Disruption Rowman & Littlefield
Training in psychoanalysis is a long and demanding process. However, the quality of education available is hugely variable across the world. The structure of psychoanalytic education, centered on the hierarchical "training analysis" system, reflected a concerted effort to maintain a stable and high quality educational process. However, throughout time this system has become a major source of institutional contradictions that affect the training of candidates, the scientific developments within psychoanalysis, and the nexus of psychoanalytic theory and practice with the surrounding scientific,

social and cultural world. Psychoanalytic Education at the Crossroads examines the ways in which group processes, the hierarchal culture in institutes, the influence of individual personalities, the lack of research and the faults in supervision can all stifle creativity and hinder candidates' progress. In this compelling work, Otto Kernberg sets out clear suggestions for how these issues can be addressed, and how he sees the future of psychoanalytic education across all psychoanalytic settings and schools of thought. The first part of this volume is focused primarily on the analysis of the nature of these problems and their effects on the personal analysis and

supervision of candidates; on theoretical and clinical seminars; on selection, progression, and graduation; on educational principles and requirements, developments of theory and technique and, in particular, limitation versus expansion of the realm of interests and applications of psychoanalysis. The second part of this volume deals with proposals of solutions to the problems encountered, and major suggestions for innovation in psychoanalytic education. The author's work in this area has been hugely influential. Kernberg has made a substantive difference in the development of psychoanalytic

institutes and education, and continues to do so. Psychoanalytic Education at the Crossroads will be essential reading to anyone involved in psychoanalytic education, whether as a psychoanalyst, psychoanalytic psychotherapist, trainee, trainer, or supervisor.

Romania hosts the 2012 Bologna / European Higher Education Area Ministerial Conference and the Third Bologna Policy Forum. In preparation for these meetings, The Executive Agency for Higher Education, Research, Development and Innovation Funding

(UEFISCDI) organised the Future of Higher Education - Bologna Process Researchers' Conference (FOHE-BPRC) in Bucharest on 17-19 October 2011, with the support of the European University Association (EUA) and the Romanian National Committee for UNESCO. The conference brought the voices of researchers into international-level policy making in higher education. The results of the conference are presented in this book. Until now, empirical evidence supporting policies and reforms in higher education has often been a matter of local or regional focus. The development of a pan-European process in higher education policy drives a need to explore wider research topics on which to base

policies. This book offers an unprecedented opportunity for higher education researchers to interact and contribute to the political process shaping the European Higher Education Area (EHEA), and to national policy agendas in more than 100 participant countries for the 2012 ministerial events. The book collects more than 50 articles focusing on vital issues in European higher education. These are arranged in sections addressing the European Higher Education Area (EHEA) Principles; Teaching and Learning; Quality Assurance; Mobility; Higher Education Governance in the EHEA; Funding of Higher Education; Diversification of

Higher Education Missions; Higher Education Futures and Foresight.

Living at the Crossroads Palgrave Macmillan
 How can Christians live faithfully at the crossroads of the story of Scripture and postmodern culture? In *Living at the Crossroads*, authors Michael Goheen and Craig Bartholomew explore this question as they provide a

general introduction to Christian worldview. Ideal for both students and lay readers, *Living at the Crossroads* lays out a brief summary of the biblical story and the most fundamental beliefs of Scripture. The book tells the story of Western culture from the classical period to postmodernity. The authors then provide an analysis of how Christians live in the tension that exists at the intersection of the biblical and cultural stories, exploring the important implications in key areas of life, such as education, scholarship, economics, politics, and church.

Democracy at the Crossroads Well House Books
This book explores pedagogical change and innovation in US colleges and universities, and how faculty are prepared to adapt to such changes. Drawing from interviews with faculty developers at Centers for Teaching and Learning at research and teaching-focused institutions across the United States, this book explores how traditional forms of pedagogy are shifting toward student-centered and student-directed forms of learning. The book unpacks the historical development of changes in teaching, drawing from research

in teaching within particular domains such as diversity, equity, and inclusion in higher education, community-based teaching and learning, online and hybrid teaching and learning, course design, interdisciplinary teaching and learning, assessment of teaching, and the scholarship of Teaching and Learning (SoTL). This is an invaluable resource for faculty, graduate students, and scholars of Higher Education, and faculty developers looking to promote a culture of continual renewal and innovation at their institutions.

The Education of Little Tree has been

embedded in controversy since the revelation that the autobiographical story told by Forrest Carter was a complete fabrication. The touching novel, which has entranced readers since it was first published in 1976, has since raised questions, many unanswered, about how this quaint and engaging tale of a young, orphaned boy could have been written by a man whose life was so overtly rooted in hatred. How can this story, now discovered to be fictitious, fill our hearts with so much emotion as we champion Little Tree's childhood lessons and future successes? The Education of Little Tree tells with poignant grace the story of a boy who is adopted by

his Cherokee grandmother and half-Cherokee grandfather in the Appalachian Mountains of Tennessee during the Great Depression. "Little Tree," as his grandparents call him, is shown how to hunt and survive in the mountains and taught to respect nature in the Cherokee Way—taking only what is needed, leaving the rest for nature to run its course. Little Tree also learns the often callous ways of white businessmen, sharecroppers, Christians, and politicians. Each vignette, whether frightening, funny, heartwarming, or sad, teaches our protagonist about life, love, nature, work, friendship, and family. A classic of its era and

an enduring book for all ages, *The Education of Little Tree* continues to share important lessons. Little Tree's story allows us to reflect on the past and look toward the future. It offers us an opportunity to ask ourselves what we have learned and where it will take us.

This document reports on a congressional subcommittee's review of the federal role in education. The review included visits to 15 states and testimony from more than 225 principals, teachers, and other education stakeholders. The committee's purpose was to identify the steps that lead in the direction of either excellence or failure. The subcommittee found that successful schools and school systems were not the product of federal funding but instead were characterized by parents involved in the

education of their children, local control, emphasis on basic academics, and dollars spent on the classroom. The central theme of the findings is that the federal government cannot consistently replicate success stories in the form of federal programs. Rather, the government should empower parents by reducing the family federal tax burden; encourage parental choice in education; return federal elementary and secondary education funds to states and local school districts through flexible grants; use federally funded education programs only for methods backed by reliable, replicable research; streamline and consolidate federal

education programs; and reform or eliminate ineffective and inefficient programs. In short, the federal government should serve education as a research and statistics- gathering agency, disseminating findings and enabling states to share best practices with each other. The report was adopted by the subcommittee by a vote along Republican-Democrat party lines of 5-2. The 17 page minority report, "Crossroads Hearings: A Republican Assault on Public Education," is printed as an appendix. (RJM)

In today's volatile law school environment, curriculum reform has emerged as a significant focus. It is commonly understood that law schools effectively teach certain analytical skills, but are less successful in other areas, and often scramble to adapt to evolving aims. This book demonstrates how law schools are successfully reforming their curriculum - and lays the framework to show how all schools of law can engage in a continuous reform

model that proactively shapes our profession. It is expected that faculty and professional staff engaged in legal education will utilize this book as a primary resource to guide their respective reform efforts. Each contributed chapter presents a case study of a data-driven curriculum reform effort. The initial chapters set the conceptual context for the book, while the final chapter offers summative recommendations for considering legal education reform as derived from the earlier case study chapters. This book adds significantly to the literature in legal education, as we gain first hand insight into evidence based reform

for the legal education community.

"Inclusive Education at the Crossroads explores the short and long-term effectiveness of government plans to reform policy for special needs education, confronting difficult questions on policies about inclusion and suggesting

alternative ways forward for achieving more effective education of children with special educational needs and disabilities (SEND). Inclusion has been a central concern for education systems globally for over three decades. However, has preoccupation with inclusion been at the expense of effective education for children with SEND? Where do policies for inclusion lead, and do they amount to the special education reform that is needed? What do the worldwide experiences of inclusion and special education reveal about how to improve the quality of education systems for all children in the future? How effective is the provision for children with SEND today?

Through this informative and topical book, Gordon-Gould and Hornby shine an interrogating spotlight on current provision for SEND and ask if current legislation and policy inadvertently reinforce problems; if they cause many children with SEND to fall short of their potential, as well as preventing many schools from improving their levels of overall academic attainment. Inclusive Education at the Crossroads provides theory and research for teachers, school leaders, governors, policy makers, researchers, parents, post graduate students and anyone seeking practical solutions to meeting the needs of pupils with SEND in any global context. It will

encourage open debate about the essence of educational inclusion in order to stimulate creative thinking among all stakeholders"--

Learning assistance often operates at the crossroads of the institution where academic affairs, student affairs, and enrollment management converge. This report investigates the effectiveness of learning assistance for supporting academic affairs with better-prepared students for academically rigorous courses, working with student affairs to achieve higher student development outcomes, and supporting enrollment management programs

to increase persistence rates. This report explores difficult questions confronting learning assistance: What is the obligation of colleges for providing assistance for its students? Is learning assistance a civil rights issue for historically underrepresented students attending postsecondary education? What is the history of learning assistance for serving previous generations of students, even at the most prestigious public and private institutions in the United States? Are learning assistance needs better met by high schools and two-year institutions? Do learning assistance activities benefit the postsecondary institution and society? Although it has a

presence in most postsecondary institutions, the expression of learning assistance is quite diverse through credit and noncredit activities. The preferred term used in this report is "learning assistance," because it is commonly used and most inclusive of the various approaches and activities of the field. This is the sixth issue the 35th volume of the Jossey-Bass series ASHE Higher Education Report. Each monograph in the series is the definitive analysis of a tough higher education problem, based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and

scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication. Jesuit Education at the Crossroads Yale University Press In Democracy at the Crossroads, the editors argue that there have been too few scholarly attempts to provide a comprehensive critique of the assumptions behind citizenship education. In particular, they ask the distinguished contributors to this volume to address difficult but essential questions that are often avoided or intentionally overlooked: What do all-embracing terms like 'global citizenship' really mean? What does democracy mean

internationally? A timely work, *Democracy at the Crossroads* provides a necessary examination and re-interpretation of international perspectives on democracy and global citizenship as they apply to social education.

Field Hearing on "education at a Crossroads: what Works? What's Wasted?" Lexington Books

International Education at the Crossroads captures the essence and complexity of international education in an interconnected and globalized world. Written by leading scholars, international educators, and policy makers, the 26 essays in this volume take stock of the unpredictable

landscape of international education and demonstrate why international higher education is more essential now than ever before.

Responding to a timely global moment where education and international engagement are being redefined and practiced in new ways, the authors call for a reconsideration of paradigms and critical reflection of the entire field of international education. At the same time, the authors show how international education is an imperative for the future of learning and the world, and also, crucially, that this work cannot be done in a silo. *International Education at the Crossroads* offers readers a chance to

join in the conversation that is as global as it is meaningful in communities, the lives of learners, and institutions around the world. International education requires that everyone the world over work together to produce new knowledge, to navigate the "crossroads," and to collectively chart the directions in which the field will move into the future.

Robert L. Green, a friend and colleague of Martin Luther King Jr., served as education director for King's Southern Christian Leadership Conference during a crucial period in Civil Rights history, and—as a consultant for many of the nation's largest school districts—he continues

to fight for social justice and educational equity today. This memoir relates previously untold stories about major Civil Rights campaigns that helped put an end to voting rights violations and Jim Crow education; explains how Green has helped urban school districts improve academic achievement levels; and explains why this history should inform our choices as we attempt to reform and improve American education. Green's quest began when he helped the Kennedy Administration resolve a catastrophic education-related impasse and has continued through his service as one of the participants at an Obama administration summit on a current

academic crisis. It is commonly said that education is the new Civil Rights battlefield. Green's memoir, *At the Crossroads of Fear and Freedom: The Fight for*

Social and Educational Justice, helps us understand that educational equity has always been a central objective of the Civil Rights movement.
