Serbische Lesekörner, oder historisch-kritische Beleuchtung der Serbischen Mundart. Ein Beitrag zur Slawischen Sprachkunde, etc Verso

The EU and the US responded to the global financial crisis by changing the rules for the functioning of financial services and markets and by establishing new oversight bodies. With the US Dodd-Frank Act and numerous EU regulations and directives now in place, this book provides a timely and thoughtful explanation of the key elements of the new regimes in both regions, of the political processes which shaped their content and of their practical impact. Insights from areas such as economics, political science and financial history elucidate the significance of the

reforms. Australia's resilience during the financial crisis, which contrasted sharply with the severe problems that were experienced in the EU and the US, is also examined. The comparison between the performances of these major economies in a period of such extreme stress tells us much about the complex regulatory and economic ecosystems of which financial markets are a part.

From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country

taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters—generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty—come to life in all their human uniqueness, free from idealization.

"This book provides a useful round-up of studies that help the reader understand what constitutes bullying (a much-debated point), the characteristics of bullies and children who are targeted, patterns of behaviour and common outcomes for the children involved, as well as what inhibits many schools from formulating effective policy." Children & Young People Now

What is bullying? What can we learn from research findings? What are the risk factors for bullying or being bullied? How can we take account of the voice of the child? How can educators, policy-makers, health professionals and parents work together with children and young people to prevent and reduce bullying? This book provides a valuable resource for anyone responsible for the emotional health and well-being of children and young people. The authors focus on the importance of fostering positive relationships in the school community as a whole, so that young people and adults feel empowered to challenge bullying when they encounter it and protect those involved. Using case studies of real experiences, innovative practice, key research findings and perspectives from children and young people themselves, the authors provide perceptive insights into the positive ways of relating to others that are essential if we are to address the issue of bullying successfully. The material outlined in the book is directly linked to the new agenda for change in meeting the needs of the child, empowering children to be consulted and to take responsibility for issues that affect them. It explores a range of effective interventions that can counteract bullying - including restorative approaches; peer mediation; narrative approaches; and cyber support. Key features include: Chapter overviews Examples of effective practice Summaries of key research findings Children's views and experiences Learning points at the end of each chapter List of related organisations, websites and resources to support interventions against bullying Practical guidance based on sound evaluation is provided - as well as an insight into international perspectives on bullying - to help develop a positive school environment and disseminate good practice. New Perspectives on Bullying is an indispensable resource for teachers,

researchers, health professionals, social workers and parents.

"College Learning for the New Global Century, published through the LEAP (Liberal Education and America's Promise) initiative, spells out the essential aims, learning outcomes, and guiding principles for a 21st century college education. It reports on the promises American society needs to make - and keep - to all who seek a college education and to the society that will depend on graduates' future leadership and capabilities." -- Foreword (p. vii).

Big Mac American Mathematical Soc. A significant body of knowledge is the basis for a holistic, caring and scientific evidence-based nursing education in practice for professional development. Quality teaching leads to good learning and both aspects are two of the main issues of quality assurance in nursing education today. To begin with, not all nursing students have the same levels of motivation or learning abilities. It is with cognisance of providing quality care for patients that the role of the nurse educator has to be to enhance nursing students' learning using scientific evidence based teaching. Research around teaching and learning processes is an important part of the delivery of quality education, which in turn impacts on students' learning results and experiences, thereby, ensuring holistic biopsychosocial care to patients. The main aim of teaching and learning in nursing, at all levels, is to enhance the nurses' contribution to assist the individuals, families and communities in promoting and preserving health, well-being and to efficiently respond to illnesses. We hope that this book can be used as a resource to increase the body of knowledge in teaching and learning in nursing, thereby enhancing the role and contribution of health care professionals to clinical practice.

From Dawn till Dusk embraces the conceptual challenges often associated with Bioethics by taking the reader on a journey that embodies the circle of life and what it means to be human. The beginning and the end of life have always been an impossible riddle to humans. Bioethics does not aspire to unveil utter truths regarding the purpose of our existence; on the contrary, its task is to settle controversial issues that arise within this finite, very fragile and vulnerable life, yet a life we still have to live. This book discusses thorny ethical issues that

transcend time and are related to the dawn and the dusk of life: abortion and infanticide, genetic engineering, human reproductive cloning, the fear of death, rational suicide, and the right to die. The book's highest aspiration, though, is to both provide the reader with an opportunity to see the world from different perspectives and to showcase the irresistible charms of bioethical debates.

"This book brings contemporary issues in bioethics into conversation with different philosophical views, both ancient and modern. The result is a rewarding and very readable discussion on a range of important questions about life and death." Peter Singer, Princeton University & University of Melbourne

"Evangelos D. Protopapadakis' book is a philosophically rich discussion of major topics in bioethics about issues of life and death. The work is original and important. I believe the author is correct to argue that the central issues of bioethics at its core in these areas should be understood as moral in nature and should not be framed as principally legal or scientific." Tom L. Beauchamp, Georgetown University

"Bioethics is - in philosophical terms - a new field. But it builds on centuries of thought on the human condition, the meaning of life, and the fundamental ethical question: What should we do? Evangelos D. Protopapadakis' masterful volume traces modern bioethical debates, with all their increasing scientific complexity, back through ancient and modern philosophical thought. The result is a sparkling and engaging journey through the history of ideas and the current ethical challenges at the beginning and end of life." Julian Savulescu, Uehiro Chair in Practical Ethics, University of Oxford

"As the Head of the Greek Unit of the Chair, but also as an ethicist and a bioethicist, Professor Protopapadakis has never been weary to contribute to philosophically nuanced bioethical debates. This inspiring book is the manifestation of his attitude towards Bioethics." Amnon Carmi, Holder of the UNESCO Chair in Bioethics (Haifa)

"This book presents important connections between current positions and classical approaches in ethics, written in a lively way." Hans-Werner Ingensiep, Universität Duisburg-Essen

"Evangelos Protopapadakis' book provides nuanced insights describing the complex ethical problems which clinicians and society must address. This creative analysis incorporates ancient and contemporary historical examples to illuminate the disparate arguments used to justify conflicting philosophical responses." Susan M. Miller MD, MPH

The Macmillan Interdisciplinary Handbooks: Gender series serves undergraduate college students who have had little or no exposure to Gender Studies, as well as the curious lay reader. Following the Primer, which introduces the field of study, as well as the topics of the remaining 9 volumes plus a selection of subjects that will not receive full volume treatment (e.g., new media, music, disability), each handbook ushers the reader into a subfield of Gender Studies (see the list of titles, below) and explores twenty to thirty topics in that subfield. Every chapter in each volume, all newly commissioned studies prepared by academic experts, offers an annotated bibliography/research guide to encourage students to explore the topics further, using vehicles such as film or the arts to facilitate understanding of issues at the heart of the discipline, for example, fashion, health, masculinities. Each chapter ends with a summary of the concepts discussed. Each volume is edited by an academic subject specialist.

New York Times–bestselling author Tilly Bagshawe continues the enduring legacy of beloved suspense author Sidney Sheldon with a new tale of glamour, suspense, and unexpected twists A young American au pair, Charlotte Clancy, vanishes without a trace in Mexico City. The case is left cold, but its legacy will be devastating. A decade later, LA is shaken by a spate of violent murders. Psychologist Nikki Roberts is the common link between the victims, her patients at the heart of this treacherous web. When someone makes an attempt on Nikki's life, it's clear she is a marked woman. Nikki makes a living out of reading people, drawing out their secrets, but the key to this shocking pattern eludes her. With the police at a dead end Nikki drafts in Derek Williams, a PI who isn't afraid to put his hand into the hornet's nest. Williams was thwarted in the notorious Charlotte Clancy case all those years ago, but what he unearths in LA—and the mention of one name in particular—leaves him cold, and takes him on a dangerous path into the past. A shadowy manipulator has brought his deadly game to the streets of LA. In a crime spanning generations, it seems Nikki Roberts knows all too much—and a ruthless killer knows the price of her

silence. In this crooked city, where enemies and friends are one and the same, Nikki must be the master of her own escape...

Generative Phonology Description and Theory

"During World War II every psychologist had a job to do. His contributions sometimes were made in uniform and sometimes in whatever vestless and cuffless suit was available. Whether in uniform or not, the psychologist's work was related to the war effort or to the essential war functions of the nation. When the war ended, the psychologist found that his responsibilities were no less urgent. For the future his prospects seem to be even heavier burdens and a neverending path. Since the years 1940 and 1941, the psychologist has shown himself capable of performing duties not previously allotted to him, or, for that matter, not previously delegated to anyone else. There has grown up a better understanding of the potential functions of the psychologist, an understanding which creates new assignments for him. Instead of a reluctance to intrust to him problems in human behavior, there is today an insistence that he attempt problems with which perhaps he is not yet prepared to deal. Clearly these past few years have been an era of great change in psychology, as they have in many other fields. It is unfortunate that during these dramatic and eventful times, there were few professional meetings and little time or opportunity for the discussion of professional problems. With the return of the possibility of holding professional meetings, it occurred to us that a symposium on current trends in

psychology would be most timely and desirable. With the cordial support of the administrative officials of the University, we were able to hold at the University of Pittsburgh, on March 5 and 6, 1947, a conference on current trends in psychology. The present volume contains the papers delivered then. In planning our program we attempted to include in it discussions of recent advances and of probable future developments in several fields of psychology. There necessarily was a limit to the number of fields which could be included. In each chosen area of psychology we selected a speaker who is now active in that field"--Preface. Non-verbal skills are invaluable for teachers in getting their own messages across to classes and understanding the messages pupils are sending them. Here an educational psychologist and a classroom teacher join forces to show new teachers in particular how to use gesture, posture, facial expression and tone of voice effectively to establish a good relationship with the classes that they teach. Each chapter is illustrated with clear drawings of pupils and teachers in common classroom situations and accompanied by training exercises aimed at improving the new teacher's ability to observe both her class and her own practice. A section at the end of the book gives suggested solutions to some of the exercises and the final chapter, addressed to staff responsible for their colleagues' professional development, provides suggestions for half and whole day courses.

Meet Hedgemond the Hunter - a brave and stubborn little hedgehog. Down in the wild woods he proudly tends his beloved

house, but there are some animals who just can't understand what the fuss is about. Find out just how Hedgemond proves to the grumpy bear and the greedy boar that there is no place like home. Hedgehog's Home is a story about caring for the place you call home. Set in the unspoiled environment of the 'wild woods', we find the wild creatures arguing about what home means: is it simply a place we should take for granted or is it something to be cherished and protected? Despite the persuasions of charming Miss Fox and the jeers of the angry wolf, Hedgemond steadfastly proves that his home is his castle, reminding us all to be true to ourselves and safeguard what we care for.

These lecture notes from the 1985 AMS Short Course examine a variety of topics from the contemporary theory of actuarial mathematics. Recent clarification in the

concepts of probability and statistics has laid a much richer foundation for this theory. Other factors that have shaped the theory include the continuing advances in computer science, the flourishing mathematical theory of risk, developments in stochastic processes, and recent growth in the theory of finance. In turn, actuarial concepts have been applied to other areas such as biostatistics, demography, economic, and reliability engineering.

This is a new edition of one of our best-selling textbooks. The authors have thoroughly updated the fourth edition and included more text on current developments in research practice, action research, developments in ICT, questionnaire design, ethnographic research, conducting needs analysis, constructing and using tests, observational methods, reliability and validity, ethical issues and curriculum research. The entire text has been redesigned to cater for the increasingly sophisticated needs of the educational researcher. The new edition is more comprehensive, up-to-date and user-friendly, with increased accessibility. The authors, who are experienced teachers in the field, have produced a better written book (if that's possible) containing readable and realistic views of research and methodology, and show how to interpret the data.
