How to Get Water

Smart C.F. Müller
GmbH

Now in its 3rd edition,
the bestselling
Ecohouse continues to
be both a technical
guide and an
inspiration for
thousands of
architects, designers
and eco-builders all

over the world. As the
need to slow climate
change becomes
increasingly urgent,
growing numbers of
people are looking to
dramatically reduce
the carbon footprint of
their buildings by using
more ecologically
sound techniques.
Ecohouse provides
design information
about the latest low-
impact materials and
technologies,
showcasing the newest

and best 'green' solutions with international case studies demonstrating sustainable design in action around the world. This edition has been expanded to include advice on powering Ecohouses using renewable energy - including wind, micro hydro and heat pumps - and an introduction to low impact building materials such as lime, earth and hemp. New case studies from across the globe have been added to inspire readers with real life examples of how to make an Ecohouse work. Just reading this book won't save the world from the impact of climate change - but if everyone from governments down to householders followed its advice we might

just begin to turn the tide. Additional audience: Eco-enthusiasts and green self-builders will appreciate the handy hints and references on refurbishment and advice on how to kit out their Ecohouse with the greenest appliances and fittings. Lecturers and students on sustainable design and construction courses will find the latest real-world case studies fascinating and a great source of inspiration for their studio project work.

The Illustrated London News Oxford University Press
This book is a collection of research results in a wide range of topics related to human-robot interaction, both physical and cognitive, including theories,

methodologies, technologies, and empirical and experimental studies. The works contained in the book have been presented at the 14th International Workshop on Human-Friendly Robotics (HFR 2021), organized by the University of Bologna (Bologna, Italy, October 28-29, 2021), and they describe the most original achievements in the field of human-robot interaction coming from the ideas of young researchers. The intended readership of the book is any researcher in the field of robotics interested to research problems related to human-robot coexistence, like robot interaction control, robot learning, and human-robot co-working.

How do technological

and cultural

developments interact

to affect consumption?

What do ways of using

household goods in

specific historical

contexts tell us about

individual and

collective identities?

Do changes in

consumption patterns

emancipate social

groups or reinforce existing structures of power? The 'economic miracle' experienced by West Germany in the 1950s and 1960s had profound effects on everyday life and gender relations. This book reflects the growing need for historical research on leisure and consumption in the modern period and provides a very entertaining and carefully researched study of ideas about women, men, housework, consumption, and modernity. It contrasts the virtual reality presented by advertisements with the important qualitative changes in household appliances and how they affected everyday life and gender roles. New

products claimed to make housework easier, but the idea of substituting money for labor contrasted with the ideal of the thrifty, hard-working housewife and a clear division of gender roles. The author examines a broad range of issues encompassing the transformation of household appliances from luxuries to necessities, the threat of consumer debt, men and housework, women and technology, and labor and leisure in the modern household. This timely book represents a significant contribution to the following areas: material culture, German history, women's history, sociology, media/cultural studies

and anthropology.

Springer Nature

On February 21, 1994, a gesticulating and screaming woman entered a crowded public square in Tehran, removed her government-mandated veil and full coat, poured gasoline on her body and lit herself on fire. The crowd watched in horror as this woman, who had shouted, Death to tyranny! Long live freedom!, committed a slow, painful suicide in a last, desperate attempt to make the world aware of the slavlike conditions of women living in Iran. A shockwave was felt in the American medical and feminist communities as well as in the Iranian political regime when the

media reported that the self-appointed martyr was well-respected Dr. Homa Darabi, a lifelong advocate of civil rights and the first Iranian ever to be accepted into the American Board of Psychiatry and Neurology. Darabi had risen from a student activist to a civil rights leader and moved on to a brilliant career in medicine as a premier psychiatrist, teaching at the University of Tehran, and establishing the first clinic in Iran to treat children's mental disorders. Darabi's sister Parvin, an activist and writer since her immigration to California in 1964, was left with only questions the day her sister took her own life. And those questions led to a careful

examination of Homa's life in the shadow of an oppressive Muslim regime, where the intelligent and outspoken Dr. Darabi courageously tried to make a difference. Masterful storytellers, Parvin, and her son, Romin P. Thomson, vividly recreate Homa's childhood in Iran in the politically tempestuous '50s and '60s—a time of limited resources, tensions, and religiously sanctioned child abuse. They remember Homa's early yearnings for justice; the battle for democracy during the Shah's regime; and her marriage, which began as a loving partnership and ended under Khomeini in disaster. They unflinchingly recount the stonings, beatings, rapes, and

executions of women, all performed in the name of God—outrageous abuses that Dr. Homa Darabi tried to expose to the world through her own final act of desperation. If you care about basic human rights, this scathing indictment of contemporary oppression in Iran will enrage you. Parvin Darabi, a women's and minority rights activist and lecturer, is founder and president of the Dr. Homa Darabi Foundation, a nonprofit international human rights organization. The group defends the rights of women and children against religious, cultural, and social abuse. Romin P. Thomson is an attorney in San Jose and a writer.

Over 950 entries From the Arts and Crafts Movement to Postmodernism, Apple to Frank Lloyd Wright, this fascinating dictionary covers the past 160 years of international design, with accessible entries on branding, graphics, industrial design, functionalism, and fashion. New entries on digital design and sustainable design bring the coverage up to date. The dictionary's international focus takes in major

movements, key concepts, design terminology, and important design institutions, museums, and heritage sites. The new edition reflects the growing global importance of design, with coverage of India, China, the countries of the Pacific Rim, Eastern Europe and East Asia, and demonstrates how developments in the design of technology influence everyday life, with new entries on fonts, games developers such as Gunpei Yokoi of Nintendo, Android, Samsung, and Blackberry, and a fully revised entry on Apple. The A-Z entries are complemented by an extensive bibliography and a timeline.

Routledge
Is aluminium bad for you? What is an Environment Management System? Is there an effective substitute for Chlorine Bleach? The A - Z of Corporate Environmental Management provides answers to these and many other questions, and is an invaluable guide to managing a company's environmental impact. This practical directory assesses hundreds of products in common use, from aerosols to zinc, via formaldehyde and phosphates. Using an easy-to-understand format it: explains each product's use, its benefits and its environmental risks; recommends safer alternative choices where available; explains issues such as

animal testing, eco-labels and recycling; and examines the main impacts of major industries, from aerospace to zoos. Its compact, jargon-free definitions will enable you to produce safer products and communicate your needs more effectively to suppliers. Making extensive use of figures and cross-referencing, this book is ideal for managers who are introducing corporate environmental programmes and risk assessments, and for anyone who needs an objective view of environmental issues in business. With over 800 entries, the A-Z of Corporate Environmental Management provides a clear and authoritative summary

of the subject. Its encyclopedic coverage includes: *

- Management strategies such as ISO 14001
- * UK, EU and international legislation
- * General issues, eg timber
- * Toxic substances, eg organochlorines
- * Waste management, eg landfill
- * Disasters, eg contamination at the Union Carbide plant, Bhopal
- * Water pollutants, eg chlorine
- * Air pollutants, eg carbon monoxide

The A-Z will help you to: *

- Reduce your organisation's impacts
- * Understand major issues
- * Decide which chemicals to use
- * Assess whether you are complying with legislation
- * Communicate with staff and customers
- * Implement an environmental

management system
 With hundreds of best practice points, the A-Z shows how to reduce pollution, cut costs, improve staff motivation, increase sales and avoid litigation. Its checklists, charts and tables make it a highly practical tool for anyone needing to understand and implement environmental management.

The ongoing "Changes in Scenery" are presented in the form of current work by landscape architects from eight countries. Gardens, courtyards, city squares and parks

- as classical projects by landscape architects - are joined by designs showing co-operation with other disciplines: from large-scale traffic planning via the conversion of industrial monuments and right on to video art - and of course, as a constant theme, fruitful encounters with architecture.

Since the 1990s we witness a rise in public apologies. Are we living in the 'Age of Apology'? Interesting research questions can be raised about the opportunity, the form, the meaning, the effectiveness and the ethical implications of public apologies. Are they not merely a clever and easy device to escape real and

tangible responsibility for mistakes or wrong done? Are they not at risk to become well-rehearsed rituals that claim to express regret but, in fact, avoid doing so? In a joint interdisciplinary effort, the contributors to this book, combining findings from their specific fields of research (legal, religious, political, linguistic, marketing and communication studies), attempt to articulate this tension between ritual and sincere regret, between the discourse and the content of apologies, between excuses that pretend and regret that seeks reconciliation.

Data Warehousing and Knowledge Discovery
Springer
The Second
International

Conference on Data Warehousing and Knowledge Discovery (DaWaK 2000) was held in Greenwich, UK 4-6 September.

DaWaK 2000 was a forum where researchers from data warehousing and knowledge discovery disciplines could exchange ideas on improving next generation decision support and data mining systems. The conference focused on the logical and physical design of data warehousing and knowledge discovery systems. The scope of the papers covered the most recent and relevant topics in the areas of data warehousing, multidimensional databases, OLAP, knowledge discovery and mining complex

databases. These proceedings contain the technical papers selected for presentation at the conference. We received more than 90 papers from over 20 countries and the program committee finally selected 31 long papers and 11 short papers. The conference program included three invited talks, namely, "A Foolish Consistency: Technical Challenges in Consistency Management" by Professor Anthony Finkelstein, University College London, UK; "European Plan for Research in Data Warehousing and Knowledge Discovery" by Dr. Harald Sonnberger (Head of Unit A4, Eurostat, European Commission); and "Security in Data

Warehousing" by Professor Bharat Bhargava, Purdue University, USA. *Heidelberger Kommentar zum Wettbewerbsrecht* Terra Firma Pub

Sustainable development will not be possible without fundamental improvements in resource productivity and energy efficiency, the adaptation of material flows into natural cycles as well as a radical change in production and consumption patterns. In essence, what is required is not only an ecological approach to product design but also new marketing and consumption patterns

for products that can satisfy our needs in a more environmentally sound way. In recent years there has been growing interest in the possibilities of eco-services to achieve some of these aims. Ecologically oriented leasing, renting, pooling and sharing, where the emphasis is placed on the sale of a product's use rather than on the product itself, offer great possibilities for innovation and environmental impact reduction. At the same time, there are opportunities to create new commercial enterprises, produce added value to production and distribution functions, and therefore create jobs. Up until now, however, there has been little research

about the state of the art in eco-services, how new services can be developed, what the attitudes of consumers are to services rather than products and what the consequences of such a structural adjustment would be for firms. Eco-service Development addresses this lack of research, first by providing a comprehensive inventory and analysis of current eco-services in four European countries: Germany, Austria, the Netherlands and Spain. It then systematically explores the options open to market participants, the potential for environmental impact reduction, potential barriers to eco-services (such as consumer and producer resistance)

and, finally, with what political and legal instruments ecologically oriented services can best be promoted. The book analyzes eight consumer sectors – washing, cleaning, cooking, entertainment, gardening, do-it-yourself, mobility and leisure time – from the point of view of both supply and demand and highlights the optimization potential and development perspectives for commercial new use eco-service concepts. This book is the most comprehensive analysis yet published of how eco-services are being implemented and how they could best be encouraged and contains valuable lessons for policy-makers, interested

businesses and all those in the academic community searching for ways to dematerialize the economy.

Hoher Energie- und vor allem Stromverbrauch ist zu einem Problem geworden - aber wie konnte er zu einem bestimmenden Faktor westlichen Lebenswandels werden? Sophie Gerber widmet sich der Frage nach seiner Etablierung in privaten Haushalten zwischen 1945 und 1990 sowie der Rolle von elektrischen (Küchen-

)Geräten und ihren Konsument_innen. Auf der Grundlage eines breitgefächerten Quellen- und Materialkorpus untersucht sie das Phänomen des rasant steigenden privaten Energieverbrauchs in seiner Bedeutung für die gesamtgesellschaftliche Entwicklung. Die Studie entwickelt eine neue Perspektive auf die Energiegeschichte und trägt dazu bei, die Herausforderungen der »Energiewende« besser zu verstehen.

 Ecohouse is an exciting and timely text that tells you how to design low energy,

environmentally friendly buildings today. It also provides the foundations for building design in a warming world, and stepping stones towards the zero-carbon emission buildings of tomorrow. Sue Roaf is famed for her approach to design and her awareness of energy efficiency. Here she reveals the concepts, structures and techniques that lie behind the realization of her ideals. By using her own house as a case-study Roaf guides the reader through the ideas for energy efficient design or 'eco design'. This guide to the ecohouse also explores 21 case-studies from around the world, from Norway and Sweden to India and Japan, Argentina and Mexico. Chapters

by Christopher Day, Katherine Bohn and Andre Viljoen on ecological building materials and methods and a contribution by Robert and Brenda Vale - all experts in this field Ecohouse has a regularly updated companion web site providing further information on all issues relating to

Ecohouse and eco design. Log on to www.bh.com/companions/ecohouse for a direct link.
