Meet Greg Kenton, billionaire in the making. Greg Kenton has two obsessions -- making money and his long-standing competition with his annoying neighbor, Maura Shaw. So when Greg discovers that Maura is cutting into his booming Chunky Comics business with her own original illustrated minibooks, he's ready to declare war. The problem is, Greg has to admit that Maura's books are good, and soon the longtime enemies become unlikely business partners. But their budding partnership is threatened when the principal bans the sale of their comics in school. Suddenly, the

two former rivals find themselves united against an adversary tougher than they ever were to each other. Will their enterprise -- and their friendship -- prevail?

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn

to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

As a teacher, you know the excitement of sharing those life-changing moments with your students when they comprehend the previously unknown. This book follows the yearlong journeys of three reading teachers who discovered the challenges and rewards that come with addressing the needs of struggling readers. As the authors share their insights, you'll come to learn that good teaching requires not only knowing your craft but also knowing your students. The chapters focus on the five teaching principles that the authors consistently found to be effective with all their students - meaningful conversation, choice, pertinent instruction, consistent support, and purpose - and came to call points of action. The chapters recount the individual struggles and successes of three students as they become readers, specifically illustrating the points of action and how critical they are to successful reading instruction. The final chapter offers additional activities that you can use to bring the points of action into your own classroom. The many classroom vignettes and excerpts of student dialogue throughout the chapters bring the students' voices to the forefront. you and your colleagues. All students have their own unique stories from which you can learn. So join the authors on their journeys, and let this book lead you to your own discoveries.

"Great fun and fascinating history." —School Library Journal, (starred review) This entertaining volume, by Newbery Honor-winning author Jean Fritz, sheds light on the life of England's King George III. It begins when he was a bashful boy who blushed easily, goes on to his early days as king, and finally examines his role in the American Revolution - when Americans ceased to think of him as good King George. Fascinating history made accessible for young readers. "The lively text includes plenty of amusing, personality-revealing anecdotes . . ." —Children's Literature

READ 180 is a comprehensive reading intervention program designed to meet the needs of elementary to middle school students whose reading achievement is below the proficient

level. The program directly addresses individual needs through differentiated instruction, adaptive and instructional software, high-interest literature, and direct instruction in reading, writing, and vocabulary skills. Stage A provides tools for young struggling readers in elementary school to develop critical literacy skills. Stage B provides middle school struggling readers with topics designed for their level of reading that hold their interest. System 44 was designed for the most challenged, older struggling readers, and helps these students understand that the English language is a finite system of 44 sounds and 26 letters that can be mastered. It uses validated assessment for screening and placement, research-based phonics instruction and highly motivating and age-appropriate adaptive technology.

As multicultural education is becoming integral to the core curriculum, teachers often implement this aspect into their courses through literature. However, standards and criteria to teach and promote active discussion about this literature are sparse. Cultural Journeys provides these guidelines through the age-appropriate fiction and non-fiction works embedded in the book. With the example unit plans and extensive annotated bibliography, this book is a valuable resource that pre-service and in-service teachers will utilize throughout their careers.
