 Static Electricity part 1 1. Charging by
 Friction Charging by friction between
 objects of different affinities, causes the
 object with higher affinity for electrons
 to gain electrons from the other object.
 The object that has "lost" electrons now
 has a positive charge. Chapter 20 Static

Moving on to our unit on the Physics of Electricity, it's time to talk about charge. What is charge? Is there a positive and negative charge? What do those things mean? In this episode, Shini ...

Electric Charge: Crash Course Physics #25544 Chapter 20 Static Electricity Conductor or Insulator? It might be tempting to classify an element as solely a conductor or solely an insulator, but the classification can change depending on the form the element takes. For example, carbon in the form of diamond

is an insulator, but carbon in the form of graphite can conduct charge.
