This book explores two combined approaches (strategy and accounting) from a cross-disciplinary perspective in order to improve knowledge of value creation in various contexts. Existing studies on this topic have generally adopted a purely account-based or strategy-oriented approach to address this issue. However, this book draws upon a number of well-defined theoretical and empirical backgrounds and methodologies. Since the 1980s, many changes have occurred and companies have increasingly focused their strategies on value creation. Consequently, new strategic directions have emerged, especially for managerial accounting.

Management accounting and alignment with strategy could thus improve performance. This book encourages further thought and reflection on these issues which should be pursued in the future as firms face new challenges associated with the acceleration of digital transformation.

a collection of the best thinking from one of the most innovative management consulting firms in the world. For the past thirty-five years, The Boston Consulting Group has been shaping the way business is done the world over, and now, *Perspectives on Strategy* offers a unique opportunity to acquaint readers with a broad selection of the firm's contributions. A compilation of seventy-five of BCG's most influential articles and thought pieces, this book is an indispensable source of fresh ideas, insights,

and practical lessons for managers, executives, and entrepreneurs in every industry. Here is a sampling of what's inside: * "[Business] competition is a battle royal in which there are many contenders, each of whom must be dealt with individually. Victory, if achieved, is more often won in the mind of a competitor than in the economic arena." * "The majority of products in most companies are cash traps. . . . [They] are not only worthless, but a perpetual drain on corporate resources." * "Use more debt than your competition or get out of the business." * "Displacement of high-cost competitors by lower prices benefits the customer." * "As a strategic weapon, time is the equivalent of

money, productivity, quality, even innovation." * "When brands become business systems, brand management becomes far too important to leave to the marketing department." * "The winning organization of the future will look more like a collection of jazz ensembles than a symphony orchestra." * "Most of our organizations today derive from a model whose original purpose was to control creativity." * "Dumping should be encouraged. It is a gift from the nation that provides the products." * "Taxes should be levied when, and only when, individuals disinvest in order to consume. Capital still at work should not be taxed at all." The Boston

Consulting Group is an innovator in business strategy worldwide. In fact, BCG and its founder, Bruce D. Henderson, may be best known internationally as the creators and architects of the discipline of business strategy. Innovative business concepts originating at the firm include "cash cow," "experience curve," "segment-of-one(r) marketing," "time-based competition," and "capabilities-based competition." Now, for the first time, BCG's most influential writings are gathered in a comprehensive collection, offering serious-minded readers access to BCG's thinking on the theory, development, and practice of business strategy. One way BCG

shares its insights on strategy is through a series of publications known as Perspectives. Perspectives offer sharply focused views and recommendations on strategic business topics. Distributed to executives worldwide, Perspectives are typically no more than 1,200 words in length. This book brings together many of the most influential Perspectives, as well as several acclaimed articles published in the Harvard Business Review. Both timely and timeless, the seventy-five pieces included here are among the most innovative, controversial, and stimulating to have appeared over the past three decades. An anthology of the most provocative thinking

from one of the world's most esteemed management consulting firms, Perspectives on Strategy is essential reading for senior managers, executives, entrepreneurs, and students of strategy and business.

For investment banking, corporate finance, strategy consulting, money management or venture capital courses at the graduate level. Students benefit because the book provides a framework for understanding how taxation influences asset prices, equilibrium returns, and the form and content of contractual agreements. The revision features a stronger MBA

perspective and emphasis on student learning. This is achieved by integrating the tax law with fundamentals of corporate finance and microeconomics. In addition, the second edition focuses more clearly on the economic consequences of alternative contractual arrangements than on the precise tax laws governing the arrangements. *Strategic Management* Biggerpockets Publishing, LLC In managerial literature the challenges of ramping-up, growing and enhancing a (Finance) Shared Services Organization are regularly neglected. Therefore, the compilation will address two objectives: First, based on a

generic phase model of an SSO's development, frequently arising questions related to the management of SSOs shall be systematically discussed and practicable solutions derived. Secondly, a picture of the future of SSOs shall be elaborated, resulting in new future management implications.

Scientific Essay from the year 2014 in the subject Business economics -

Accounting and Taxes, (Atlantic International University) (Faculty of Business and Economics), course:

Business Management, language: English, abstract: This study examined the impact of business strategy on

the organizational performance of Small-Medium Scale Enterprises (SMEs) in the manufacturing sector of Ghana.

Whereas some SMEs are aware of the extent to which strategy can impact on their businesses, not much has been studied to identify the specific strategies which can be used to improve the performance of the SMEs. The study made use of questionnaires which were administered to 100 respondents who were randomly drawn from 10 SMEs. The performance indices were derived from a time series data from 2008 to 2013 on sales, profits before tax and labour size. Regression and analysis of variance (ANOVA) were run to examine the

relationship between strategy and organizational performance. It was found that, business strategy statistically and significantly impacted on organizational. Again, cost leadership significantly influenced organizational behaviour but differentiation and focus strategies did not. The study recommends that the SMEs should strategic enough and also take advantage of cost leadership to enhance growth and induce greater organizational performance.
