Ideology and Challenge McFarland

The growth of Islam both worldwide and particularly in the United States is especially notable among African-American inmates incarcerated in American state and federal penitentiaries. This growth poses a powerful challenge to American penal philosophy, structured on the ideal of rehabilitating offenders through penance and appropriate penal measures. Islam in American Prisons argues that prisoners converting to Islam seek an alternative form of redemption, one that poses a powerful epistemological as well as ideological challenge to American penology. Meanwhile, following the events of 9/11, some prison inmates have converted to radical anti-Western Islam and have become sympathetic to the goals and tactics of the Al-Qa'ida organization. This new study examines this multifaceted phenomenon and makes a powerful argument for the objective examination of the rehabilitative potentials of faith-based organizations in prisons, including the faith of those who convert to Islam.

The Challenge of Islam Yale University Press

Since its origins in the deserts of Arabia fourteen centuries ago, Islam has grown until today it has one and a half billion followers, nearly a quarter of mankind. Today Islam is feared and distrusted by much of the Western world for its association with religious extremism and terrorism, although the vast majority of Muslims believe only in peace, love and service to Allah and assert that extremism has no place in their faith.

The Challenge of Traditionalism (700-1350) Cambridge University Press

As a minority group in North America Muslims are preoccupied with how to preserve their Islamic identity in their children. With schools playing no role in instilling ethical norms and values in children it becomes the responsibility of the family to undertake that role. The book is an excellent guide on how to take on that role in a holistic Islamic tarbiyyah.

Politics and Religion in Western Europe Univ of California Press

This book explores the challenge posed by the immersion of 15 million Muslims in Western democracies and the few, but volatile, terrorists present within the larger body of believers. The fact that immersion in Western culture is insufficient to stem the tide of extremism is discussed, along with the factors that contribute to the growth of radical Islam, such as the presence of charismatic, authoritarian leadership, educational options that downplay critical thinking, and colonialism. Hope that radical Islam can be kept to a minimum in Western societies is provided by the Islamic concept of Ijtihad, through which Muslims reinterpret their own religion. Just as mainstream Mormons have dispensed with polygamy and Christians with witch-hunting, Muslims in Western societies have the potential to minimize the growth of radicalism. Instructors considering this book for use in a course may request an examination copy here.

The Quranic Teachings on Christianity Oxford University Press

Criticizes readings of the Koran that fuel violent acts, and calls for exegesis of Islam's sacred texts

inspired by ijtiḥad, or independent interpretation. Analyzes the burqa ban in France, and suggests that the future of reformed Islam lies among Muslims living in the West, where religion and positivist law co-exist.

"An intelligent, erudite argument in which Mr. Akhtar (whose writings won the praise of Graham Greene and other British authors) challenges his fellow Muslims to bring their faith into the modern world. In the process he offers a clear and concise explanation of Islam's basic religious tenets." *Radical Islam in the West* Ashgate Publishing, Ltd.

This book is designed to equip the Christian Patriot to expose the evils of Islam. It examines the challenges, charts out a strategy, formulates the winning arguments, and is packed with damning evidence against Islam.

An Islamic Perspective Encounter Books

How do modern Muslims adapt their traditions to engage with today's world? Charles Tripp's erudite and incisive book considers one of the most significant challenges faced by Muslims over the last sixty years: the challenge of capitalism. By reference to the works of noted Muslim scholars, the author shows how, faced by this challenge, these intellectuals devised a range of strategies which have enabled Muslims to remain true to their faith, whilst engaging effectively with a world not of their own making. The work is framed around the development of their ideas on Islamic socialism, economics and the rationale for Islamic banking. While some Muslims have resorted to confrontation or insularity to cope with the challenges of modernity, most have aspired to innovation and ingenuity in the search for compromise and interaction with global capitalism in the twenty-first century.

Meeting the Challenge of Parenting in the West International Institute of Islamic Thought (IIIT)

As a Protestant theologian and disciple of renowned critics of Christianity, Albert Schweitzer and Martin Werner, the Author wanted since long to contribute to the breakthrough of their resolute nontrinitarian position which has throughout the twentieth century by all and every Western Christian university theology been silenced by pretending tacitly and tenaciously the non-existence of their strong argument.

Islam, Science, and the Challenge of History Fordham Univ Press

The Fear of Islam investigates the context of Western views of Islam and offers an introduction to the historical roots and contemporary anxiety regarding Islam within the Western world. Tracing the medieval legacy of religious polemics and violence, Green orients readers to the complex history and issues of Western relations to Islam, from early and late modern colonial enterprises and theories of "Orientalism," to the production of religious discourses of otherness and the clash of civilizations that proliferated in the era of 9/11 and the war on terror. In this second edition, Green brings the reader up to date, examining the Islamophobic rhetoric of the 2016 US presidential election and the ongoing success of populist and far right parties in Europe. Green provides updated data on the rise of anti-Muslim legislation--for example, the Muslim ban in the United States and a wave of full-face veil bans in Europe--as well as the rise in anti-Muslim hate crimes on both sides of

the Atlantic since 2015. This important book is essential reading for anyone who wants to better understand current views of Islam and to work toward meaningful peace and understanding between religious communities.

Non-Muslims and the Egyptian State North Atlantic Books

Since Europeans first colonized Arab lands in the 19th century, they have been pressing to have the area's indigenous laws and legal systems accord with Western models. Although most Arab states now have national codes of law that reflect Western influence, fierce internal struggles continue over how to interpret Islamic law, particularly in the areas of gender and family. From different geographical and ideological points across the contemporary Arab world, Haddad and Stowasser demonstrate the range of views on just what Islam's legal heritage in the region should be. For either law or religion classes, *Islamic Law and the Challenges of Modernity* provides the broad historical overview and particular cases needed to understand this contentious issue. Responding to the Challenges of Islam Oxford University Press

In this title, the author demythifies both Islamic and western ideas of Islam by addressing the psychoanalytic root causes of the Muslim world's clash with modernity and subsequent turn to fundamentalism. It reveals an alternate history of Islam and looks at its future development.

The Challenge of Islamic Identity Today Rowman Altamira

AN INDEPENDENT BEST BOOKS ON RELIGION 2014 PICK Few things provoke controversy in the modern world like the religion brought by Prophet Muhammad. Modern media are replete with alarm over jihad, underage marriage and the threat of amputation or stoning under Shariah law. Sometimes rumor, sometimes based on fact and often misunderstood, the tenets of Islamic law and dogma were not set in the religion's founding moments. They were developed, like in other world religions, over centuries by the clerical class of Muslim scholars. Misquoting Muhammad takes the reader back in time through Islamic civilization and traces how and why such controversies developed, offering an inside view into how key and controversial aspects of Islam took shape. From the protests of the Arab Spring to Istanbul at the fall of the Ottoman Empire, and from the ochre red walls of Delhi's great mosques to the trade routes of the Indian Ocean world, Misquoting Muhammad lays out how Muslim intellectuals have sought to balance reason and revelation, weigh science and religion, and negotiate the eternal truths of scripture amid shifting values.

The Challenge of Islam Ashgate Pub Limited

Nearly seven million Muslims live in the United States today, and their relations with non-Muslims are strained. Many Americans associate Islam with figures such as Osama bin Laden, and they worry about "homegrown terrorists." To shed light on this increasingly important religious group and counter mutual distrust, renowned scholar Akbar Ahmed conducted the most comprehensive study to date of the American Muslim community. *Journey into America* explores and documents how Muslims are fitting into U.S. society, placing their experience within the larger context of American identity. This eye-opening book also offers a fresh and insightful perspective on American history

and society. Following up on his critically acclaimed *Journey into Islam: The Crisis of Globalization* (Brookings, 2007), Ahmed and his team of young researchers traveled for a year through more than seventy-five cities across the United States—from New York City to Salt Lake City; from Las Vegas to Miami; from the large Muslim enclave in Dearborn, Michigan, to small, predominantly white towns like Arab, Alabama. They visited homes, schools, and over one hundred mosques to discover what Muslims are thinking and how they are living every day in America. In this unprecedented exploration of American Muslim communities, Ahmed asked challenging questions: Can we expect an increase in homegrown terrorism? How do American Muslims of Arab descent differ from those of other origins (for example, Somalia or South Asia)? Why are so many white women converting to Islam? How can a Muslim become accepted fully as an "American," and what does that mean? He also delves into the potentially sticky area of relations with other religions. For example, is there truly a deep divide between Muslims and Jews in America? And how well do Muslims get along with other religious groups, such as Mormons in Utah? *Journey into America* is equal parts anthropological research, listening tour, and travelogue. Whereas Ahmed's previous book took the reader into homes, schools, and mosques in the Muslim world, his new quest takes us into the heart of America and its Muslim communities. It is absolutely essential reading for anyone trying to make sense of America today.

The Rediscovery and Reliable Reconstruction of a Comprehensive Pre-Islamic Christian Hymnal Hidden in the Koran Under Earliest Islamic Reinterpretations U of Minnesota Press

The events of September 11 and the subsequent war on terrorism have provoked widespread

discussion about the possibility of democracy in the Islamic world. Such topics as the meaning of jihad, the role of clerics as authoritative interpreters, and the place of human rights and toleration in Islam have become subjects of urgent public debate around the world. With few exceptions, however, this debate has proceeded in isolation from the vibrant traditions of argument within Islamic theology, philosophy, and law. *Islam and the Challenge of Democracy* aims to correct this deficiency. The book engages the reader in a rich discourse on the challenges of democracy in contemporary Islam. The collection begins with a lead essay by Khaled Abou El Fadl, who argues that democracy, especially a constitutional democracy that protects basic individual rights, is the form of government best suited to promoting a set of social and political values central to Islam. Because Islam is about submission to God and about each individual's responsibility to serve as His agent on Earth, Abou El Fadl argues, there is no place for the subjugation to human authority demanded by authoritarian regimes. The lead essay is followed by eleven others from internationally respected specialists in democracy and religion. They address, challenge, and engage Abou El Fadl's work. The contributors include John Esposito, Muhammad Fadel, Noah Feldman, Nader Hashemi, Bernard Haykel, Muqtedar Khan, Saba Mahmood, David Novak, William Quandt, Kevin Reinhart, and Jeremy Waldron.

A Rational Perspective Edinburgh University Press

This book is an attempt to explore why Muslims are in conflict with themselves, and why Muslims have been living in an isolation and intellectual vacuum. This book is an attempt to find out why Islam, as embodied in the Mushaf, calls for a sharply different set of norms than those adopted by the majority of Muslims. To search for answers, the book uses, as much as possible, two sources: the first is critical reasoning, and the second is the Mushaf. In sharp contrast to the vast majority of books on Islam, this one does not base the validity of its argument on the stature of past or present Muslim personalities and scholars irrespective of their high status and reverence amongst the majority of Muslims. The book takes a methodical approach to analyzing the techniques that evolved throughout the ages to marginalize the Muslims' mind and to project reason as the archenemy of Islam. It analyses alleged prophetic narratives (Hadith) and interpretations of the Mushaf by prominent jurists to confirm that rationalism and reason were both, and largely, disconnected from Muslims' intellectual discourse, at least in the overwhelmingly dominant religious material that has reached us. This book analyses fundamental contradictions in the way the vast majority of Muslims perceive Islam, and how the conceived and practiced Muslim or "Islamic" doctrines lack a foundation in the Mushaf. The book goes behind the scene, so to speak, to analyze reasons behind such a perceived disconnect. The book provides a context to the severe intellectual underdevelopment amongst most Muslims vis-à-vis their understanding of their religion. It looks at canonized practices and doctrines that emerged throughout the ages through dubious scholarship to maintain a docile,

hopeless, aimless, and subservient Muslim umma. It brings to the forefront stark contradictions between the canonized Muslim doctrines and the Mushaf that many Muslims choose to ignore. The book challenges the use of Hadith as a source of Islamic legislation. It takes an unconventional perspective of the Mushaf's exegesis and reaches conclusions that are based on reason and the Mushaf's direct text, yet are contradictory to conventional Muslim doctrines. The book explores the culture of violence championed by the historically triumphant Muslim scholars, jurists and clergy, whose "scholarship" triumphed, and morphed that of other scholars who put the Mushaf first and everything else as secondary. It questions whether such culture inspired past and contemporary violent movements. The book revisits fundamental doctrines and canonized laws and looks carefully at their evolution and their connection to the Mushaf. Two chapters in the book address the two most important sources of Islamic Law: Hadith and the Mushaf. The analyses in these two chapters lead to unconventional conclusions, thus establishing a new perspective that stems purely from the Mushaf and critical reasoning. The conclusions in these two chapters put Hadith in a perspective and context that is completely non-convergent with prevailing Muslim doctrines. The conclusions have direct implications on what is typically perceived as Islamic law and the controversial doctrine of Sharia.

Why Islam is Not the Problem Cambridge University Press

The West's actions in the Middle East are based on a fundamental misunderstanding: political Islam is repeatedly assumed to be the main cause of conflict and unrest in the region. The idea that we can decipher Jihadist radicalization or problems in the Middle East simply by reading the Qur'an has now become symptomatic of our age. This dangerous over-simplification and the West's obsession with Islam dominates media and policy analysis, ultimately skewing intervention and preventing long-term solutions and stability in the region. Ömer Taspinar, who has 20 years' research and policymaking experience, explains here what is really going on in the Middle East. The book is based on three of the most pressing cases currently under the spotlight: the role of Erdogan and the unrest in Turkey; the sectarian clashes in Iraq, Syria, Yemen and Lebanon; and the existence of the so-called Islamic State. Islam is often seen as the root cause of the challenge associated with these cases. But by unpacking the real issues, such as entrenched authoritarianism, vast energy resources, excessive defense spending, and the youth bulge, the book demystifies what is happening and cites governance and nationalism as the main drivers of conflict. The book shows the importance of treating the causes - which are economic, social and institutional - rather than the symptom - the continued and growing success of Islamist parties and jihadist movements in assessing the Middle East. In revealing exactly how Islamism is activated and by unpacking the structural challenges of the region, this unique insider's account provides a map to understanding Middle Eastern wars and conflicts and the prospects for the future.
