Data, Trends and Outlook in Europe, the Commonwealth of Independent States and North America SAGE

The majority of disasters are water-related with the flow of freshwater mostly occurring in transboundary basins. This guide supports the implementation of the Sendai Framework. It aims to raise awareness on the importance of river basin management and transboundary cooperation in Disaster Risk Reduction, while taking into account climate change adaptation. It provides information on steps that governments can take to harness the values of river basin management and transboundary cooperation together with good practices and lessons learned in this field.

Squandering America's Future—Why ECE Policy Matters for Equality, Our Economy, and Our Children CRC Press

This publication explores the progress in energy efficiency and renewable energy in selected countries of South-Eastern Europe, Eastern Europe, and Central Asia, and in the Russian Federation. The study analyzes policy, legislative and regulatory frameworks, financial environment and level of awareness in the areas of energy efficiency and renewable energy from 2010 to the present. It also identifies the existing gaps at the required frameworks and environment to promote energy

efficiency and renewable energy investments in the countries. This study is intended to support countries in their ongoing efforts towards improving energy efficiency and building a strong renewable energy base. It proposes a set of recommendations for necessary steps in achieving the long-term objectives for energy mix and meeting the ambitious related targets set by the countries.

Promoting Active Mobility SAGE Publishing India

This publication has been designed to assist member States in integrating transport, health, quality of life and environmental objectives into urban and spatial planning policies. It provides many references to case studies, good practices and examples from cities across the Euro-Asian region (and beyond) covering a wide array of thematic areas, including: the future of sustainable urban mobility; spatial planning in function of sustainable urban mobility and accessibility; public transport planning as a cornerstone of sustainable urban mobility; active mobility and how it promotes health and the environment; and the potential of Intelligent Transport Systems in an urban context. The publication puts forward a methodology for sustainable urban transport planning and introduces a concise set of key messages and recommendations as an input to the Fifth High-level Meeting on Transport, Health and Environment which takes place in Vienna from 26-27 November 2020.

Public Sector Information in the Digital

Age Kogan Page Publishers
Human rights and the environment have become increasingly interconnected. This updated manual seeks to contribute to a better understanding of this relationship by taking into account the new pertinent case law of the European Court of Human Rights. While the European Convention on Human Rights does not guarantee a specific right to a healthy and sound environment, the general standards deriving from it may nonetheless also apply to environmental matters. The European Court of Human Rights regularly examines complaints in which individuals argue that a breach of their Convention rights is the result of adverse environmental factors. This manual also takes account of the relevant decisions of the European Committee of Social Rights which has interpreted the right to protection of health under the European Social Charter as including a right to a healthy environment. Examples of good national practices have been compiled on the basis of the contributions of several member states and included in an appendix to the manual. The aim is to present the emerging principles on environmental protection in a systematic and accessible way.

Hearing on H.R. 3, Early Childhood Education and Development Act World Bank Publications

This Manual expands upon Guidelines on Compliance with and Enforcement of Multilateral Environmental Agreements (MEAs). Many States participated in the development and negotiation of the Guidelines, which were adopted by the UNEP Governing Council in 2002. While this Manual is not a negotiated document, it also is the result of a collaborative process involving a wide range of numerous individuals around

the world. These people assisted in drafting case studies and other contributions, reviewing the text, and suggesting substantive and formatting changes.

Manual on human rights and the environment - 2nd edition Cambridge Scholars Publishing

This ground-breaking book addresses the challenge of regulatory delivery, defined as the way that regulatory agencies operate in practice to achieve the intended outcomes of regulation. Regulatory reform is moving beyond the design of regulation to address what good regulatory delivery looks like. The challenge in practice is to operate a regulatory regime that is both appropriate and effective. Questions of how regulations are received and applied by those whose behaviour they seek to control, and the way they are enforced, are vital in securing desired regulatory outcomes. This book, written by and for practitioners of regulatory delivery, explains the Regulatory Delivery Model, developed by Graham Russell and his team at the UK Department for Business, Energy and Industrial Strategy. The model sets out a framework to steer improvements to regulatory delivery, comprising three prerequisites for regulatory agencies to be able to operate effectively (Governance Frameworks, Accountability and Culture) and three practices for regulatory agencies to be able to deliver societal outcomes (Outcome Measurement, Risk-based Prioritisation and Intervention Choices). These elements are explored by an international group of experts in regulatory delivery reform, with case studies from around the world. Regulatory Delivery is the first product of members of the International Network

for Delivery of Regulation.

Case Studies on Diversity and Social

Justice Education United Nations

Guide to Early Childhood Education:

Development - Design - Diversity is a

textbook of articles and essays

exclusively written to provide a resource

for educationalists working in the field of

Early Childhood Education (ECE), and

programmes from around the world. The

text has been formally prepared in three

significant parts to offer encouraging

insights, early learning ideas, classroom

environmental changes and pertinent

information and internet resources to

assist in guiding successful learning. This

textbook is primarily suited for ECE

administrators, directors, students,

teachers, instructors, professors, and

additional personnel that will be

teaching or working with children in age

levels ranging from infant and toddler

through to school-age grade three.

Undergraduate Catalog United Nations

The Globally Harmonized System of

Classification and Labelling of Chemicals

(GHS) addresses classification and

labelling of chemicals by types of

hazards. It provides the basis for

worldwide harmonization of rules and

regulations on chemicals and aims at

enhancing the protection of human

health and the environment during their

handling, transport and use by ensuring

that the information about their physical,

health and environmental hazards is

available. The sixth revised edition

includes, inter alia, a new hazard class

for desensitized explosives and a new

hazard category for pyrophoric gases;

miscellaneous amendments intended to

further clarify the criteria for some

hazard classes (explosives, specific

target organ toxicity following single

exposure, aspiration hazard, and

hazardous to the aquatic environment)

and to complement the information to be

included in section 9 of the Safety Data

Sheet; revised and further rationalized

precautionary statements; and an

example of labelling of a small

packaging in Annex 7.

Concrete Solutions United Nations

The Manual of Tests and Criteria

contains criteria, test methods and

procedures to be used for classification

of dangerous goods according to the

provisions of Parts 2 and 3 of the United

Nations Recommendations on the

Transport of Dangerous Goods, Model

Regulations, as well as of chemicals

presenting physical hazards according to

the Globally Harmonized System of

Classification and Labelling of Chemicals

(GHS). As a consequence, it supplements

also national or international regulations

which are derived from the United

Nations Recommendations on the

Transport of Dangerous Goods or the

GHS. At its ninth session (7 December

2018), the Committee adopted a set of

amendments to the sixth revised edition

of the Manual as amended by

Amendment 1. This seventh revised

edition takes account of these

amendments. In addition, noting that the

work to facilitate the use of the Manual

in the context of the GHS had been

completed, the Committee considered

that the reference to the

"Recommendations on the Transport of

Dangerous Goods" in the title of the

Manual was no longer appropriate, and

decided that from now on, the Manual

should be entitled "Manual of Tests and

Criteria".

Bringing Standardization in University

Curricula United Nations

With considerable turmoil in

international trade and logistics it is

more important than ever to understand

trade and customs issues and their

impact on logistics operations. At every port and border international freight operations are exposed to trade and customs procedures. Cross-Border Logistics Operations serves as a comprehensive guide and companion to the cross-border trade and customs environment and its implications for international business supply chains and their control. Inspired by the World Customs Organization's Professional Standards (also known as the WCO PICARD Standards), it provides key insights into transporting goods across borders and effectively managing the requirements for compliance and enforcement. International students, business operators and government officials will find the book rich in detail with practical examples that include the political, administrative, regulatory, technological and economic context throughout. It covers all the critical operational and legal aspects of cross-border logistics operations, including: - prevailing trade, customs and border policy -tariffs and import taxes -border management and supply chain security practices -prohibitions and restrictions - enforcement and compliance practices - supply chain and logistics arrangements -disaster relief operations -frictionless trade and trade facilitation principles.

Hearing Before the Committee on Education and Labor, House of Representatives, One Hundred First Congress, Second Session, Hearing Held in San Francisco, CA, January 19, 1990
Bloomsbury Publishing

This study provides an overview of Bank investments in Early Childhood Development (ECD) from 2000-2013 within the Education, Health, Nutrition and Population, and Social Protection and Labor practices.

Are you sure you're ready for the NBDE? You will be with this ultimate review resource! Providing the most up-to-date information on each of the basic sciences addressed in Part I of the National Board Dental Examination (NBDE) — including Anatomic Sciences; Biochemistry and Physiology; Microbiology and Pathology; and Dental Anatomy and Occlusion — this complete exam review features an easy-to-use outline format that mirrors the topic progression of the NBDE. Plus, it's loaded with informative examples and illustrations, endless practice questions reflecting the latest question types, and customizable testing modes to ensure you are fully prepared to tackle every aspect of Part I of the NBDE! Easy-to-use outline format organizes essential data and key points in a clean, streamlined fashion. Exam-based progression of topics presents sections and topics in the same order as they appear on the actual exam. Practice exams with approximately 450 questions appear at the end of the book along with the correct answers and rationales. Approximately 200 diagrams and photographs provide visual evidence to support key topics, including anatomic structures, physiology, and microbiology. Tables and text boxes provide supplementary information and emphasize important data from the text. NEW! Online resources on the companion Evolve website include: Database of exam questions Timed practice exams Custom test generator to mimic the NBDE I Sample cases Answers and rationales Downloadable apps NEW! Practice and testing modes for NBDE I review allow you to test yourself via category or in a testing format that

allows you to create an unlimited number of unique practice tests with instant feedback. UPDATED! New test items types in practice exams include multiple correct answer, extended matching, and answer ordering question types that are found on the latest NBDE exam from the Joint Commission on National Dental Examinations (JCNDE).

Quality and Diversity Globally Harmonized System of Classification and Labelling of Chemicals (GHS).

In 2014 the National Science Foundation (NSF) provided support to the National Academies of Sciences, Engineering, and Medicine for a series of Forums on Open Science in response to a government-wide directive to support increased public access to the results of research funded by the federal government.

However, the breadth of the work resulting from the series precluded a focus on any specific topic or discussion about how to improve public access. Thus, the main goal of the Workshop on Transparency and Reproducibility in Federal Statistics was to develop some understanding of what principles and practices are, or would be, supportive of making federal statistics more understandable and reviewable, both by agency staff and the public. This publication summarizes the presentations and discussions from the workshop.

Wood Energy in the ECE Region

United Nations

Cases of Conflict focuses on times of dispute as important moments in the development of international environmental law. Conflict tests international law—both its content and its relevance become clearer in times of controversy—but conflict can also help shape the law. Drawing from a growing body of scholarship connecting the fields

of international relations and international law, Cases of Conflict examines six prominent case studies to demonstrate how transboundary disputes have influenced the development of international environmental law and policy. Embracing their rich detail and real-world messiness, this book looks to develop a better understanding of the true content and potential of international environmental law.

Development - Design - Diversity
Routledge

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class

inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called ¿Points for Consideration.¿ This unique feature provides valuable insight for understanding the complexities of each case.

Ten Years of the UNECE Strategy for Education for Sustainable Development University of Toronto Press

The present report summarizes the progress, challenges and achievements of United Nations Economic Commission for Europe (ECE) member States from 2005 to 2015 in achieving the Strategy for Education for Sustainable Development (ESD). Many ECE member States now have ESD policies and frameworks in place to support ESD implementation. Hundreds of initiatives have been launched to integrate ESD into the content and processes of formal, non-formal and informal education, moving from policy to practice. However, the challenge of integrating ESD system-wide across all aspects and levels of formal, non-formal and informal learning still remains. The report reviews the data collected through national implementation reports submitted by member States at the end of the third phase of the Strategy, as well as supplemental information provided by

member States to the ECE secretariat through annual informal national reports and reports of ECE Steering Committee for ESD working groups. It also reflects on progress as compared to the first and second evaluation reports for 2007 and 2010. The primary audience is education and environment decision-makers and educators.

Early Childhood Education for Marginalized Children in India Springer

“This remarkable book manages to pinpoint the critical issues in the care and education of young children with up-to-date research, and all of this in a pleasurable and lively style. This needs to be read widely, and right away.”

—Deborah Meier, MacArthur award-winning public school teacher, principal, and author “An ambitious book, unlike any other in early childhood policy . . . a must-read for all who care about kids.” —Nancy Carlsson-Paige, professor emerita, Lesley University “Susan Ochshorn . . . shows us how a few dedicated people, schools, agencies, and institutions have made a difference in children’s lives—a difference that is enhancing early development in this generation and those to come.”

—Samuel J. Meisels, founding executive director, Buffett Early Childhood Institute University of Nebraska “Indispensable for policymakers, educators, and all who care about our future.” —Riane Eisler, social scientist, attorney, and author “Sharp eyed, warm, and lively—a delightful read on a dead-serious topic.”

—Janet Gornick, professor of political science and sociology, City University of New York “An urgent call to action that could change the course of the nation’s future.” —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University “A kaleidoscope of stories and statistics to

illustrate the profound injustices we are visiting on our children and the corresponding injuries we are inflicting on ourselves. We can only hope that Squandering America's Future will help to turn the tide." —Anne-Marie Slaughter, President and CEO, New America

Integrating Disaster Risk Management with Water Management and Climate Change Adaptation Elsevier Health Sciences

The "leave no one behind" principle espoused by the 2030 Agenda for Sustainable Development requires measures of progress for different segments of the population. This entails detailed disaggregated data to identify subgroups that might be falling behind, to ensure progress toward achieving the Sustainable Development Goals (SDGs). The Asian Development Bank and the Statistics Division of the United Nations Department of Economic and Social Affairs developed this practical guidebook with tools to collect, compile, analyze, and disseminate disaggregated data. It also provides materials on issues and experiences of countries regarding data disaggregation for the SDGs. This guidebook is for statisticians and analysts from planning and sector ministries involved in the production, analysis, and communication of disaggregated data.

Globally Harmonized System of Classification and Labelling of Chemicals (GHS). United Nations

Eleventh in a series of annual reports comparing business regulations in 189 economies, *Doing Business 2014* measures regulations affecting 11 areas of everyday business activity around the world.

Manual of Tests and Criteria United Nations

This volume makes a comprehensive assessment of the status and quality of early educational experiences at preschool and early primary grades in India. It raises a serious concern that despite high enrolment in preschools, children's school readiness levels remain low at ages five and six, and raises a vital question---are Indian children getting a sound foundation for school and for later life? It addresses three important issues from the Indian perspective: children's school readiness at age five; families' readiness for school; and, most importantly, the readiness of schools for children. India is one of many countries across the global South facing an early learning crisis. High quality early childhood education may be key to improving these outcomes for children, yet little is known about early childhood education programs in India and their impact on children's school readiness. This volume is based on a longitudinal, mixed methods research study which is perhaps the first of its kind in India. The study covers public provisions along with steadily expanding private pre-schools and schools in rural India and provides interesting narratives and insights into the multiple pathways children are adopting in these critical early years, particularly in the context of the expanding role of the private sector. Written in a lucid and narrative style, this volume is of interest to a diverse readership of researchers, educationists and early childhood education policy makers and practitioners in terms of both its design and findings.
