sweeping and intimate, *Shoot for the Moon* is "a powerfully written and irresistible celebration" of one of humankind's most extraordinary accomplishments (Booklist, starred review).

In 1492, Luis de Torres, a Spanish Jew, accompanies Columbus as his interpreter. Over the centuries, de Torres' descendants travel from Spain and Portugal to Mexico, finally settling in the hills of New Mexico. Five hundred years later, it is in these same hills that Miguel Torres finds himself trying to understand the mystery that surrounds him and the town he grew up in.

The Moon Book (New & Updated Edition) Night Shade
 Vast legions of gods, mages, humans, dragons and all manner of creatures play out the fate of the Malazan Empire in this first book in a major epic fantasy series The Malazan Empire simmers with discontent, bled dry by interminable warfare, bitter infighting and bloody confrontations with the formidable Anomander Rake and his Tiste Andii, ancient and implacable sorcerers. Even the imperial legions, long injured to the bloodshed, yearn for some respite. Yet Empress Laseen's rule remains absolute, enforced by her dread Claw assassins. For Sergeant Whiskeyjack and his squad of Bridgeburners, and for Tattersail, surviving cadre mage of the Second Legion, the aftermath of the siege of Pale should have been a time to mourn the many dead. But Darujhistan, last of the Free Cities of Genabackis, yet holds out. It is to this ancient citadel that Laseen turns her predatory gaze. However, it would appear that the Empire is not alone in this great game. Sinister, shadowbound forces are gathering as the gods themselves prepare to play their hand... Conceived and written on a panoramic scale, *Gardens of the Moon* is epic fantasy of the highest order--an enthralling adventure by an outstanding new voice. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

We wait for the moon. We watch for the moon. We watch for the Ramadan moon. We give to the poor, and read Qur'an, under the moon. We live our faith, until next year under the moon, under the moon, under the Ramadan moon. Ramadan is one of the most special months of the Islamic year, when Muslims pray, fast, and help those in need. Sylvia Whitman's lyrical story, with luminous illustrations by Sue Williams, serves as an introduction to Ramadan, a time for reflection and ritual with family and friends. A detailed note about Ramadan is included.

The Earth has limited material and energy resources. Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources. The exploitation of the natural resources of the Moon is a first natural step on this direction. Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon. This will allow developing new technologies, systems and flight operation techniques to continue space exploration. In fact, a new branch of human civilization could be established permanently on Moon in the next century. But, meantime, an inventory and proper social assessment of Moon's prospective energy and material resources is required. This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources. The book collects together recent proposals and innovative options and solutions. It is a useful source of condensed information for specialists involved in current and impending Moon-related activities and a good starting point for young researchers.

In *The Moon* David Whitehouse explains how our nearest celestial neighbor was created (and what moonrocks tell us of its earth-shattering origins), and how its existence may have been a crucial factor in mankind being here at all. Whitehouse discusses how man has related to it, worshipped it and blamed it for his own 'lunacy' - though can it really affect our behavior? He tells how the first person to look at the moon through a telescope was not Galileo, as is commonly believed, but an Englishman who knew Shakespeare and had a part in the Gunpowder Plot. While some of the story of the modern moon race may be known, the first moon race to map its surface has not been charted before, and is one of the most dramatic and unexpected stories in science. The recent discovery of ice hidden in the moon's polar regions opens up new possibilities for space travel that mean it is essential that mankind returns there if we are ever to journey to the rest of the solar system.

The year is 1863. Deep in the backwoods of Coker County, Tennessee, farmer Boone Dillard and his family live in ritualistic harmony with the earth and its seasons, content to eke out a living from the land, unaware even of the Civil War that engulfs the nation around them... that is, until Boone is seduced by a mysterious traveling peddler's dulcet promises of fame, fortune, and glory. As Boone and his hulking yet childlike brother-in-law Jebber set forth in search of their destiny, they set into motion a haunting and disturbing chain of events that threatens to tear the family apart, awaken restless ghosts, and alter the course of their lives forever. From rock and roll legend Ray Manzarek comes *Snake Moon*, a bewitching and ghostly Civil War-era parable of Eden. *Snake Moon* stunningly blends ancient myth and fable with the charm and voice of rustic Americana and exposes themes of violence, heroism, and the loss of innocence amid the horrors of

war with captivating intensity that builds to a stunning and unforgettable climax. Doors co-founder and keyboardist Ray Manzarek is the author of the auto-biography *Light My Fire: My Life with the Doors*, and the novel *Poet in Exile*. In recent years he and co-wrote and directed *Love Her Madly*, which premiered in February of 2001. He currently tours with Doors co-founder Bobby Krieger, and Cult singer Ian Astbury, as *Riders on the Storm*. In this touching debut novel, a grownup Truman "Scrup" Armstrong recalls the childhood incident that led to his fateful involvement in one of attorney Abraham Lincoln's most celebrated criminal trials. In 1857, at the age of nine, Scrup's idyllic boyhood ends the day he discovers a lynched black man on his father's farm. In the wake of this, Scrup's father, Jack, offers his barn as a station house along the Underground Railroad, and no one suspects. Then, in a seemingly unrelated event, Scrup's older brother, Duff, is ensnared in a murder charge and everything is at stake. . Told through the eyes of Scrup, *The Lincoln Moon* offers a colorful glimpse of the future president' in a courtroom. Ultimately, this is a story about family, faith, and acts of conscience is troubling times"Finding a moment in a great man's younger life that captures his greatness and brilliance long before he becomes "a great man" and then turning that moment into a compelling and moving story is exactly what Michael Price Nelson has done in his debut novel, *The Lincoln Moon*."

"When I first looked back at the Earth, standing on the surface of the Moon, I cried." This book tells the story of the Apollo Missions, when incredible intelligence, engineering and bravery allowed humans to stand on the surface of something other than Earth for the very first time. From the 1969 first moon landing to the amazing rescue of Apollo 13, each chapter tells the story of a different mission. Humorous details bring the astronauts to life: discover how the astronauts of Apollo 12 were so over-excited when they stepped onto the Moon that Mission Control had to tell them to quieten down, and Shepard (Apollo 14) somehow managed to smuggle a golf club onto his spacecraft! Published to celebrate the 50th anniversary of the first moon landing, this is the perfect title for any child who has ever looked up at the moon and wondered what it might be like to go there.
