 Prof. G. Ramachandran (1936-2020) taught physics to the students pursuing M.Sc. and Ph.D. degrees at the Department of Studies in Physics, Manasagangotri, University of Mysore, as a Professor from 1973 till 1996, when he formally retired. Later, he

continued working in the department till 2001 as a CSIR Emeritus Scientist. During this period, more than 20 batches of post graduate students learnt the beauty of theoretical physics listening to his course of lectures. Under his supervision more than a dozen students earned the PhD degree, drawing great appreciation from the thesis examiners. He moved to Bengaluru in 2001 and worked as a Visiting Professor at Indian Institute of Astrophysics till 2007. Thereafter, he continued to mentor several students in their research work. Prof. Ramachandran - GR to all his students - passed away on April 9, 2020. This book is a tribute to GR by his students, colleagues and admirers who were inspired by his lectures, research work, devotion to physics and, above all, his simple lifestyle. The book is a collection of articles which give us a glimpse of GR's academics at IMSc (Chennai), ISI (Kolkata), IISc (Bengaluru), University of Mysore and IIA (Bengaluru).

 The glacier of Ancient Vedic wisdom flowed down the Himalayan Kailash and watered the Hindu philosophy. The Shrutis (that which was heard) and the Smritis (that which was remembered) reflected this Vedic wisdom. Thinkers and philosophers of the time expressed their thoughts in prosaic Dharmasutras and later on in more refined poetic Dharmashastras. The Smritikars followed with their own interpretation, symbolically represented by the Code of Manu. That jurisprudence was responsible for taking the country through the Golden pages of its history. With the British dominance, India was plunged in Common Law Jurisprudence, interwoven with Hindu Philosophy. The Midnight country awoke in 1947 to an Independent democratic set up, and in 1950 was wedded to the Indian Constitutional philosophy, laid with the bricks of Common Law. With the establishment of the Supreme Court of India, the apex judicial institution in an interpretative mood carved a unique niche for Anglo- Indian Jurisprudence, amidst the Legal Systems of the World. In the twenty first century, India is on a launch pad as a new political and

economical superpower. At this stage there is a need for India to familiarize with the Civil Law System, that has grip on the other half of the commercial world. Tiny pockets in Western and in Eastern India, as parts of erstwhile Portuguese or French colonial possessions had earlier experienced the Continental Jurisprudence. These pockets have the unique distinction of having run both the Common and Civil Law Systems and even simultaneously during the transition period. This experience can be a contribution to the globalizing world. Hence it is necessary to foster the study of Civil Law in India, not only from its historical past but also from its future prospects in world market. In "Civil Law Studies: An Indian Prospective", about two dozen scholars from the Law faculties of the Universities of India, Lisbon and Coimbra have collaborated to visualize the role for Civil Law Studies in the subcontinent. They have explored the different branches of law for comparative research such as constitutional, civil, commercial, criminal, etc. The book is intended to be a thought provoking exercise which will strengthen the Study and Research of Civil Law in India. The suggestions are meant to empower legal educators, law students, the bar and the bench in India.

This new text is a detailed study of an important process in modern Indian history. During the late nineteenth and early twentieth century, India experienced an intellectual renaissance, which owed as much to the influx of new ideas from the West as to traditional religious and cultural insights. Gosling examines the effects of the introduction of Western science into India, and the relationship between Indian traditions of thought and secular Western scientific doctrine. He charts the early development of science in India, its role in the secularization of Indian society, and the subsequent reassertion, adaptation and rejection of traditional modes of thought. The beliefs of key Indian scientists, including Jagadish Chandra Bose, P.C. Roy and S.N. Bose are explored and the book goes on to reflect upon how individual scientists could still accept particular religious beliefs such as reincarnation, cosmology, miracles and prayer. Science and the Indian Tradition gives an in-depth assessment of results of the introduction of Western science into India, and will be of interest to scholars of Indian history and those interested in the interaction between Western and Indian traditions of intellectual thought.
