HURLEY SHYANNE

Introduction to Plastics Recycling Hay House, Inc
Household appliances encompass a large variety of equipment including the cold appliances (refrigerators and freezers), the wet appliances (washing machines, dishwashers and dryers), the space conditioning appliances (heaters, air conditioners, heat pumps, fans, boilers), the water heaters, the cooking appliances,

a wide array of consumer electronics (such as TVs, VCRs, HiFi systems) and miscellaneous small appliances (such as vacuum cleaners, irons, toasters, hairdryers and power tools). Household appliances save a large amount of domestic labour to perform the household tasks, as well as provide comfort conditions and convenience to the household occupants. The European Community SAVE Programme has promoted the efficient use of energy, in particular in domestic appliances. SAVE has sponsored a variety of studies to

characterise the use of the main household appliances and lighting and to identify cost-effective technical options to improve the energy efficiency, as well as to identify the strategies to promote the penetration of efficient equipment in the market place. National energy agencies, independent experts and appliance manufacturers have participated in the SAVE activities and have done a remarkable job. While the energy efficiency of the main household appliances has been improved, at the same time it was possible in most cases to

improve the appliance performance, reliability and quality of service.

Programming Challenges Taylor & Francis

This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of

information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

More information to be announced soon on this forthcoming title from Penguin USA *Juvenile Firesetting* Duke University Press *Before Memory Fades* by Fali S. Nariman is a revelatory, comprehensive and perceptive autobiography – candid, compelling and authoritative. Internationally admired and respected, Fali S. Nariman is a senior advocate of the Supreme Court of India.

He began his career at the Bombay High Court in November 1950, and has since been active in the legal profession. Over the years, he has held several prestigious posts at both the national and international levels. He became a Member of Parliament (Rajya Sabha) in November 1999. He is the recipient of the Padma Bhushan (1991) and the Padma Vibhushan (2007). Starting with his formative years, when he had the good fortune to interact with many eminent judges and advocates, Fali S. Nariman moves on to deal with a wide variety of important subjects, such as, the sanctity of the Indian Constitution and attempts to tamper with it. crucial cases that have made a decisive impact on the nation, especially on the interpretation of the law, the relationship between the political class and the judiciary, the cancer of corruption and how to combat this menace, the author outlines measures to restore the now-low credibility of the legal profession, he also delineates his role in several high-profile cases. In recognition of his track record, the Government of India nominated him to the Rajya Sabha. He describes the highlights of his tenure there. Both

members of the legal profession and the lay reader will find the contents informative and useful.

Information Experience Humana Bananas and plantains are major fruit crops in the tropics and subtropics, making a vital contribution to the economies of many countries. In the last 15 years, substantial changes have occurred in banana production, among them the increased importance of fungal and viral diseases and their serious impact on Cavendish export cultivars, smallholder plantains and cooking bananas. Changes in production systems such as protected greenhouse cultivation, organic, fair-trade and integrated cultivation and their respective certification schemes have also become prominent. This book provides an accessi.

Boiler (Efficiency) Regulations 1993

Cambridge University Press

In 2015, building on the advances of the Millennium Development Goals, the United Nations adopted Sustainable Development Goals that include an explicit commitment to achieve universal health coverage by 2030. However, enormous gaps remain between what is achievable in human

health and where global health stands today, and progress has been both incomplete and unevenly distributed. In order to meet this goal, a deliberate and comprehensive effort is needed to improve the quality of health care services globally. Crossing the Global Quality Chasm: Improving Health Care Worldwide focuses on one particular shortfall in health care affecting global populations: defects in the quality of care. This study reviews the available evidence on the quality of care worldwide and makes recommendations to improve health care quality globally while expanding access to preventive and therapeutic services, with a focus in low-resource areas. Crossing the Global Quality Chasm emphasizes the organization and delivery of safe and effective care at the patient/provider interface. This study explores issues of access to services and commodities, effectiveness, safety, efficiency, and equity. Focusing on front line service delivery that can directly impact health outcomes for individuals and populations, this book will be an essential guide for key stakeholders, governments, donors, health systems, and others involved in health

care.

Energy Efficiency in Domestic Appliances and Lighting Springer Nature

This book provides a reference and contextual basis for depression, burnout and suicide among oncology and other medical professionals. Oncology as a medical subspecialty is at a unique apex of this crisis. While the same pressures in medicine certainly apply to oncologists, oncology is particularly stressful as a changing field with diverse patient and societal expectations for outcomes. In addition to experiencing the stress of caring for patients that could succumb to their cancer diagnoses, these professionals are regularly confronted with an onslaught of new medical information and a landscape that is changing at a breakneck pace. These are just a few factors involved in the increasing rates of burnout among oncologists as well as other medical professionals. By addressing a gap in identifying mental health problems among health care professionals, this book sheds light on mental health problems and suicide among physicians. Importantly, this book is a call to action of the professional and

administrative organizations to work on improving mental health of physicians. Anxiety and depression affect not only the individual doctor but also patient care. Given the increasing attention to these issues along with limited yet applicable data regarding how to address these issues, the text aims to bring the latest data face to face with consensus opinion and can be used to ultimately enhance oncologic and psychiatric practices. Written by experts in the field, *Depression, Burnout and Suicide in Physicians: Insights from Oncology and Other Medical Professions* aims to significantly increase awareness and contribute to understanding the necessity of preventive measures on individual, family, and care givers levels.

Power in World Politics UBC Press

Yeast Genetics: Methods and Protocols is a collection of methods to best study and manipulate *Saccharomyces cerevisiae*, a truly genetic powerhouse. The simple nature of a single cell eukaryotic organism, the relative ease of manipulating its genome and the ability to interchangeably exist in both haploid and diploid states have always made it an

attractive model organism. Genes can be deleted, mutated, engineered and tagged at will. *Saccharomyces cerevisiae* has played a major role in the elucidation of multiple conserved cellular processes including MAP kinase signaling, splicing, transcription and many others. Written in the successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, *Yeast Genetics: Methods and Protocols* will provide a balanced blend of classic and more modern genetic methods relevant to a wide range of research areas and should be widely used as a reference in yeast labs.

Crossing the Global Quality Chasm

Rowman & Littlefield

As in the successful first edition, this book provides straightforward information on

plastic materials and technology, including the options for recycling plastics, with special focus on mechanical recycling. This new edition reflects the great strides that have been made to increase recycling rates worldwide in recent years. It considers the expansion of infrastructure in the UK to support plastic recycling and major achievements that have been made in gaining widespread public support and participation for recycling schemes; specifically the need to manage waste on an individual household level. Current issues surrounding council recycling of plastic bottles, and the practice of providing free plastic carrier bags by supermarkets, are also considered. Biopolymers are expected to have a major impact on plastic markets in the future and therefore some of the issues of biodegradability versus recycling are expanded in this second edition, as is the wider context of life cycle analysis and legislation.

Depression, Burnout and Suicide in Physicians Oxford University Press, USA

This book comprises innovative research on the information behavior of various age groups. It also looks at special populations

such as ethnic minorities, indigenous peoples, and users with disabilities. The book presents research and reflections on designing systems that help the new generation cope with a complex knowledge society.

Humor in Uniform Springer Nature Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) * at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in

the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 25 (thesis year 1980) a total of 10,308 theses titles from 27 Canadian and 214 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. While Volume 25 reports theses submitted in 1980, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Human Rights, Southern Voices Penguin 'Public Secrets of Law' describes the everyday socio-legal processes that underlie the making of rape trials in Indian courts. Based on an ethnographic project in the rural District and Sessions Court in Ahmedabad (Gujarat), as well as critical readings of the juridical archive, it demonstrates how rape trials furnish scripts of the social via the judicialised bodies of violated women.

First International Conference on Sustainable Technologies for

Computational Intelligence CRC Press Bourdieu and Historical Analysis explores the usefulness of Pierre Bourdieu's thought for analyzing not only the reproduction of social structures but also large-scale sociohistorical change.

Preservation of Archives in Tropical Climates Cambridge University Press

This book provides in-depth knowledge about critical factors involved in the success of pervasive healthcare. The book first presents critical components and importance of pervasive healthcare. The authors then give insight into the pervasive healthcare information systems and key considerations related to remote patient monitoring and safety. The book provides in-depth discussion about the security issues and protocols for pervasive healthcare. This book explores concepts and techniques behind the successive pervasive healthcare systems by providing in-depth knowledge about patient empowerment, remote patient monitoring, network establishment and protocols for effective pervasive healthcare. The book also provides case studies in the field. It is

an ideal resource for researchers, students and healthcare organizations to get insight about the state of the art in pervasive healthcare systems. Provides current research, developments, and applications in pervasive healthcare; Includes technologies such as machine learning, cryptography, fog computing, and big data in the advancement of e-healthcare; Pertinent for researchers, students, practitioners and healthcare decision makers.

The Clinical Medical Librarian's Handbook
Springer Nature

This anthology contains a variety of Southern perspectives on human rights and contemporary issues relating to Islam, African custom, constitution making and abuses of the language of human rights.

Discovering what characterizes strong clinical medical librarianship and how those characteristics have been and are supporting clinicians in their delivery of evidence-based medicine can help those in this profession evaluate and strengthen their own programs. Perhaps more importantly, learning about and from leaders in clinical medical librarianship can help not only other librarians but also clinicians and other healthcare professionals strategize to ensure that their programs stay abreast of the rapidly changing healthcare field using methods and approaches that recognize the importance of providing biomedical information and adapting to new technology and research requirements. Beginning with a discussion of the birth of the Clinical Medical Librarian (CML) and continuing with chapters that explore current innovative programs conducted by CMLs, *The Clinical Medical Librarians Handbook* piques reader's interest in this exciting professional field through descriptive scenarios. The book moves quickly through the history of librarians accompanying clinicians on medical wards

to the realization of librarians partnering with clinicians in the face of a rapidly changing healthcare scene. Success and challenges are discussed by professional CMLs working in urban academic medical centers. *The Clinical Medical Librarians Handbook* is intended for any library student, practicing librarian or health administrator interested in understanding the variety of roles medical librarians play in the healthcare system of the United States, how medical librarians interact with clinicians and patients, the power of patient-centered care and technology, the importance of information to public health, novel ways to introduce and teach clinical learners to use resources, how clinical medical librarians learn to do the job and tips for managing clinical medical library programs.

Pervasive Healthcare Springer

This book gathers high-quality papers presented at the First International Conference on Sustainable Technologies for Computational Intelligence (ICTSCI 2019), which was organized by Sri Balaji College of Engineering and Technology, Jaipur, Rajasthan, India, on March 29-30, 2019. It covers emerging topics in

computational intelligence and effective strategies for its implementation in engineering applications.

Transformative Constitutionalism

Routledge

Small dreams can damn as much as full-blown nightmares, as proven in the short stories Laura Argiri has written in her

debut collection, *Guilty Parties*. Small town life can host the bitterest gossip, and small-minded folk can offer the cruelest taunts and regrettable deeds. A mother dwells on how broken her only daughter is, and whether her grandchild is all the crueller for it. A man's obsession with bettering his lot in life to impress a woman

develops a fascination instead for poisonous snakes. A young wife is confronted by her husband's former boarding school roommate, a demented man whose misogyny has convinced him that she tore a rightful pairing apart. Guilt is the mortar between these enthralling tales.
