A roaring, rollicking, foot-stomping farce. Ketchup Soup is an epic, and at times ribald, comedy about the lovable James Reichardt, a verbose junior copywriter who's just landed his first job at a sleepy advertising agency in New Orleans. Part genius, part naive miscreant, James suffers from illusions of grandeur, not the least of which are the beliefs that business is the key to happiness and that he is Caesar reincarnated. In his first 364 days in the Big Easy he'll join forces with the

many colorful characters of the city to bring down the ad agency, swear allegiance to art and lead a revolt against capitalism at the height of Mardi Gras. A tale that is both hilarious and heartfelt, Ketchup Soup is the side-splitting story of one young man's journey through the nonconformists and dank back alleys of New Orleans.

With this book, Thomas Menthe provides new insights into the era of value-selling, which has been the Number 1 method in selling complex products and services. Today, customers are expecting more while paying less and the value of your offer is defined by the customer not by the seller. Data is the new oil - the new digital age allows different ways with technology like machine learning to better analyze customer journeys, get insights, predict behaviors and personalize communication to improve customer retention. Digitalization will change the buying behavior much more towards e-commerce and self-service consultation with the support of sales robots. Value can be created from data, which needs to be structured, analyzed and used for the individual customer engagement. Does this mean the end of the sales representative and solution sales? Value is not based solely on product dimensions, much more emotional value created

counts during the decision making process. The new era of value-selling explains, how value can be made tangible by the value quotient and ways to generate rational and emotional ROI for customers through story-telling and relationship benefits. Value is always first on the buyer's mind and the new value-selling concept will dramatically improve your business and show how to respond to the customer of tomorrow. Thomas Menthe (MBA) is a sales expert, experienced seller, recognized speaker and author of many publications about customer value, new ways of selling, selling strategy, leadership and coaching. His best selling book Kundennutzen has sold thousands of copies and others are available in their 4th edition. He served global companies like Bearing Point, Canon, Carlsberg, Cisco Systems, Global Knowledge, KWS, Microsoft, RIM, Xerox and others. **Create Your Own Economy Via Network Marketing** Sourcebooks, Inc.

True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the

methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

Four years ago, the bestselling authors of *The Challenger Sale* overturned decades of conventional wisdom with a bold new approach to sales. Now their latest research reveals something even more surprising: Being a Challenger seller isn't enough. Your success or failure also depends on who you challenge. Picture your ideal customer: friendly, eager to meet, ready to coach you through the sale and champion your products and services across the organization. It turns out that's the last person you need. Most marketing and sales teams go after low-hanging fruit: buyers who are eager and have clearly articulated needs. That's simply human nature; it's much easier to build a relationship with someone who always makes time for you, engages with your content, and listens attentively. But according to brand-new CEB research—based on data from thousands of B2B marketers, sellers, and buyers around the world—the highest-performing teams focus their time on potential customers who are far more skeptical, far less interested in meeting, and ultimately agnostic as to who wins the deal. How could this be? The authors of *The Challenger Customer* reveal that high-performing B2B teams grasp something that their average-performing peers don't: Now that big, complex deals increasingly require consensus among a wide range of players across the organization, the limiting factor is rarely the salesperson's inability to get an individual stakeholder to agree to a solution. More often it's that the stakeholders inside the company can't even agree with one another about what the problem is. It turns out only a very specific type of customer stakeholder has the credibility, persuasive skill, and will to effectively challenge his or her colleagues to pursue anything more ambitious than the status quo. These customers get deals to the finish line far more often than friendlier stakeholders who seem so receptive at first. In other words, Challenger sellers do best when they target Challenger customers. The Challenger Customer unveils research-based tools that will help you distinguish the "Talkers" from the "Mobilizers" in any organization. It also provides a blueprint for finding them, engaging them with disruptive insight, and equipping them to effectively challenge their own organization.

In the future, the past will never be the same... By the end of the 25th Century few had as storied a career as Doctor J. Burke. An historian who used quantum superluminal teleportation to mingle among her forebears through twenty different decades making discoveries and recovering lost artifacts, she was the last of the Historical Archive Collection's 'big three' antiquarians. The physical effects of the profession had grounded jovial Ike Chernovich in old San Francisco, companion Braham Lienthal had vanished without a trace three years before, and the indifference of the Minders from the future, who were best positioned to help, left Burke with a weary cynicism. Only the promise of a special mission, the brainchild of rookie archivist Nathan Rialto, brought her back again. It was Burke's specialty, the recovery of a glamorous old airliner from 1951 using a revolutionary new teleport, and in California as well. She would gather her trusty team of specialists, teach the rookie the ropes and perhaps contemplate a different kind of future afterward with Ike. From the moment it began it felt as if the whole mission had been created just for her...and that was only the beginning of her problems!

"As enjoyable as a day at the beach." That's how USA TODAY summed up this hilarious and big-hearted romp in the Florida sunshine. When Murray Zelman, a.k.a. The Bra King, pops another Prozac and heads to the Keys, he has nothing much in mind beyond a quixotic hope of winning back his first wife, Franny, whom he dumped years before. But when he forms an unlikely friendship with Tommy Tarpon, the last remaining member of an obscure Indian tribe, another plan also starts shaping up in his fevered brain. Why not open up Key West's first casino? Why not? Well, how about because the Mafia, in league with some of the nastiest politicians you will ever meet, is determined to kill anyone who tries? Somehow, Murray, Tommy, and Franny didn't think of that until they were in way too deep. Laugh along as they improvise a manic and ever more desperate campaign to keep their casino dreams--and themselves--alive.

*A Simpler, Easier, and Faster Way to Sell Anything to Anyone, Anytime, Anywhere* Penguin  
What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships-and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors,

knowledge, and attitudes that matter most for high performance. And what they discovered may be the biggest shock to conventional sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, *The Challenger Sale* argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one-the Challenger- delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.
