Psathas's One Study One Summary (2005) is a cutting-edge work for marimba, with junk percussion & digital audio, that is a favourite among virtuosic solo percussionists. As the title suggests, it is cast in two movements, and while the work exhibits the 'busy' motoric textures for which Psathas is well-known, reflective, atmospheric textures predominate throughout. The electronic sounds and beats in the digital audio part provide an evocative palette for the live percussionist to interact with. Please note that the digital audio files are not provided with this version of the score from GooglePlay. You may download the files here: <https://43.dpdcart.com/product/110559>
Kamus musik Infobase Publishing Musical Worlds in Yogyakarta addresses themes of social identity and power, counterpoising Pierre Bourdieu's theories on class, gender and nation with the author's alternative perspectives of intergroup social capital, physicality and grounded cosmopolitanism. The author argues that Yogyakarta is exemplary of how everyday people make use of music to negotiate issues of power and at the same time promote peace and intergroup

appreciation in culturally diverse inner-city settings.

Structure and Style, first published in 1962 and expanded in 1979, fills the need for new ways of analysis that put 20th-century music in perspective. It spans forms in use before 1600 through forms and techniques in use today. Anthology of Musical Forms provides musical examples of forms treated in Structure and Style. Some examples are analyzed throughout. Most are left for the student to analyze. These books reflect Leon Stein's impressive background as student, musician, and composer. Stein studied composition with Leo Sowerby, Frederick Stock (conductor of the Chicago Symphony) and orchestration with Eric DeLamarter, his assistant. He earned M. Mus and Ph.D degrees at DePaul University and was associated with its School of Music as director of the Graduate Division and chairman of the Department of Theory and Composition until his retirement in 1976. He has

composed a wide variety of works, including compositions for orchestra, chamber combinations, two operas, and a violin concerto.

The Advancement of Music in Enlightenment England Schott Music
Originally published in the 1940s, Paul Hindemith's remarkable textbooks are still the outstanding works of their kind. In contrast to many musical textbooks written by academic musicians, these were produced by a man who could play every instrument of the orchestra, could compose a satisfying piece for almost every kind of ensemble, and who was one of the most stimulating teachers of his day. It is therefore not surprising that nearly forty years later these books should remain essential reading for the student and the professional musician.

Buku Ajar Seni Musik Kanisius
This important study in ethnomusicology is an attempt by the author -- a musician who has become a social anthropologist --

to compare his experiences of music-making in different cultures. He is here presenting new information resulting from his research into African music, especially among the Venda. Venda music, he discovered is in its way no less complex in structure than European music. Literacy and the invention of nation may generate extended musical structures, but they express differences of degree, and not the

difference in kind that is implied by the distinction between 'art' and 'folk' music. Many, if not all, of music's essential processes may be found in the constitution of the human body and in patterns of interaction of human bodies in society. Thus all music is structurally, as well as functionally, 'folk' music in the sense that music cannot be transmitted of have meaning without associations

between people. If John Blacking's guess about the biological and social origins of music is correct, or even only partly correct, it would generate new ideas about the nature of musicality, the role of music in education and its general role in societies which (like the Venda in the context of their traditional economy) will have more leisure time as automation increases.
