The Anthroposophical Soul Calendar and the Incarnation Cycle of Man Cambridge University Press
This book takes a completely new look at the Anthroposophical

Soul Calendar. It is about the deeper meaning of the fifty-two weekly verses, which has remained essentially unexplored in the last hundred years since the first edition by Rudolf Steiner. A dense veil of Isis was spread over them, of which is well known that no mortal person can lift it. Only the immortal, psycho-spiritual human being, who knows himself at home in the extrasensory, higher worlds, is capable of doing this. Only to him the weekly verses reveal themselves as a travel guide through these worlds and lift him up to ever higher spiritual-cosmic realms until he reaches the experience of God, from where he gradually descends again into a new life on

Earth, enriched in spirit and fertilized in his soul. If the reader embarks on this journey, the spiritual archetype of the Soul Calendar is ultimately unveiled to him and he achieves an extended understanding of Man and Christ. By many quotations from Rudolf Steiner's lectures and books, the author virtually lets Steiners himself elucidate the breathtaking depths of his mysterious weekly verses.

It is the stuff of fiction: A collection of stories, never made public, is lost in a drawer for thirty years until, miraculously, the stories are discovered and published. It is also the true story of the

book you are holding in your hands. Mary Ladd Gavell died in 1967 at the age of forty-seven, having published nothing in her lifetime. She was the managing editor of *Psychiatry* magazine in Washington, D.C., and after her death, her colleagues ran her story "The Rotifer" in the magazine as a tribute. The story was, somehow, plucked from that nonliterary journal and selected for *The Best American Short Stories 1967*. And again, thirty-three years later, "The Rotifer" emerged from near obscurity when John Updike selected it for *The Best American Short Stories of the Century*. In his Introduction to that collection, Updike called Gavell's story a "gem" and said that

her writing was "feminism in literary action." "The Rotifer" has remained, until now, Gavell's only published work. The sixteen stories collected here include the anthologized classic "The Rotifer," in which a young woman learns the extent to which a bit of innocent interference, or the refusal to interfere, can change the course of lives. "The Swing" depicts a mother's strange reconnection to her adult son's childhood as she is summoned outside, night after night, by the creak of his old swing. "Baucis" introduces a woman longing for widowhood who is cheated of the respite she craves and whose last words are tragically misunderstood by her

family. The title story, based on the last-minute announcement by Gavell's own son that he was in a school play, is infused with the gentle humor and vivid insights that make all of Mary Ladd Gavell's stories timeless and utterly beguiling. With the publication of *I Cannot Tell a Lie, Exactly*, Mary Ladd Gavell takes her rightful place among the best writers of her, and our, time.

Charting their training,

travels, and performances, this innovative study explores the role of the artists that roamed the Chinese countryside in support of Mao's communist revolution. DeMare traces the development of Mao's 'cultural army' from its genesis in Red Army propaganda teams to its full development as a largely civilian force composed of amateur and professional drama troupes in the early years of the People's Republic of China (PRC). Drawing from memoirs, artistic handbooks, and rare archival sources, Mao's Cultural Army uncovers the arduous and complex process of creating revolutionary dramas that would appeal to China's all-important rural audiences. The

Communists strived for a disciplined cultural army to promote party policies, but audiences often shunned modern and didactic shows, and instead clamoured for traditional works. DeMare illustrates how drama troupes, caught between the party and their audiences, did their best to resist the ever growing reach of the PRC state.

In *Diagrams for Living* he presents valuable keys to living a more fulfilled life drawn from the eloquent spiritual wisdom of the Bible. If we read the Bible literally, cautions Fox, we miss the eternal power and personal relevance found in its symbols, allegories, and parables.

owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the

a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or

orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

But as a small American team clandestinely enters Tehran to lead the way for the rescue force, a traitor spills the secret and KGB Spetsnaz operatives begin their own search for the weapon.
