Addressing contemporary mental health issues facing psychiatric nursing today, as well as traditional clinical skills, this reference work links stress, trauma, and behavioural health problems to neurobiological function and immune system depletion. This framework pinpoints assessment and selection of intervention strategies especially useful in this era of managed care, focused care, and time-limited treatment. The book describes the biology of mental illness and psychopharmacological interventions, provides a DSM-IV diagnosis and a psychiatric nursing diagnosis to a patient condition within the context of the nursing care plan, and clearly demonstrates how nurses integrate neurobiological, behavioural, and social science theories and research into patient care.

*The craft of caring* Prentice Hall

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosing, Implementation, and Evaluation (APIE) nursing process Addresses critical thinking,

clinical decision making, therapeutic interventions, case management roles, and mental health care settings across the lifespan Features NCLEX preparation questions, vivid clinical scenarios, and evidence-based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM-V updates is available Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM-V update This book is also available as part of a discounted set. **EBOOK: Introduction To Mental Health Nursing** Mosby Incorporated

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections

including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.
