CARPENTER HIGGINS

International Law and Institutions EOLSS Publications
 As the demand for English language education grows in Asia, there has been a parallel growth in the development and implementation of standardized tests at the local level. Offering much-needed context on locally produced tests in Asia, contributors examine emerging models for English language assessment and the impact these large-scale tests have on the teaching and learning of English. Chapters address the following well-known and developing high-stakes tests in different regions across Asia: the GEPT, the TEPS, the VSTEP, the CET, the EIKEN and TEAP, and the ELPA. Brought together by world-renowned testing assessment scholar Cyril Weir and the Language Training and Testing Center (LTTC), one of Asia's leading testing institutions based in Taiwan, this volume is a useful reference for evaluating, developing, and validating local tests of English and their societal impact. Comprehensive and research-based, chapters cover historic backgrounds, sociocultural contexts, test quality, international standing, and future considerations. Ideal for graduate students, researchers, and scholars in language assessment, TESOL/TEFL, and applied linguistics, this book will also be of interest to language teaching professionals, language test developers, and graduate students in Asian studies and international education, intercultural communication, and intercultural studies.

1998 Report of the Technology and Economics Assessment Panel
 Pearson Education India

Consumer Electronics is the first book of its kind, and comprehensively covers the theory, applications and maintenance of various audio/video systems, telecommunication systems and electronic home/office appliances. The book completely covers the

International Environmental Law Routledge

This book provides climate students with the basic scientific background to climate change management. Students will learn about international and national approaches to climate change management defined in voluntary initiatives as well as in national law and international agreements. The book describes mitigation and adaptation measures, monitoring and reporting of greenhouse gas emissions, and strategies for achieving a low-carbon economy, including green finance. This book combines theory and practice, introducing students to the conceptual background but also taking a professional and technical approach with case studies and low carbon toolkits. Filled with didactic elements such as concept schemes, tables, charts, figures,

examples, as well as questions and answers at the end of the chapters, this book aims to engage critical thinking and the discussion of important topics of our days. The low-carbon strategy is one of the answers to limiting the greenhouse effect on our planet. This strategy is to minimize the overall carbon consumption in the life cycle of the products we consume, from the extraction of raw materials to the end of their life. The future is being built today. This book will guide its readers along the path of imagining and realizing a low-carbon economy."

Publisher Description

Environmental Laws and Their Enforcement - Volume I
 EOLSS Publications

Since the 1960's individuals and organisations throughout the world have been building geographic databases used in conjunction with geographic hardware and software systems to collect, analyse, display and archive digital data. Through the years it was recognised that efficiencies could be gained if the geographic database built by one group could be used by multiple users across different computer systems and formats. Therefore, it was acknowledged that spatial database transfer standards were needed to facilitate the exchange and transfer of digital geographic data. Throughout the 1980's several organisations worldwide began working on the problem of producing spatial database transfer standards. As this work was initiated, research workers began to informally compare notes and developments. The International Cartographic Association [ICA], recognising the worldwide importance of standards, organised a Standards Working Group. The initial goal of this working group was to produce a monograph reporting on the present state of development in digital database transfer standards. This book is a unique collection of reports by individual nations and international organisations that describe existing geographic standards and summarize efforts to develop geographic database transfer standards worldwide.

This publication, Our Fragile World: Challenges and Opportunities for Sustainable Development presents perspectives of several important subjects that are covered in greater detail and depth in the Encyclopedia of Life Support Systems (EOLSS). The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of: Earth's natural resources, social resources, institutional resources, and economic and financial resources. They present the vision and thinking of over 200 authors in support of efforts to solve the complex problems connected with sustainable development, and to secure perennial life support on "The Blue Planet". These

contributions are holistic, informative, forward looking, and will be of interest to a broad readership. This volume presents contributions with focus on the Economic and Institutional Dimensions of Sustainable Development in two sections: KNOWLEDGE, TECHNOLOGY, AND MANAGEMENT (Knowledge; Technology and Management ; Economics; Finance and trade). - POLICY AND INSTITUTIONAL IMPLICATIONS FOR SUSTAINABLE DEVELOPMENT (Policy Issues; Institutional implications; Regional Analysis).

This pocket guide explains the content and the practical use of ISO 21500 - Guidance on project management, the latest international standard for project management, and the first of a family of ISO standards for project, portfolio and program management. ISO 21500 is meant for senior managers and project sponsors to better understand project management and to properly support projects, for project managers and their team members to have a reference for comparing their projects to others and it can be used as a basis for the development of national standards. This pocket guide provides a quick introduction as well as a structured overview of this guidance and deals with the key issues within project management: Roles and responsibilities Balancing the project constraints Competencies of project personnel All ISO 21500 subject groups (themes) are explained: Integration, Stakeholder, Scope, Resource, Time, Cost, Risk, Quality, Procurement and Communication. A separate chapter explains the comparison between, ISO 21500 and PMBOK® Guide PRINCE2, Agile, Lean, Six Sigma and other methods, practices and models. Finally, it provides a high level description of how ISO 21500 can be applied in practice using a generic project life cycle. Proper application of this new globally accepted project management guideline will support organizations and individuals in growing their project management maturity consistently to a professional level.

International Law and Institutions is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The main role of international law is to promote global peace and prosperity. Ideally, international law and its accompanying institutions act as a balm to smoothen and rationalize opposing interests that nations may have. This theme on International Law and Institutions addresses International Legal and Economic Issues: Globalization and the Struggle for Local Control and International Environmental Law, which are then expanded into

multiple subtopics, each as a chapter. This volume is aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

ISO 21500 Guidance on project management - A Pocket Guide UNEP/Earthprint

ISO 21500, officially published in September 2012, is the first overarching guideline for project management that presents a common frame of reference and a process standard. This international standard firmly positions projects within the context of programs and project portfolios and is the basis for further development of the project management profession. This book explains the background, the value, the implementation and the application of ISO 21500 for each type of organization. It describes what you, as a customer, supplier, manager or member of project staff, can do or maybe should do with the guideline. The book supplies answers to the 100 most common asked questions about ISO 21500 with the focus on the value of the guideline for the project management practice. The target audience of this book includes: - Senior managers and project sponsors, so that they gain a better understanding of the principles and practice of project management and therefore provide appropriate support and guidance to their project managers, project management teams, and the project teams; - Project managers, project management teams, and project team members, so that they have a common base of comparison of their project standards and practices with those of others; - Developers of national or organizational standards, for use in developing project management standards, which are consistent at a core level with those of others. - Consultants, educators, coaches and trainers in the project management discipline. They can connect various generally known and bespoke project management methods, models and best practices to the ISO 21500 framework as a common frame of reference.

Climate Change 2007 - Mitigation of Climate Change Cambridge University Press

The Report of the Technology & Economic Assessment Panel covers: recent CFC & HCFC production & consumption; lessons learned & challenges for the future; challenges for Article 5(1) Parties & countries with economies in transition; executive summaries of Technical Options Committee Reports. It also contains comprehensive information on the members of the Panel.

Standardization and Documentation EOLSS Publications

'Imagine the pride of earning the Nobel Prize for warning that CFCs were destroying the ozone layer. Then imagine that citizens, policymakers, and business executives heeded the warning and transformed markets to protect the earth. This book is the story of why we can all be optimistic about the future if we are willing to be brave and dedicated world citizens.' MARIO MOLINA, Nobel Laureate in Chemistry and Professor, University of California This book tells how the Montreal Protocol, the most successful global environmental agreement so far, stimulated the development and worldwide transfer of technologies to protect the ozone layer. Technology transfer is the crux of the 230 international environmental treaties and is essential to fighting climate change. While debate rages about obstacles to technology transfer, until now there has been no comprehensive assessment of what actually works to remove the obstacles. The authors, leaders in the field, assess over 1000 technology transfer projects funded under the Montreal Protocol's Multilateral Fund and the Global Environment Facility, and identify lessons that can be applied to technology transfer for climate change.

Technology and Economic Assessment Panel Cambridge University Press

Environmental Laws and Their Enforcement is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The volume

on Environmental Laws and Their Enforcement deals, in two volumes, with a myriad of issues of great relevance to our world such as: Sustainable Development and National Governance; History of Environmental Law; International Environmental Law; Constitutional Law; International Binding Mechanisms; Laws Governing Freshwater and Ground Water Pollution; Forestry; Biodiversity Conservation and Endangered Species Protection; International Guidelines and Principles; Compliance Models for Enforcement of Environmental Laws And Regulations; International Environmental Law; Life Support Systems: Law and Policy; The Principle of Sustainable Development in International Development Law; Environmental Pollution Regulations; Social Concerns for Environmental Exposures to Toxic Substances; Regulation of Air and Pollutants. These volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

Safeguarding the Ozone Layer and the Global Climate System Elsevier

The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provide the most comprehensive and balanced assessment of climate change available. This IPCC Working Group III volume provides a comprehensive, state-of-the-art and worldwide overview of scientific knowledge related to the mitigation of climate change. It includes a detailed assessment of costs and potentials of mitigation technologies and practices, implementation barriers, and policy options for the sectors: energy supply, transport, buildings, industry, agriculture, forestry and waste management. It links sustainable development policies with climate change practices. This volume will again be the standard reference for all those concerned with climate change, including students and researchers, analysts and decision-makers in governments and the private sector.
