Instructor's Manual to Accompany Professional Management of Housekeeping Operations Oxford University Press, USA

Understanding the global hotel business is not possible without paying specific attention to hotel chain management and dynamics. Chains are big business, approximately 80 percent of hotels currently being constructed around the world are chain affiliated and, in 2014, the five largest brands held over a one million rooms. The high economic importance of the hotel chains and their global presence justifies the academic research in the field however, despite this, there is no uniform coverage in the current body of literature. This Handbook aids in filling the gap by exploring and critically evaluates the debates, issues and controversies of all aspects of hotel chains from their nature, fundamentals of existence and operation, expansion, strategic and operational aspects of their activities and geographical presence. It brings together leading specialists from range of disciplinary backgrounds and regions to provide state-of-the-art theoretical reflection and empirical research on current issues and future debates. Each of the five inter-related section explores and evaluates issues that are of extreme importance to hotel chain management, focusing on theoretical issues, the expansion of hotel chains, strategic and operational issues, the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation, demographic trends, sustainability, and new technology development. It provides an invaluable resource

for all those with an interest in hotel management, hospitality, tourism and business encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, Business and Events Management. [Training Manual](#) CreateSpace

[Managing Housekeeping Operations](#) Wiley

The second edition of Housekeeping Management is written from a management perspective of the executive housekeeper in the lodging industry. The overarching concept of the text spotlights three major areas of expertise required for the success of lodging professionals: management of resources, administration of assets, and knowledge of technical operations. The text explores the role of the housekeeping department in hotel/lodging operations, and focuses mainly on the effective communication between the housekeeping, front office, and engineering and maintenance staff. This edition will have the same focus on the management- and administration-based philosophy from the 1st Edition, but with a stronger focus on the engineering aspects of housekeeping. The book also incorporates new concepts of energy conservation and risk management to address the latest sustainability and security trends in the industry, as well as

updated information on guestroom technology.
