**Arab Orthodox Christians Under the Ottomans 1516-1831** ABC-CLIO

"An explosive global history that redefines the historical origins of the modern world through the life of Sultan Selim I and his Ottoman Empire. Long neglected in accounts of world history, the Ottoman Empire was a hub of flourishing intellectual fervor, geopolitical power, and enlightened pluralistic rule. At the helm of its ascent was the omnipotent Sultan Selim I (1470-1520), who, with the aid of his

extraordinarily gifted mother, Gèulbahar, hugely expanded the empire, propelling it onto the world stage. Aware of centuries of European suppression of Islamic history, Alan Mikhail centers Selim's Ottoman Empire and Islam as the very pivots of global history, redefining such world-changing events as Christopher Columbus's voyages-which originated, in fact, as a Catholic jihad that viewed Native Americans as somehow "Moorish"-the Protestant Reformation, the transatlantic slave trade, and the dramatic Ottoman seizure of the Middle East and North Africa. Drawing on previously unexamined sources and written in gripping detail, Mikhail's groundbreaking account vividly recaptures Selim's life and world. An historical masterwork, God's Shadow

radically reshapes our understanding of a world we thought we knew"--

Following the so called "Arab Spring" the world's attention has been drawn to the presence of significant minority religious groups within the predominantly Islamic Middle East. Of these minorities Christians are by far the largest, comprising over 10% of the population in Syria and as much as 40% in Lebanon. The largest single group of Christians are the Arabic-speaking Orthodox. This work fills a major lacuna in the scholarship of wider Christian history and more specifically that of lived religion within the Ottoman empire. Beginning with a survey of the Christian community during the first nine hundred

years of Muslim rule, the author traces the evolution of Arab Orthodox Christian society from its roots in the Hellenistic culture of the Byzantine Empire to a distinctly Syro-Palestinian identity. There follows a detailed examination of this multi-faceted community, from the Ottoman conquest of Syria, Palestine and Egypt in 1516 to the Egyptian invasion of Syria in 1831. The author draws on archaeological evidence and previously unpublished primary sources uncovered in Russian archives and Middle Eastern monastic libraries to present a vivid and compelling account of this vital but little-known spiritual and political culture, situating it within a complex network of relations reaching throughout the Mediterranean, the Caucasus and Eastern Europe. The work

is made more accessible to a non-specialist reader by the addition of a glossary, whilst the scholar will benefit from a detailed bibliography of both primary and secondary sources. A foreword has been contributed to this first English language edition by the Patriarch of Antioch, John X. It contextualizes the history found in this work within the ongoing struggle to preserve the ancient Christian cultures of the Arabic speaking peoples from extinction within their ancestral homeland.

### **The History of the Ottoman Empire**

Rowman & Littlefield

Up until the end of the eighteenth century, the way Ottomans used their clocks conformed to the inner logic of their own temporal culture. However, this began to change rather dramatically during the nineteenth century, as the Ottoman Empire was increasingly assimilated into the European-dominated global economy and the project of modern state building began to gather momentum. In *Reading Clocks*, Alla

Turca, Avner Wishnitzer unravels the complexity of Ottoman temporal culture and for the first time tells the story of its transformation. He explains that in their attempt to attain better surveillance capabilities and higher levels of regularity and efficiency, various organs of the reforming Ottoman state developed elaborate temporal constructs in which clocks played an increasingly important role. As the reform movement spread beyond the government apparatus, emerging groups of officers, bureaucrats, and urban professionals incorporated novel time-related ideas, values, and behaviors into their self-consciously “modern” outlook and lifestyle. Acculturated in the highly regimented environment of schools and barracks, they came to identify

efficiency and temporal regularity with progress and the former temporal patterns with the old political order. Drawing on a wealth of archival and literary sources, Wishnitzer's original and highly important work presents the shifting culture of time as an arena in which Ottoman social groups competed for legitimacy and a medium through which the very concept of modernity was defined. *Reading Clocks, Alla Turca* breaks new ground in the study of the Middle East and presents us with a new understanding of the relationship between time and modernity.

Modern World History Oxford University Press

This book is a comparative study of

imperial organization and longevity that assesses Ottoman successes as well as failures against those of other empires with similar characteristics. Barkey examines the Ottoman Empire's social organization and mechanisms of rule at key moments of its history, emergence, imperial institutionalization, remodeling, and transition to nation-state, revealing how the empire managed these moments, adapted, and averted crises and what changes made it transform dramatically. The flexible techniques by which the Ottomans maintained their legitimacy, the cooperation of their diverse elites both at the center and in the provinces, as well as their control over economic and human resources were responsible for the longevity of this particular 'negotiated empire'. Her

analysis illuminates topics that include imperial governance, imperial institutions, imperial diversity and multiculturalism, the manner in which dissent is handled and/or internalized, and the nature of state society negotiations.

The prophet Muhammad and the early Islamic community radically redefined the concept of time that they had inherited from earlier religions' beliefs and practices. This new temporal system, based on a lunar calendar and era, was complex and required sophistication and accuracy. From the ninth to the sixteenth centuries, it was the Muslim astronomers of the Ottoman, Safavid and Mughal empires who were

responsible for the major advances in mathematics, astronomy and astrology. This fascinating study compares the Islamic concept of time, and its historical and cultural significance, across these three great empires. Each empire, while mindful of earlier models, created a new temporal system, fashioning a new solar calendar and era and a new round of rituals and ceremonies from the cultural resources at hand. This book contributes to our understanding of the Muslim temporal system and our appreciation of the influence of Islamic science on the Western world.

The definitive history of the Ottoman Empire The Ottoman Empire was one of the largest and most influential empires in world history. Its reach extended to three continents and it survived for more than six centuries, but its history is too often colored by the memory of its bloody final throes on the battlefields of World War I. In this magisterial work-the first definitive account written for the general reader-renowned scholar and journalist Caroline Finkel lucidly recounts the epic story of the Ottoman Empire from its origins in the thirteenth century through its destruction in the twentieth.

### **Empire Building and Representation**

**in the Ottoman Civil War of  
1402-1413** Penguin

Since the Turks first shattered the glory of the French crusaders in 1396, the Ottoman Empire has exerted a long, strong pull on Western minds. For six hundred years, the Empire swelled and declined. Islamic, martial, civilized, and tolerant, in three centuries it advanced from the dusty foothills of Anatolia to rule on the Danube and the Nile; at the Empire's height, Indian rajahs and the kings of France beseeched its aid. For the next three hundred years the Empire seemed ready to collapse, a prodigy of survival and decay. Early in the twentieth century it fell. In this dazzling evocation of its power, Jason Goodwin explores how the Ottomans rose and how, against all odds, they lingered on.

In the process he unfolds a sequence of mysteries, triumphs, treasures, and terrors unknown to most American readers. This was a place where pillows spoke and birds were fed in the snow; where time itself unfolded at a different rate and clocks were banned; where sounds were different, and even the hyacinths too strong to sniff. Dramatic and passionate, comic and gruesome, *Lords of the Horizons* is a history, a travel book, and a vision of a lost world all in one.

Cairo's Islamic monuments are part of an uninterrupted tradition that spans over a thousand years of building activity. No other Islamic city can equal Cairo's spectacular heritage, nor trace its historical and architectural development

with such clarity. The discovery of this historic core, first visually by nineteenth-century western artists then intellectually by twentieth-century Islamic art specialists, now awaits the delight of the general visitor. This new, fully revised edition of a popular and handy guide continues to walk the visitor around two hundred of the city's most interesting Islamic monuments. It also keeps pace with recent restoration initiatives and newly opened monuments such as the Amir Taz Palace and the Sitt Wasila House. "This book ought to be in the luggage of every visitor to Cairo. Furthermore, once home, lovers and students of Cairo's architecture will find it a convenient and accurate quick reference as well as a cherished souvenir of many profitable and

enjoyable rambles among the monuments of Cairo." -Jonathan M. The grand narrative of "The Young Turk Legacy and Nation Building" is that of the essential continuity of the late Ottoman Empire with the Republic of Turkey that was founded in 1923. Erik J. Zürcher shows that Kemal's 'ideological toolkit', which included positivism,

militarism, nationalism and a state-centred world view, was shared by many other Young Turks. Authoritarian rule, a one-party state, a legal framework based on European principles, advanced European-style bureaucracy, financial administration, military and educational reforms and state-control of Islam, can all be found in the late Ottoman Empire, as can policies of demographic engineering. The book focuses on the attempts of the Young Turks to save their empire through forced modernization as well as on the attempts of their Kemalist successors to build a strong national state. The decade of almost continuous warfare, ethnic conflict and forced migration between 1911 and 1922 forms the background to these attempts and accordingly occupies

a central position in this volume. This is a powerful history reflecting and contributing to the latest research from a leading historian of modern Turkey. It is essential for all readers interested in the history of the Ottoman Empire and Turkey, and for an understanding of a key player in the politics of the Middle East and Europe.

The World Guide to CSR is the first book to provide comparable national profiles that describe the evolution and practice of Corporate Sustainability and Responsibility (CSR) for 58 countries and 5 global regions. Each regional and national profile includes key information about the relevant CSR history, country-specific issues, trends, research and

leading organizations. The purpose of the book is to give CSR professionals (including managers, consultants, academics and NGOs focusing on the social, environmental and ethical responsibilities of business) a quick reference guide to CSR in different regional and national contexts. The need for the book is premised on the fact that CSR professionals and researchers more often than not have a multinational remit and are required to benchmark performance internationally, but find that country-specific CSR information is ad hoc, limited or non-existent. Even where national CSR research exists, it is often hidden in academic journals that practitioners cannot access or do not have the time or inclination to read. The

book is an edited volume, with expert contributors from around the world, all of whom have been screened and selected on the basis of their qualifications and experience in CSR. Each regional/country profile includes the following subsections: CSR in context Priority issues Trends Legislation and codes Organizations Case studies Educational institutions References This unique resource will be an essential acquisition for all organisations who need to benchmark their CSR strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to corporate social responsibility in all of the markets in which they operate.
