The 2013 IB HL Economics syllabus change introduced Paper 3, an essentially calculations-based assessment. This development challenged teachers and students alike, as few Paper 3 practice resources have been available. This is furthermore an area of the syllabus where, as in Mathematics, practice is fundamentally important in developing the skills and confidence for needed for success. Paul Hoang's latest publication therefore represents an invaluable resource in helping students to prepare for the examination challenges they face. For many candidates the mix of words, theory and numbers in Paper 3 questions can be overwhelming, if they have not developed easy familiarity throughout their course. With clear layout and content that beautifully mirrors IB examination questions, this resource is the one we have all been waiting for. I absolutely recommend it as a 'must have' for all those who are preparing for the HL Economics examination. IT is a core resource invaluable to students and teachers alike. Award-winning speaker and business consultant Joey Coleman teaches audiences and companies all over the world how to turn a one-time purchaser into a lifelong customer. Coleman's theory of building customer loyalty isn't about focusing on marketing or closing the sale: It's about the First 100 Days® after the sale and the interactions the customer experiences. While new customers experience joy, euphoria, and excitement, these feelings quickly shift to fear, doubt, and uncertainty as buyer's remorse sets in. Across all industries, somewhere between 20%-70% of newly acquired customers will stop doing business with a company with the first 100 days of being a new customer because they feel neglected in the early stages of customer onboarding. In *Never Lose a Customer Again*, Coleman offers a philosophy and methodology for dramatically increasing customer retention and as a result, the bottom line. He identifies eight distinct emotional phases customers go through in the 100 days following a purchase. From an impulse buy at Starbucks to the thoughtful purchase of a first house, all customers have the potential to experience the eight phases of the customer journey. If you can understand and anticipate the customers' emotions, you can apply a myriad of tools and techniques -- in-person, email, phone, mail, video, and presents -- to cement a long and valuable relationship. Coleman's system is presented through research and case studies showing how best-in-class companies create remarkable customer experiences at each step in the customer lifecycle. In the "Acclimate" stage, customers need you to hold their hand and over-explain how to use your product or service. They're often too embarrassed to admit they're confused. Take a cue from Canadian software company PolicyMedical and their challenge of getting non-technical users to undergo a complex installation and implementation process. They turned a series of project spreadsheets and installation manuals into a beautiful puzzle customers could assemble after completing each milestone. In the "Adopt" stage, customers should be welcomed to the highest tier of tribal membership with both public and private recognitions. For instance, Sephora's VIB Rogue member welcome gift provides a metallic membership card (private recognition) and a members-only shade of lipstick (for public display). In the final stage, "Advocate," loyal customers and raving fans are primed to provide powerful referrals. That's how elite entrepreneurial event MastermindTalks continues to sell-out their conference year after year - with zero dollars spent on marketing. By surprising their loyal fans with amazing referral bonuses (an all-expenses paid safari!?) they guarantee their community will keep providing perfect referrals. Drawing on nearly two decades of consulting and keynoting, Coleman provides strategies and systems to increase customer loyalty. Applicable to companies in any industry and of any size (whether measured in employee count, revenue, or total number of customers), implementing his methods regularly leads to an increase in profits of 25-100%. Working with well-known clients like Hyatt Hotels, Zappos, and NASA, as well as mom-and-pop shops and solo entrepreneurs around the world, Coleman's customer retention system has produced incredible results in dozens of industries. His approach to creating remarkable customer experiences requires minimal financial investment and will be fun for owners, employees, and teams to implement. This book is required reading for business owners, CEOs, and managers - as well as sales and marketing teams, account managers, and customer service representatives looking for easy to implement action steps that result in lasting change, increased profits, and lifelong customer retention.

Everything you ever need to know about making it as a scientist. Despite your graduate education, brainpower, and technical prowess, your career in scientific research is far from assured. Permanent positions are scarce, science survival is rarely part of formal graduate training, and a good mentor is hard to find. In *A Ph.D. Is Not Enough!*, physicist Peter J. Feibelman lays out a rational path to a fulfilling long-term research career. He offers sound advice on selecting a thesis or postdoctoral adviser; choosing among research jobs in academia, government laboratories, and industry; preparing for an employment interview; and defining a research program. The guidance offered in *A Ph.D. Is Not Enough!* will help you make your oral presentations more effective, your journal articles more compelling, and your grant proposals more successful. A classic guide for recent and soon-to-be graduates, *A Ph.D. Is Not Enough!* remains required reading for anyone on the threshold of a career in science. This new edition includes two new chapters and is revised and updated throughout to reflect how the revolution in electronic communication has transformed the field.

The true story of a retired British army officer's private Somali-hostage rescue mission During the peak of the Somali piracy crisis, three ships – from Malaysia, Thailand and Taiwan – were hijacked and then abandoned to their fate by their employers, who lacked the money to pay ransoms. All would still be there, were it not for Colonel John Steed, a retired British military attaché, who launched his own private mission to free them. At 65, Colonel Steed was hardly an ideal saviour. With no experience in hostage negotiations and no money behind him, he had to raise the ransom cash from scratch, running the operation from his spare room and ferrying million-dollar ransom payments around in the boot of his car. Drawing on first-hand interviews, former chief foreign correspondent of The Sunday Telegraph, Colin Freeman, who has himself spent time held hostage by Somali pirates, takes readers on an inside track into the world of hostage negotiation and one man's heroic rescue mission.
