Just as feminist scholars began to develop an analysis of the state and women in Europe gained access to its political, legal and bureaucratic arenas, increased attention and reliance on European institutions have begun to take precedence over the more parochial concerns of the nation state. With the creation of the European super-state, feminist scholars will have to enhance their understanding of the European Union while activists will increasingly focus their efforts upon its institutions. This volume provides a comprehensive examination of EU policy implications for some of the most burning issues concerning women. This is the first book to transcend the emphasis on economics, the conventional basis for EU public policy discussions, thus providing a basis upon which one can begin to assess the politics of European integration from a feminist perspective.

Making an empirical contribution to the understanding of tourism as a development mechanism in poor regions and countries, this book looks at the successes and paradoxes of tourism in this role and considers why tourism as a catalyst for economic development can be a controversial device. It offers a perspective on theoretical frameworks and uses international case studies covering both social and economic aspects. The book is relevant to both tourism practitioners and academics. It consists of 16 chapters, in addition to an introduction, and has a subject index.

Abandoning the traditional narrative approach to the subject, Richard Rex presents an analytical account which sets out the logic of Henry VIII's shortlived Reformation. Starting with the fundamental matter of the royal supremacy, Rex goes on to investigate the application of this principle to the English ecclesiastical establishment and to the traditional religion of the people. He then examines the extra impetus and the new direction which Henry's regime gave to the development of a vernacular and literate devotional culture, and shows how, despite Henry's best intentions, serious religious divisions had emerged in England by the end of his reign. The study emphasises the personal role of Henry VIII in driving the Reformation process and how this process, in turn, considerably reinforced the monarch's power. This updated edition of a powerful interpretation of Henry VIII's Reformation retains the analytical edge and stylish lucidity of the original text while taking full account of the latest research. An important new chapter elucidates the way in which 'politics' and 'religion' interacted in early Tudor England.

**The Politics of Tourism in Asia** Rex Bookstore, Inc.

Tourism, the world's largest industry, has created a variety of complex political problems,

particularly in those countries where the primary attraction of tourism is its potential for accelerating development. The political dimensions that have encouraged tourism in the People's Republic of China, the Philippines, Thailand, India, Pakistan, Bangladesh, Sri Lanka, the Maldives, Nepal, and Bhutan are examined in Linda K. Richter's study, which is based on more than 250 interviews with government officials, travel industry representatives, and media officials. Richter concentrates on the reasons for using tourism to advance government policy objectives and on the many ways political and economic problems can frustrate tourism's contribution to national development. All too often, after the expensive infrastructure is developed, luxury goods imported, and lavish promotional efforts expended, nations are left disillusioned with the economic promise of tourism. Disappointing results are often complicated by a preoccupation with the lure of tourism and an underestimation of the industry's needs and of the political pressures of and on government officials. Encouraging an awareness of the political aspects of tourism, the author advocates greater involvement by social and political scientists in monitoring tourism policy, as well as a restructuring and redesigning of programs in this largest sector of international trade.
