‘The Possessed’ is considered to be one of the four masterpieces written by Dostoevsky after he returned from his Siberian exile. The story takes place in a small Russian town that is thrown into chaos by the arrival of a mystery man, Pyotr Stepanovich. Paranoia grips the town as family and friends betray one another while Pyotr plans a violent political uprising. The novel builds to a brutal and bloody climax, as the town is engulfed by flames and the death toll rises. ‘The Possessed’ displays Dostoevsky’s mastery of tragedy and social satire as the established political and familial norms of the town are uprooted and destroyed by the young revolutionaries. Dostoevsky explores the loss of morality in 19th Century Russia, as a society without a moral grounding tragically turns to nihilism and violence, but its ideas are just as resonant in today’s secular world. Celebrated author Joyce Carol Oates described ‘The Possessed’ as a work of ‘unparalleled genius’ and its epic scope and blend of political intrigue and familial tragedy make it the perfect read for fans of classic Russian or Greek literature. Fyodor Dostoevsky (1821-1881) was a famous Russian writer of novels, short stories, and essays. A connoisseur of the troubled human psyche and the relationships between the individuals, Dostoevsky’s oeuvre covers a large area of subjects: politics, religion, social issues, philosophy, and the uncharted realms of the psychological. He is most famous for the novels ‘Crime and Punishment’, ‘The Idiot’, and ‘The Brothers Karamazov’. James Joyce described Dostoevsky as the creator of ‘modern prose’ and his literary legacy is influential to this day as Dostoevsky’s work has been adapted for many movies including ‘The Double’ starring Jesse Eisenberg.

For much of the world, the twentieth century can be seen as a big-budget disaster film--the stifling darkness of oppression, the green of the ruling classes. For the world's elite, the near-universal adoption of capitalism today reveals modern history as a narrative of unbroken progress. Eschewing conventional chronological accounts, The Twentieth Century is organized around the major themes of the last hundred years. To help us understand our recent past and probable future, Clive Ponting offers a "world systems" theory. His analysis holds that a few core states have dominated much of the rest of the world, which provides raw materials and cheap labor and remains tied to the core as virtual colonial territory. Between these extremes are Latin America, the Middle East, and eastern Asia, which have a limited shot at self-determination. Economic, social, and political differences between the core and periphery continue to grow. Atlantic predominance, which molded world history for four hundred years, has been challenged by the countries of the Pacific. The book's central theme revolves around the struggle between progress and barbarism; the hope for our future is that "our conscience will catch up with our reason." Everywhere in the world people now live longer than their predecessors. A majority has become literate, and most have benefited from recent technological progress. Nevertheless, democracy is unavailable to the preponderance of people, and in the century's final years the chasm between rich and poor continues to expand. On the eve of the millennium this vivid history is a must-read.

Over 2,300 entries with etymology and extensive cross-references to other terms Includes examples of usage in context to supplement the definitions of Latin terms and phrases Provides the modern pronunciation, classic pronunciation, and context of meaning for each Latin term As knowledge of Latin continues to diminish, the constant use of this language in cases, textbooks, treaties and scholarly works baffles law students, practitioners, and scholars alike. Most of the Latin terms commonly used by international lawyers are not included in some of the more popular law dictionaries. Terms and phrases included in modern dictionaries usually offer nothing more than a literal translation without sufficient explanation or context provided.

Guide to Latin in International Law provides a comprehensive approach and includes both literal translations and definitions with several useful innovations. Included is not only the modern English pronunciation but also the classical or "restored" pronunciation. Its etymology is more complete than the leading law dictionary on the market, and the definition for each term includes examples used in context whenever helpful. Each entry is also cross-referenced to related terms for ease of use. The editors make clear that the understanding of Latin is a critical skill for practitioners who hope to acquire and understand sources of law and each other. Readership: Law students, practitioners, and scholars, both domestically and internationally, unfamiliar with legal terms originating in Latin

Kamal Abdulla is a well-known Azerbaijani writer and scholar. He has written works on linguistics, culturology and mythology, and is the author of poetry, essays, plays, stories, and novels. His prose has been published and translated into French, Turkish, Russian, English, Portuguese, German, Polish, Bulgarian, Georgian, Arabic, Lithuanian, Japanese, and other languages. His plays have been performed in Azerbaijan, Georgia, and Estonia. His work is not without its detractors. Many articles and books have been written about his work, some positive, some negative. He has won literary awards in his own country, and been subject to unfair criticism. In the early years of Azerbaijan's independence, liking his novels was considered a sign of good literary taste. In later years, not liking these works is considered a sign of good literary taste. Original language, world view, philosophical foundation, and mythological sense characterize his work. His writing features mountains invisible to the eye, and valleys of sorcerers where it is forever spring. Here ancient manuscripts come to life and history is re-read in a completely different way. Centaurs roam his favourite city, Baku, while in ancient Egypt, people turn into flowers, and flowers into people. The idolized heroes of his mythological texts are fleshed out as ordinary, everyday people. Sometimes dead people emerge from their images, restore justice, and then return to their images. Not satisfied with living in their own worlds, characters lead very different lives in parallel worlds. The story of Theseus and the Minotaur enters our own time, and finally the phantasmagoria reaches such a point that Paris gives the apple to Hera, not Aphrodite...

This research-based, comprehensive introduction to multicultural education and diversity prepares future teachers for the wide diversity of students they will meet in their classrooms, schools, and communities. Moving beyond the purely cultural approach of many comparable texts, Human Diversity in Education addresses the full range of human diversity found in today's schools--including nationality, ethnicity, race, religion, gender, class, language, sexual orientation, and ability levels. Based on the assumption that change begins with the individual teacher, the text argues that prospective teachers must learn to incorporate issues of diversity in all of their work--including in their interactions with children, parents, colleagues, and the community.

This volume presents a sketch of the Meaning-Text linguistic approach, richly illustrated by examples borrowed mainly, but not exclusively, from English. Chapter 1 expounds the basic idea that underlies this approach--that a natural language must be described as a correspondence between linguistic meanings and linguistic texts--and explains the organization of the book. Chapter 2 introduces the notion of linguistic functional model, the three postulates of the Meaning-Text approach (a language is a particular meaning-text correspondence, a language must be described by a functional model and linguistic utterances must be treated at the level of the sentence and that of the word) and the perspective "from meaning to text" for linguistic descriptions. Chapter 3 contains a characterization of a particular Meaning-Text model: formal linguistic representations on the semantic, the syntactic and the morphological levels and the modules of a linguistic model that link these representations. Chapter 4 covers two central problems of the Meaning-Text approach: semantic decomposition and restricted lexical cooccurrence (≈ lexical functions); particular attention is paid to the correlation between semantic components in the definition of a lexical unit and the values of its lexical functions. Chapter 5 discusses five select issues: 1) the orientation of a linguistic description must be from meaning to text (using as data Spanish semivowels and Russian binominative constructions); 2) a system of notions and terms for linguistics (linguistic sign and the operation of linguistic union; notion of word; case, voice, and ergative construction); 3) formal description of meaning (strict semantic decomposition, standardization of semantemes, the adequacy of decomposition, the maximal block principle); 4) the Explanatory Combinatorial Dictionary (with a sample of complete lexical entries for Russian vocables); 5) dependencies in language, in particular--syntactic dependencies (the criteria for establishing a set of surface-syntactic relations for a language are formulated). Three appendices follow: a phonetic table, an inventory of surface-syntactic relations for English and an overview of all possible combinations of the three types of dependency (semantic, syntactic, and morphological). The book is supplied with a detailed index of notions and terms, which includes a linguistic glossary.

A strong-willed woman. A ruthless pirate. Their formidable bond. Seonag Ruane never believed her father died in an ambush. She knows he was betrayed by men he trusted. Driven by her mother's grief and her own need for vengeance, Seonag will do whatever it takes to discover the truth. Even risk her own life. Her plan for revenge never included falling in love with the sweet-tongued pirate who shared his secrets late at night. Captain Colin Harris's closest friend was killed by his mutinous crew. He vows to avenge his fellow pirate's death by seeking retribution and recovering the bounty the ship was transporting. It's the least he can do for the family left behind. His mission is compromised when he discovers the lad he recently hired is actually a woman in disguise and their mutual bond of trust is broken. Angered by her deceit, he imprisons the masquerader. Seonag is certain she's failed in her quest to destroy those responsible for her father's death. How will she forgive the one man she thought she could trust? Unable to dismiss the powerful pull of attraction toward the lass, Colin decides to free her, only to learn too late that she has been captured. Worse he discovers that she is his late friend's daughter. Will he get to her before his mistake takes away the one woman that might make him whole? Please note: This book was previously published but has been updated and expanded.

"During his reign, Joseph Stalin oversaw the forced resettlement of people by the millions - a maniacal passion that he used for social engineering. Six million people were resettled before Stalin's death. This volume is the first attempt to comprehensively examine the history of forced and semi-voluntary population movements within or organized by the Soviet Union. Contents range from the early 1920s to the rehabilitation of repressed nationalities in the 1990s, dealing with internal (kulaks, ethnic and political deportations) and international forced migrations (German internees and occupied territories)."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The book *Constructions in French* is the first collected volume to focus on French syntax from a constructionist perspective. It has been written with two kinds of readers in mind: for readers interested in the relationship between the French linguistic tradition and cognitive linguistics, and for readers who would like to examine how constructional analysis can be applied to a variety of French language phenomena. The eleven papers illustrate the insights generated by combining lexicalist and constructionist approaches, focusing on syntax as a dynamic system and using corpus data from a variety of speech genres. The contributions provide new findings about French usage trends (in linguistics and in psycholinguistics), including insights into new, nonstandard and poorly studied constructions.
