 "Realizing that most students in an  
 introductory managerial accounting course  
 are not going to major in accounting, this  
 book seeks to position managerial  
 accounting in a broader context of  
 business decision making."--Pref.  
[Managerial Accounting CreateSpace](http://ManagerialAccountingCreateSpace)

 Accounting provides the students with  
 thorough grounding in cost concepts, cost  
 behaviour and methods, and techniques of  
 cost and management accounting with an

 understandable and highlight its finer  
 points. The subject matter has been  
 organized on 'first things first' basis for its  
 logical presentation that sustains interest.  
 The approach of the book is examination  
 oriented. Thus, a good number of  
 problems and solutions have been  
 included in its chapters. Theoretical and  
 numerical questions have been mostly  
 selected from various examinations.  
 Objective type questions have been given

to serve as self-test by students. This is an ideal book for self-study. An all-inclusive, ideal book for self-study, both for the students of Cost and Management Accounting as well as working professionals.

"Wisdom is not a product of schooling but of the lifelong attempt to acquire it." Albert Einstein was quoted as saying. I think the big mistake in schools is trying to teach children anything, and by using fear as the basic motivation. Fear of getting failing grades, fear of not staying with your class, etc. Interest can produce learning on a scale compared to fear as a nuclear explosion to a firecracker. This book presents a new learning style evident with today's students and addresses accounting industry changes as well. This textbook is not written as a reference text, rather it is written in another form where knowledge can be bridged and tested through questions and answers in a multiple choice format.
