 The approach used by Hoyle, Schaefer, and Douppnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 10e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of

financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the nine previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The Tenth Edition includes an increase integration of IFRS as well as the updated accounting standards. *Advanced Accounting* Pearson Higher Ed Written by E. John Larsen, the Study Guide contains an outline of the important points for each chapter, plus a variety of

objective questions, short exercises, and a case. Answers are found at the end of each study guide chapter.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. The cases in The Lakeside Company are intended to create a realistic view of how an auditor organizes and conducts an audit examination. These cases provide a simulation that permits learners to put the abstract and difficult concepts of auditing into practice.

This document contains a record of the oral and written testimony of witnesses at a Chicago (Illinois) Congressional hearing on the Job Opportunities and Basic Skills (JOBS) Training Program. Witnesses at the hearing included officials from various Illinois programs funded by the JOBS program, government officials, and unemployed persons. They testified that the high state match of funds and services works against the successful implementation of the JOBS program and the requirements of the Family Support Act of 1988 are burdensome. Witnesses noted that in times of recession, the states simply do not have enough money to set up the matches for federal funds.

Witnesses also stated that the JOBS program's requirement that participants engage in 20 hours per week of education is unrealistic because most literacy programs or postsecondary programs require less than 20 hours of classroom work but presume home study time. The 20-hour rule works against participants improving their skills. Proposed changes in the JOBS legislation to lessen the amount of state money required and to make program requirements more flexible are included in these proceedings. (KC)

Copley's *Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e* is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial

statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.
