(Musicians Institute Press). Designed to help today's up-and-coming DJs become familiar with the main methods of DJ-ing, this book teaches the important historical and technological landmarks that have contributed to this art form. Not only does this publication present the traditional method of DJ-ing using vinyl records, but it also shares more modern methods of performance, including both digital media players (Pioneer CDJ/XDJs), and the industry-leading software, Serato DJ, as well. A

later chapter on business provides insightful advice gathered along years of experience, as well as useful tips and tricks for onstage performance. In addition, this package includes online video mirroring the concepts addressed in the book. Upon completing this study, the reader will be able to perform a convincing DJ set on a variety of DJ setups.

The market changes faster than marketing. In essence, marketing strategy has undergone only two eras, the entity era and the bit era, also known as the industrial age and the digital age. In the age of digital society, all CEOs, CMOs and senior marketing executives must consider how to change their strategies, improve the role of marketing and adopt emerging technological and data tools to integrate with the Internet. The goal of digital marketing strategy is not to disrupt existing marketing strategies, but to complement, integrate and develop the two at the same time. In this book, the authors provide detailed discussion and practical analysis on the relationship between marketing and digital technologies and propose a marketing implementation framework for digital strategy platforms. Standing for Recognize, Reach, Relationship and Return, the 4R system is a powerful strategic trading tool for digital implementation, especially for CEOs and CMOs. All other tools, such as data platforms, content marketing, DSP digital advertising and digital marketing ROI design essentially serve the 4R system. As such, the authors advocate for firms to restructure their digital marketing strategy around the 4R system.

**Historical Perspectives of the Operational Art** Mixed in Key

The DJ stands at a juncture of technology, performance and culture in the increasingly uncertain climate of the popular music industry, functioning both as pioneer of musical taste and gatekeeper of the music industry. Together with promoters, producers, video jockeys (VJs) and other professionals in dance music scenes, DJs have pushed forward music techniques and technological developments in last few decades, from mashups and remixes to digital systems for emulating vinyl performance modes. This book is the outcome of international collaboration among academics in the study of electronic dance music. Mixing established and upcoming researchers from the US, Canada, the UK, Germany, Austria, Sweden, Australia and Brazil, the collection offers critical insights into DJ activities in a range of global dance music contexts. In particular, chapters address digitization and performativity, as well as issues surrounding the gender dynamics and political economies of DJ cultures and practices.

Krause's On Operational Art, captures the doctrinal debate over the evolving concept of operational art-the critical link between strategy and tactics-in the face of the new complexities of warfare and the demands of irregular operations in the twenty-first century. Consisting of fifteen original essays selected and edited by Michael D. Krause in collaboration with R. Cody Phillips, the well-organized anthology presents the collective view of distinguished military historians and scholars that operational art must be

adjusted to accommodate the changing circumstances happening around the world, especially when dealing with broad coalitions and alliances in regional environments and at an international level. Explore the ground-breaking work of 20th-century, avant-garde artist Nam June Paik, the pioneer of video art, and discover his impact on the digital age. Nam June Paik was one of the most presciently visionary artists of his generation, one who foresaw the ascendancy of the screen in modern life, coined the phrase "electronic superhighway", and celebrated these developments with a humor and whimsy that counteracts some of the darker aspects of our technological age. This book features works from throughout Paik's five-decade career--from robots made from old TV screens to stills from his innovative video works and views of his renowned room-sized installations. Archival materials and excerpts of Paik's own writings offer a deeper understanding of the artist's extraordinary collaborative career. He had exchanges with avant-garde artists, musicians, and choreographers,

including Charlotte Moorman, John Cage, Merce Cunningham, Joseph Beuys, and members of the Fluxus movement. Essays explore how Paik influenced a global network of artists and pioneered a radical and cutting-edge art practice. They also consider how Paik's transnational approach to art presaged today's issues around borders, immigration, cultural appropriation, and nationalism. By envisioning a future that has become a reality, Paik's work--and its humanity, scope, and optimism--is perhaps more important than ever. Published with Tate

"A riveting look at record spinning from its beginnings to the present day . . . A grander and more fascinating story than one would think." —Time Out London This is the first comprehensive history of the disc jockey, a cult classic now updated with five new chapters and over a hundred pages of additional material. It's the definitive account of DJ culture, from the first record played over airwaves to house, hip-hop, techno, and beyond. From the early development of recorded and transmitted sound, DJs have been shaping the way we listen to music and the record

industry. This book tracks down the inside story on some of music's most memorable moments. Focusing on the club DJ, the book gets first-hand accounts of the births of disco, hip-hop, house, and techno. Visiting legendary clubs like the Peppermint Lounge, Cheetah, the Loft, Sound Factory, and Ministry of Sound, and with interviews with legendary DJs, *Last Night a DJ Saved My Life* is a lively and entertaining account of musical history and some of the most legendary parties of the century. "Brewster and Broughton's ardent history is one of barriers and sonic booms, spanning almost 100 years, including nods to pioneers Christopher Stone, Martin Block, Douglas 'Jocko' Henderson, Bob 'Wolfman Jack' Smith and Alan 'Moondog' Freed." —Publishers Weekly

"TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 455: Alternative Technical Concepts for Contract Delivery Methods Transportation documents various methods by which agencies have successfully implemented alternative technical concepts (ATCs) during the highway contracting process. The report identifies methods that promote transparency and fairness, while at the same time protecting the industry's right to confidentiality. The U.S. Federal Highway Administration defines an ATC as "a request by a proposer to modify a contract requirement, specifically for that proposer's use in gaining competitive benefit during the bidding or proposal process ... [and] must provide a solution that is equal to or better than the owner's base design requirements in the invitation for bid or request for proposal document."--Publisher's note.

*Beyond Beatmatching* Springer

David Gibson uses 3D visual representations of sounds in a mix as a tool to explain the dynamics that can be created in a mix. This book provides an in-depth exploration into the aesthetics of what makes a great mix. Gibson's unique approach explains how to map sounds to visuals in order to create a visual framework that can be used to analyze what is going on in any mix. Once you have the framework down, Gibson then uses it to explain the traditions that have been developed over time by great recording engineers for different styles of music and songs. You will come to understand everything that can be done in a mix to create dynamics that affect people in really deep ways. Once you understand what engineers are doing to create the great mixes they do, you can then use this framework to develop your own values as to what you feel is a good mix. Once you have a perspective on what all can be done, you have the power to be truly creative on your own – to create whole new mixing possibilities. It is all about creating art out of technology. This book goes beyond explaining what the equipment does – it explains what to do with the equipment to make the best possible mixes.

Whatever your level of experience, *The Dance Music Manual* is packed with sound advice, techniques and practical examples to help you achieve professional results. Written by a professional producer and remixer, the book is organized into three accessible sections: Technology and theory If you're relatively new to the technology and theory behind today's dance music, Rick Snoman discusses the basics of MIDI, synthesis and sampling, as well as

music theory, effects, compression, microphone techniques and sound design. Dance genres This section covers techniques for producing different musical styles, including Trance, Trip Hop, Rap and House. Snoman takes a close look at the general programming principles behind drum loops, basses and leads for each genre, in addition to the programming and effects used to create the sounds. Mixing and promotion Snoman guides you through the art of mixing, mastering, remixing, pressing and publishing your latest masterpiece. This includes a look at how record companies operate, copyrighting your material, pressing your own records and the costs involved. Finally, guest contributors offer essential advice on DJ'ing and how to create your own website to promote your music. The CD provides demo tracks showing what can be achieved when applying the advice contained in the book, including examples of the quality difference before and after mixing and mastering. The CD also contains free software demos for you to download. In Teaching 'Proper' Drinking?, the author brings together three fields of scholarship: socio-historical studies of alcohol, Australian Indigenous policy history and social enterprise studies. The case studies in the book offer the first detailed surveys of efforts to teach responsible drinking practices to Aboriginal people by installing canteens in remote communities, and of the purchase of public hotels by Indigenous groups in attempts both to control sales of alcohol and to create social enterprises by redistributing profits for the community good. Ethnographies of the hotels are examined through the analytical lens of the Swedish 'Gothenburg' system of municipal hotel ownership. The research reveals that the community governance of such social enterprises is not purely a matter of good administration or compliance with the relevant liquor legislation. Their administration is imbued with the additional challenges posed by political contestation, both within and beyond the communities concerned. 'The idea that community or government ownership and management of a hotel

or other drinking place would be a good way to control drinking and limit harm has been commonplace in many Anglophone and Nordic countries, but has been less recognised in Australia.

Maggie Brady's book brings together the hidden history of such ideas and initiatives in Australia ... In an original and wide-ranging set of case studies, Brady shows that success in reducing harm has varied between communities, largely depending on whether motivations to raise revenue or to reduce harm are in control.' — Professor Robin Room, Director, Centre for Alcohol Policy Research, La Trobe University

Turntable Technique Taylor & Francis

First-place winner of the Society for Education Studies' 2005 book prize, *Education and Conflict* is a critical review of education in an international context. Based on the author's extensive research and experience of education in several areas afflicted by conflict, the book explores the relationship between schooling and social conflict and looks at conflict internal to schools. It posits a direct link between the ethos of a school and the attitudes of future citizens towards 'others'. It also looks at the nature and purpose of peace education and war education, and addresses the role of gender and masculinity. In five lucid, vigorously argued sections, the author brings this thought-provoking and original piece of

work to life by: \* Setting out the terms of the debate, defining conflict and peace and outlining the relevant aspects of complexity theory for education \* Exploring the sources of conflict and their relations to schooling in terms of gender/masculinity, pluralism, nationalism and identity \* Focusing on the direct education/war interface \* Examining educational responses to conflict \* Highlighting conflict resolution within the school itself. This is the first time that so many aspects of conflict and education have been brought together in one sustained argument. With its crucial exposure of the currently culpable role of formal schooling in maintaining conflict, this book will be a powerful and essential read for educational policy makers, managers, teachers and researchers dealing with conflict in their own contexts.

With detailed data from nine sites around the world, the authors examine how the so-called 'fragmentation' of these fragile landscapes occurs and the consequences of this break-up for ecosystems and the people who depend on them. 'Rangelands' make up a quarter of the world's landscape, and here, the case is developed that while fragmentation arises from different natural, social and economic conditions worldwide, it creates similar outcomes for human and natural systems.
