SketchUp to LayOut Pearson Higher Ed

Practical guide addressing the specific needs of interior designers and explaining the latest features of the professional, subscription-based version of SketchUp. SketchUp for Interior Design, Second Edition shows interior designers, interior architects, and students how to design and model with this software. How to create 3D models and space plans, furniture, cabinetry, accessories, experiment with colors and materials, import manufacturers' models, and make client presentations and animated walk-throughs are all covered in a step-by-step tutorial manner. This edition also includes expanded information on the LayOut feature, the Component and Extension Warehouses, and updates on the latest tools and functions. Each chapter is packed with screenshots, making the instructions easy to follow. Files on a companion site allow readers to play along with the book's examples. In SketchUp for Interior Design, readers will: Choose a template and navigate the interface. Use fundamental tools such as push/pull, circle, rectangle, eraser, pencil, move, and modifiers to make those tools perform different functions. Import paper sketch and AutoCAD plans, and trace over them for quick modeling. Download and install toolbars from the Extension Warehouse and other sites. Create scaled, 2D graphics from the model. Make tables of design components for costs and contractors. With comprehensive, accessible coverage of SketchUp and its practical application, SketchUp for Interior Design is an essential reference for professionals, hobbyists, students, and anyone who wants to create spaces and communicate their ideas.

The Complete Guide to Sketchup Pro: All You Need to Know for Mastering Sketchup Pro, Using the Power of Extension and Layout John Wiley & Sons

A start-to-finish roadmap on incorporating drone technology into your AEC firm workflow *Drone Technology in Architecture, Engineering and Construction: A Strategic Guide to Unmanned Aerial Vehicle Operation and Implementation* is the only process-driven, step-by-step handbook to implement drone technology in AEC workflows. It provides a comprehensive and practical roadmap for architecture, engineering, and construction firms to incorporate drones into their design and construction processes. The book offers extensive information on drone data processing, and includes guidance on how to acquire, manipulate and use the various data types produced from drone flights. The creation of three-dimensional data and visualizations are covered in-depth. *Drone Technology* reviews how to select and fly drones based on data needs and initial costs, and how to collect and maintain required flight logs, licenses, and permits. *Drone Technology* uses several real-world project examples that demonstrate and explain how drones can be used to collect: · Full-color orthorectified imagery · Accurate 3D point cloud and mesh models · Topographic contours · Digital Elevation Models (DEMs) The project examples also describe how these datasets can be integrated with 3D models of proposed conditions, photos, and other project datasets. *Drone Technology in Architecture, Engineering and Construction* is an essential guide for a wide variety of professionals, from civil engineers to landscape architects. It provides information on professional use of drones for

those just considering the technology, to those already flying drones professionally. It is an invaluable guide for anyone working in the design or construction of buildings and landscapes. *Sketchup Success for Woodworkers: Four Simple Rules to Create 3D Drawings Quickly and Accurately* John Wiley & Sons

A guide for leveraging SketchUp for any project size, type, or style. New construction or renovation. The revised and updated second edition of *The SketchUp Workflow for Architecture* offers guidelines for taking SketchUp to the next level in order to incorporate it into every phase of the architectural design process. The text walks through each step of the SketchUp process from the early stages of schematic design and model organization for both renovation and new construction projects to final documentation and shows how to maximize the LayOut toolset for drafting and presentations. Written by a noted expert in the field, the text is filled with tips and techniques to access the power of SketchUp and its related suite of tools. The book presents a flexible workflow method that helps to make common design tasks easier and gives users the information needed to incorporate varying degrees of SketchUp into their design process. Filled with best practices for organizing projects and drafting schematics, this resource also includes suggestions for working with LayOut, an underused but valuable component of SketchUp Pro. In addition, tutorial videos compliment the text and clearly demonstrate more advanced methods. This important text: Presents intermediate and advanced techniques for architects who want to use SketchUp in all stages of the design process Includes in-depth explanations on using the LayOut tool set that contains example plans, details, sections, presentations, and other information Updates the first edition to reflect the changes to SketchUp 2018 and the core functionalities, menus, tools, inferences, arc tools, reporting, and much more Written by a SketchUp authorized trainer who has an active online platform and extensive connections within the SketchUp community Contains accompanying tutorial videos that demonstrate some of the more advanced SketchUp tips and tricks Written for professional architects, as well as professionals in interior design and landscape architecture, *The SketchUp Workflow for Architecture* offers a revised and updated resource for using SketchUp in all aspects of the architectural design process.

SketchUp for Builders John Wiley & Sons

A practical guide to SketchUp addressing the specific needs of interior designers Already a common and popular tool for architects and landscape architects, SketchUp is increasingly finding a place in the professional workflow of interior designers. SketchUp for Interior Design is a practical introduction for interior designers and students who want to learn to use the software for their unique needs. The book covers the basics of creating 3D models before showing how to create space plans, model furniture, cabinetry, and accessories, experiment with colors and materials, incorporate manufacturers' models into project plans, and create final presentations and animated walk-throughs for clients. Each chapter includes clear explanations and helpful illustrations to make this an ideal introduction to the topic. Includes downloadable sample models and 39 tutorial videos Features sample questions and activities for instructors and additional online resources for students and self-learners Provides instruction on using SketchUp in both PC and Mac formats

The SketchUp Workflow for Architecture For Dummies

Combine traditional techniques with modern media for more communicative renderings Digital Drawing for Landscape Architecture: Contemporary Techniques and Tools for Digital Representation in Site Design, Second Edition bridges the gap between traditional analog and new digital tools by applying timeless concepts of representation to enhance design work in digital media. The book explores specific techniques for creating landscape designs, including digitally rendered plans, perspectives, and diagrams, and the updated second edition offers expanded coverage of newer concepts and techniques. Readers will gain insight into the roles of different drawings, with a clear emphasis on presenting a solid understanding of how diagram, plan, section, elevation, and perspective work together to present a comprehensive design approach. Digital rendering is faster, more efficient, and more flexible than traditional rendering techniques, but the design principles and elements involved are still grounded in hand-rendering techniques. Digital Drawing for Landscape Architecture exploits both modalities to help designers create more beautiful, accurate, and communicative drawings in a professional studio environment. This second edition contains revised information on plan rendering techniques, camera matching workflow, and color selection, along with brand new features, like: Time-based imagery and tools Workflow integration techniques Photoshop and Illustrator task automation Over 400 updated images, plus over 50 new examples of award-winning work The book takes a tutorial-based approach to digital rendering, allowing readers to start practicing immediately and get up to speed quickly. Communication is a vital, but often overlooked component of the design process, and designers rely upon their drawings to translate concepts from idea to plan. Digital Drawing for Landscape Architecture provides the guidance landscape designers need to create their most communicative renderings yet.

Google SketchUp Workshop Courier Corporation

The only comprehensive SketchUp guide written for builders and contractors SketchUp is a 3D modeling application used in areas ranging from civil and mechanical engineering to motion picture and video game design. Three-dimensional modeling is of obvious value to the building industry—yet resources for transforming architectural designs into reality is surprisingly limited. SketchUp for Builders is the first comprehensive guide designed specifically for builders and contractors, providing step-by-step instructions on incorporating 3D modeling into all phases of the construction process. Author John Brock draws from his 30 years of experience as a custom home designer and builder to provide practical advice on how to understand what you are building before it is built. This valuable guide demonstrates how to eliminate cost overruns, construction delays, and design flaws by integrating SketchUp modeling into your workflow. Emphasizing real-world practicality, this book covers all of the essential components of modeling a 3D construction project, from SketchUp fundamentals and object basics to importing construction drawings and increasing project efficiency with extensions and plugins. All phases of construction are clearly explained, including foundations, walls and floor systems, roof and mechanical systems, and exterior and interior finishes. Supplies a constructability process for efficient and cost-effective build projects Offers step-by-step guidance for creating construction documents, renderings, animations, virtual reality tours, and more Integrates SketchUp into all stages of the construction process Provides access to resources such as web tutorials, blogs, and the online SketchUp community Demonstrates

how to generate construction documents with accompanying Layout software SketchUp for Builders: A Comprehensive Guide for Creating 3D Building Models Using SketchUp in an indispensable source of information for contractors and builders, architects, interior designers, landscape architects, construction professionals, and anyone seeking to create 3D models of the design and construction process.

Google SketchUp Cookbook John Wiley & Sons

Create beautiful 3D models and presentations with SketchUp Pro and LayOut. SketchUp to LayOut, 2nd edition is a complete beginner's guide for learning SketchUp and LayOut. Effortlessly turn your ideas into 3D models using SketchUp, then document them in SketchUp's companion drawing program, LayOut. Even if you've never designed in 3D before, this book will guide you step by step. In addition to developing a complete understanding of SketchUp and LayOut basics, you'll learn advanced topics that will build upon your new skills: Learn the five steps to creating scenes in SketchUp that will give you full control over the look of your SketchUp models in LayOut. Master the most important modeling concepts, such as model organization, object visibility, tag theory, and level of detail, to become more efficient and enable faster editing of your projects. Discover several advanced techniques to develop custom workflows that work best for you and your preferences. The only book you'll need to master SketchUp & LayOut!

SketchUp For Dummies Taylor & Francis

The site designer's guide to SketchUp's powerful modeling capabilities SketchUp for Site Design is the definitive guide to SketchUp for landscape architects and other site design professionals. Step-by-step tutorials walk you through basic to advanced processes, with expert guidance toward best practices, customization, organization, and presentation. This new second edition has been revised to align with the latest software updates, with detailed instruction on using the newest terrain modeling tools and the newly available extensions and plug-ins. All graphics have been updated to reflect the current SketchUp interface and menus, and the third part of the book includes all-new content featuring the use of new grade and terrain extensions. Developed around the needs of intermediate professional users and their workflows, this book provides practical all-around coaching on using SketchUp specifically for modeling site plans. SketchUp was designed for usability, with the needs of the architect, industrial designer, and engineers at center stage. This book shows you how the software's powerful terrain and grade functions make it an ideal tool for site designers, and how to seamlessly integrate it into your workflow for more efficient design and comprehensive planning. Master the SketchUp basics, navigation, components, and scripts Turn 2D sketches into 3D models with volume, color, and material Create detailed site plans, custom furnishings, gradings, and architecture Learn sandbox tools, organization strategies, and model presentation tips SketchUp has undergone major changes since the publication of this guide's first edition, with its sale to Trimble Navigation bringing about a number of revisions and the availability of more immediately useful features. SketchUp for Site Design shows you how to harness the power of this newly expanded feature set to smooth and optimize the site design workflow.

Construction Documents Using SketchUp Pro 2020: A Short Project-based Course to Increase Your Effectiveness at Using SketchUp and Give You a Truly Pro Tuttle Publishing
Google SketchUp for Site Design illustrates a holistic approach to SketchUp: how it works and more

importantly, what to do with it. Filled with tutorials from front to back, the book focuses on the start and completion of projects that include rich detail and expression. Each part and chapter of the book builds on the previous chapters and tutorial. You will learn how to approach modeling site plans, buildings and site elements: from modeling each of these exterior environment elements to piecing them together to generate a singular and expressive model. The book culminates with tutorials demonstrating effective and simple ways to include grades and terrain using the Sandbox tools and how best to integrate the entire approach with AutoCAD and SketchUp. Also included are links to supplemental on-line resources such as YouTube tutorials and free tutorial and example models from 3D Warehouse. The book is useful for all SketchUp proficiency levels including beginners, hobbyists, and professionals.

Towards a New Architecture John Wiley & Sons

Go 3D with Google's exciting architectural design software for Mac and Windows Whether you need to learn 3D modeling for business or you're just eager to see what you can create, Google SketchUp and Google SketchUp 8 For Dummies are for you. Available in both a free hobbyist version and a full-featured professional version, SketchUp explodes the myth that 3D modeling software must be complicated to learn and use. This book will take you step by step through downloading and using both versions on both Mac and Windows. There are even video walkthroughs on the companion Web site. Google's exciting 3D modeling software offers hobbyists as well as architects, engineers, and industrial designers a less complicated tool for architectural rendering, urban planning, set design, game design, and other uses This guide explains both the free and professional versions for both Windows and Mac Covers the basic concepts of 3D modeling and how to build a 3D model, print or share your work online, export your drawing to another design package or Google Earth, and create a detailed set of plans Companion Web site features video walkthroughs Google SketchUp 8 For Dummies gets you up and running with 3D modeling quickly and easily.

SketchUp for Site Design John Wiley & Sons

The 2nd edition of Chopra's Google SketchUp provides key pedagogical elements, which help prepare readers for the workforce. The content provides real-world and applied material including better PowerPoint presentations and how-to animations. Additional features include updated content to reflect software upgrades and market use; new pedagogy elements and interior design; and more robust resources that will be appropriate for different users of Google Sketch. The book also addresses the similarities between the adapted title, Google SketchUp 8 for Dummies, and Google SketchUp 2. This includes a title that contains the core content and basic software how-to from For Dummies; revised TOC to reflect the course; and new material developed/written by writer and academic advisors/reviewers. This edition goes beyond the basic software use to teach on portions of SketchUp.

CreateSpace

SUPERB EXECUTION RELIES UPON RIGOROUS PROJECT DOCUMENTATION A project will only be built as well as it is documented. This publication focuses on the key documentation needs of the landscape architectural design and construction documentation process. That includes both "design documentation" and "construction documentation" as well as all that which occurs in the transition from one phase to the other. Documentation requirements include those components necessary to

explore and define design intent, logic, physical proposals, and ultimately, the specific components included within construction and bid documents. Discover how proper documentation facilitates every stage of the design process from pre-planning to construction, and leads to a highly resolved built outcome. Understand the principles behind these documentation practices. Implement best practices specific to each documentation phase and drawing, from title block and cover sheet design to soil plans and plant protection. Organize keynoting systems, cross-referencing and interdisciplinary coordination amongst multiple consultants and vendors. Study sample project documents from a leading landscape architecture firm to better understand the elements and benefits of complete and well-coordinated project documentation. These standards have been time-tested by over 150 designers at the industry leading landscape architecture firm Design Workshop, reflecting a range of project types, including parks, streetscapes, urban spaces and over-structure construction. This guide shares the methods behind the success, to facilitate exceptional built outcomes through principled documentation practices.

Architectural Design with SketchUp Packt Publishing Ltd

Pioneering manifesto by founder of "International School." Technical and aesthetic theories, views of industry, economics, relation of form to function, "mass-production split," and much more. Profusely illustrated.

3D Printing with SketchUp SDC Publications

As the first book for intermediate and advanced users of Google SketchUp, this Cookbook goes beyond the basics to explore the complex features and tools that design professionals use. You'll get numerous step-by-step tutorials for solving common (and not so common) design problems, with detailed color graphics to guide your way, and discussions that explain additional ways to complete a task. Google SketchUp Cookbook will help you: Use SketchUp more efficiently by taking advantage of components and groups Learn new techniques for using Follow Me, Intersect, and constraints Go beyond simple textures with tools such as texture positioning and Photo Match Create animations and walkthroughs, and explore design scenarios by using layers and scenes Learn how to use styles to customize your presentations Combine SketchUp with the 3D Warehouse and Google Earth Google SketchUp Cookbook is ideal for architects, engineers, interior designers, product designers, woodworkers, and other professionals and hobbyists who want to work more efficiently and achieve true mastery of this amazing tool.

Architectural Design with SketchUp John Wiley & Sons

This book "sets out to change the current conversation about what it means to get older. In it, Jenkins chronicles her own journey, as well as those of others who are making their mark as disrupters, to show readers how we can all be active, financially unburdened, and happy as we get older. It's [a] ... narrative that touches on all the important issues facing people 50+ today, from caregiving and mindful living to building age-friendly communities and attaining financial freedom"--

Foundations of Landscape Architecture John Wiley & Sons

A modern, comprehensive, and practical guide to help you master SketchUp. Whether you are looking to learn the basics or hone your skills and get winning tips, *The Complete Guide to SketchUp Pro* will give you the tools you need. This guide encompasses the entire software, demonstrates the complete set of commands, and is accompanied by examples, exercises, and screenshots. It is adapted to all versions of SketchUp and is suitable for professionals of the extended design community. In this step-by-step guide you will learn: how to incorporate advanced commands how to create an impressive presentation how to export data, while emphasizing the correct and most efficient ways of working in SketchUp Yael Kedem, interior designer, founder, and owner of SketchUp Center in Israel has a rich experience of mentoring thousands of people. In her book, she shares her knowledge to help you make your wild design ideas a simple reality.

SketchUp for Interior Design John Wiley & Sons

The first step in making your ideas a reality SketchUp offers a vast array of tools that help you get

your building, woodworking, and design plans out of your head and into a real model. Even if you've never dabbled in the software, SketchUp All-in-One For Dummies makes it easy to get started as quickly as the ideas pop into your head! Providing real-world insight from top SketchUp insiders, these six-books-in-one teach you how to tackle the basics of the program and apply those skills to real-world projects. You'll discover the basics of modeling as they apply to either free or paid versions of SketchUp before diving into creating models to use for making objects, constructing buildings, or redesigning interiors. Navigate the SketchUp product mix Get familiar with the basics of modeling View and share your models Make your architecture, interior design, and woodworking dreams a reality You have tons of great ideas—and now you can harness this powerful software to bring them to life.

Google SketchUp and SketchUp Pro 7 Bible John Wiley & Sons

"... the book is wonderfully illustrated with full color and descriptive images that complement each tutorial or exercise. Alex's teaching background really rings through as every item is nicely structured and very informative. Overall Alex's book is a winner. Well structured, illustrated and most of all easy to read and understand. While the overall theme is based in architecture, the techniques can be applied to any discipline and the wide range of topics covered are excellently delivered." -Richard O'Brien, CatchUp Editor, the official SketchUcation newsletter The one-stop guide to SketchUp for architects, designers, and builders SketchUp is the tool of choice for architects, interior designers, and construction professionals. Though the basics are simple to understand, getting the most out of it requires deeper instruction and guidance. Architectural Design with Google SketchUp uses easy-to-understand tutorials to describe both common and advanced process, illustrated throughout with full-color renderings. Handy sidebars throughout the book cover fundamentals and background information End-of-chapter exercises help readers master new skills and techniques A robust companion website includes helpful videos, sample files, and plug-ins

Mastering the Art of 3D Construction Modeling Apress

Google SketchUp & SketchUp Pro Bible will target design professionals who are increasingly turning to SketchUp and SketchUp Pro to easily create professional quality designs and design presentations. This book will cover creating 2D and 3D designs, exporting models to Google Earth, and using LayOut to create professional quality design presentations. Offering everything that a professional or hobbyist needs to know, Google SketchUp and SketchUp Pro Bible will include tips and tricks to make using this software easy and efficient. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.
