Analysing Discourse

Springer Science &
Business Media

This volume explores the interplay of syntactic variation and genre. How do genres emerge and what is the role of syntax in constituting them? Why do certain constructions appear in certain types of text? The book takes the concept of genre as a reference-point for the description and analysis of morpho-syntactic variation and change. It includes both overviews of theoretical approaches to the concept of genre and text type in linguistics and studies of specific syntactic phenomena in English, German, and selected Romance languages. Contributions to the volume make use of insights from attempts for text classification and rhetorical views on genre and reach from quantitative, corpus-based methodology to qualitative, text-based analyses. The types of texts investigated cover spoken, highly interactive, and written forms of communication, including

selected genres of computer-mediated communication. Corpus data come from both synchronic and diachronic linguistic corpora, such as LOB, Brown, FLOB, Frown, ARCHER, and ICE-Jamaica. This spectrum both in approaches and data is meant to provide a theoretical foundation as well as a realistic view of the inherent complexity of form-function relationships in syntax. At the same time, genre is treated as a category relevant beyond discourse studies, consisting of forms and conventions at all levels of linguistic analysis, including syntax. The book is therefore of interest to linguists and graduate students in the area of syntax, discourse analysis, and pragmatics, as well as to sociolinguists and corpus linguists working on register variation.

John Benjamins Publishing
In this groundbreaking, cross-disciplinary book, Rebecca Rogers explores the complexity of family literacy practices through an in-depth case study of one family, the attendant issues of power and identity, and

contemporary social debates about the connections between literacy and society. The study focuses on June Treader and her daughter Vicky, urban African Americans labeled as "low income" and "low literate." Using participant-observation, ethnographic interviewing, photography, document collection, and discourse analysis, Rogers describes and explains the complexities of identity, power, and discursive practices that June and Vicky engage with in their daily life as they proficiently, critically, and strategically negotiate language and literacy in their home and community. She explores why, despite their proficiencies, neither June or Vicky sees themselves as literate, and how this and other contradictions prevent them from transforming their literate capital into social profit. This study contributes in multiple ways to extending both theoretically and empirically existing research on literacy, identity, and power: * Critical discourse analysis. The analytic technique of

critical discourse analysis is brought into the area of family literacy. The detailed explanation, interpretation, and demonstration of critical discourse analysis will be extremely helpful for novices learning to use this technique. This is a timely book, for there are few ethnographic studies exploring the usefulness and limits of critical discourse analysis. * Combines critical discourse analysis and ethnography. This new synthesis, which is thoroughly illustrated, offers an explanatory framework for the stronghold of institutional discursive power. Using critical discourse analysis as a methodological tool in order to build critical language awareness in classrooms and schools, educators working toward a critical social democracy may be better armed to recognize sources of inequity. * Researcher reflexivity. Unlike most critical discourse analyses, throughout the book the researcher and analyst is clearly visible and complicated into the role of power and language. This practice allows clearer analysis of the ethical, moral, and theoretical implications in conducting ethnographic

research concerned with issues of power. * A critical perspective on family literacy. Many discussions of family literacy do not acknowledge the raced, classed, and gendered nature of interacting with texts that constitutes a family's literacy practices. This book makes clear how the power relationships that are acquired as children and adults interact with literacy in the many domains of a family's literacy lives. A Critical Discourse Analysis of Family Literacy Practices: Power In and Out of Print will interest researchers and practitioners in the fields of qualitative methodology, discourse analysis, critical discourse studies, literacy education, and adult literacy, and is highly relevant as a text for courses in these areas. **Using Corpus Analysis to Describe Discourse Structure** Routledge An understanding of genres in communication (written and spoken) is essential to professional success. This volume studies situationally appropriate responses in professional communication in face-to-face interaction and distance communication,

from a socio-cognitive point of view. A traditional rhetorical approach does not give much insight in the ways in which genres are embedded in communicative activity or how actors draw upon genre knowledge to perform effectively. However, if genres are considered as embedded in social interaction "as typified forms of typified circumstances", the rich dynamic aspects of genre knowledge can be disclosed. The chapters deal with genre knowledge in various settings, illustrating the impact of time, place, medium, skills and purpose, and some chapters deal with genre analysis in a broader sense giving ideas for applied genre analysis. The book is of interest to professionals and scholars in communication studies, discourse analysis, and social and cognitive science. [Genre Studies in English for Academic Purposes/ Estudios de Genero en Ingles para propositos academicos](#) Taylor & Francis An essential reference to contemporary discourse studies, this handbook offers a rigorous and systematic overview of the field, covering the key

methods, research topics and new directions. Fully updated and revised throughout to take account of developments over the last decade, in particular the innovations in digital communication and new media, this second edition features:

- New coverage of the discourse of media, multimedia, social media, politeness, ageing and English as lingua franca
- Updated coverage across all chapters, including conversation analysis, spoken discourse, news discourse, intercultural communication, computer mediated communication and identity
- An expanded glossary of key terms

Identifying and describing the central concepts and theories associated with discourse and its main branches of study, *The Bloomsbury Handbook of Discourse Analysis* makes a sustained and compelling argument concerning the nature and influence of discourse and is an essential resource for anyone interested in the field.

Genre Analysis John Benjamins Publishing Company

This book describes the most important kinds of texts in English and introduces the

methodological techniques used to analyse them. Three analytical approaches are introduced and compared, describing a wide range of texts from the perspectives of register, genre and style. The primary focus of the book is on the analysis of registers. Part 1 introduces an analytical framework for studying registers, genre conventions, and styles. Part 2 provides detailed descriptions of particular text varieties in English, including spoken interpersonal varieties (conversation, university office hours, service encounters), written varieties (newspapers, academic prose, fiction), and emerging electronic varieties (e-mail, internet forums, text messages). Finally, Part 3 introduces advanced analytical approaches using corpora, and discusses theoretical concerns, such as the place of register studies in linguistics, and practical applications of register analysis. Each chapter ends with three types of activities: reflection and review activities, analysis activities, and larger project ideas.

Textual Analysis for Social Research SAGE

It has been widely recognised that an in-depth textual analysis of a source text is relevant for translation. This book discusses the role of Discourse Analysis for translation and translator training. One particular model of discourse analysis is presented in detail, and its application in the context of translator training is critically examined.

Discourse and Literature John Wiley & Sons

The main focus of this book is on Theme-Rheme analysis. In English the Theme is realized as the initial constituent of the clause or sentence. The information that is contained within the themes of the various sentences of a passage correlates with the method of development of the passage. The meaning of Theme and its realization in English explains the general correlation of given information with the initial position in the sentence. The findings and analysis of Theme-Rheme in this book will immensely aid

both researchers and students who seek to understand and unfold language structures and analyze written discourse. It also provides teachers with efficient tools to analyze their students academic writing and find ways to leverage it. This book also sheds lights on the semantic and structure of the language based on the four analytical approaches implemented in this study. The findings in this book suggest that control of the Theme-Rheme system is part of what the successful writer (native or non-native) uses to achieve such coherence. In this regard, students can be aware of a variety of linguistics choices to help them write more effectively. This book suggests that control of the Theme-Rheme system in academic writing is part of what the successful writer uses to achieve coherence. This book offers a new perspective on the way written discourse is organized and structured that is of some relevance to language teachers and applied linguists, as well as to theoretical and descriptive linguists. I have tried to offer in this book new insights into analyzing texts and

investigating the thematic organization of the grammatical properties of Theme at clause level, and that, I hope, will be found sufficient reason for reading it.

This collection sheds light on the ways in which corpus linguistics and the use of learner corpora might be applied to the study of academic discourse, revealing linguistic and rhetorical patterns and insights into variation across a range of disciplinary genres. Organized into three sections, the book highlights key tools and methodologies in corpus analysis to study such features as discourse markers, lexical bundles, linguistic complexity, lexico-grammatical conventions, and modality in case studies in studies of academic discourse, both in a second language and in English for specific purposes. The volume features examples from disciplinary genres not often covered in the existing literature, including MA theses, academic book reviews, and online student forums. Taken together with the study of learner corpora, the book demonstrates the impact

of corpus linguistic tools in better understanding linguistic patterns of specific languages and language use and in turn, their role in helping to identify the needs of language learners. The book will be of interest to students and scholars in corpus linguistics, applied linguistics, and English for Specific Purposes. English in Academic and Research Settings Universal-Publishers Automatic Indexing and Abstracting of Document Texts summarizes the latest techniques of automatic indexing and abstracting, and the results of their application. It also places the techniques in the context of the study of text, manual indexing and abstracting, and the use of the indexing descriptions and abstracts in systems that select documents or information from large collections. Important sections of the book consider the development of new techniques for indexing and abstracting. The techniques involve the following: using text grammars, learning of the themes of the texts including the identification of representative sentences or paragraphs by means

of adequate cluster algorithms, and learning of classification patterns of texts. In addition, the book is an attempt to illuminate new avenues for future research.

Automatic Indexing and Abstracting of Document Texts is an excellent reference for researchers and professionals working in the field of content management and information retrieval.

A Genre-Based View

Cambridge University Press

'This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistic approaches to text and discourse. Its main merit, I think, is that it introduces approaches which up to now have hardly been admitted into the universe of scientific discourse' - *Discourse Studies*

Methods of Text and Discourse Analysis provides the most comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis. Among the 10 linguistic and sociological models surveyed in this book

some of the more important are Grounded Theory, Content Analysis, Conversation Analysis and Critical Discourse Analysis. The book presents each approach according to a standardised format, which allows for direct systematic comparisons. The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods. Interdisciplinary and international in its aims, *Methods of Text and Discourse Analysis* suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each others' methods and procedures.

Language Policy in Business Publicacions de la Universitat Jaume I

Discourse on the Move is the first book-length exploration of how corpus-based methods can be used for discourse analysis, applied to the description of discourse organization. The primary goal is to bring these two analytical perspectives together: undertaking a detailed discourse analysis of each individual text, but doing so in terms that can be generalized across all texts of a corpus. The book explores

two major approaches to this task: 'top-down' and 'bottom-up'. In the 'top-down' approach, the functional components of a genre are determined first, and then all texts in a corpus are analyzed in terms of those components. In contrast, textual components emerge from the corpus analysis in the bottom-up approach, and the discourse organization of individual texts is then analyzed in terms of linguistically-defined textual categories. Both approaches are illustrated through case studies of discourse structure in particular genres: fundraising letters, biology/biochemistry research articles, and university classroom teaching.

In this accessible new textbook, Isabela and Norman Fairclough present their innovative approach to analysing political discourse. *Political Discourse Analysis* integrates analysis of arguments into critical discourse analysis and political discourse analysis. The book is grounded in a view of politics in which deliberation, decision and action are crucial

concepts: politics is about arriving cooperatively at decisions about what to do in the context of disagreement, conflict of interests and values, power inequalities, uncertainty and risk. The first half of the book introduces the authors' new approach to the analysis and evaluation of practical arguments, while the second half explores how it can be applied by looking at examples such as government reports, parliamentary debates, political speeches and online discussion forums on political issues.

Through the analysis of current events, including a particular focus on the economic crisis and political responses to it, the authors provide a systematic and rigorous analytical framework that can be adopted and used for students' own research. This exciting new text, co-written by bestselling author Norman Fairclough, is essential reading for researchers, upper undergraduate and postgraduate students of discourse analysis, within English language, linguistics, communication studies, politics and other social sciences.

Bringing together papers

written by Norman Fairclough over a 25 year period, Critical Discourse Analysis represents a comprehensive and important contribution to the development of this popular field. The book is divided into seven sections covering the following themes:

language in relation to ideology and power
discourse in processes of social and cultural change
dialectics of discourse, dialectical relations between discourse and other moments of social life
methodology of critical discourse analysis
research analysis of political discourse
discourse in globalisation and 'transition'
critical language awareness in education
The new edition has been extensively revised and enlarged to include a total of twenty two papers. It will be of value to researchers in the subject and should prove essential reading for advanced undergraduate and postgraduate students in Linguistics and other areas of social science.

Discourse is language as it occurs, in any form or context, beyond the speech act. It may be

written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while also presenting new research findings.

Writing Business: Genres, Media and Discourses offers an analysis of the genres and functions of written discourse in the business context, involving a variety of modes of communication. The evolution of new forms of writing is a key focus of this collection and is only partly attributable to the ever increasing application of technology at work. Alongside machine-mediated texts such as electronic mail and computer-generated correspondence, the contextualised analyses of both traditional genres such as facsimiles and direct mailing, and of lesser studied texts such as invitations for bids, contracts, business magazines and ceremonial speeches, reveal a rich complexity in the forms of communication evolved by organisations and the individuals who work within them, in response to the demands of the social, organisational and cultural contexts in which they operate. This rich textual variation is matched by a discussion of a range of methodological approaches to the development of business writing skills, including

rhetorical analysis, organisational communication analysis, social constructionism, genre analysis and survey and experimental methods. Using authentic data and benefiting from a fresh, interdisciplinary approach, the volume will be of interest to students and researchers of business communication, Language for Specific Purposes (LSP), English for Specific Purposes (ESP), and sociolinguistics. Key notions in this perspective are those of prototype, inheritance, and intertextuality; that is, the extent to which a text is typical of the particular genre, the qualities or properties that are inherited from other instances of the communicative event, and the ways in which a text is influenced by other texts of a similar kind.
